Pavlov's Physiology Factory Experiment Interpretation Laboratory Enterprise:

Pavlov's Physiology Factory Daniel P. Todes, 2003-04-29 Russian physiologist and Nobel Prize winner Ivan Pavlov is most famous for his development of the concept of the conditional reflex and the classic experiment in which he trained a dog to salivate at the sound of a bell In Pavlov's Physiology Factory Experiment Interpretation Laboratory Enterprise Daniel P. Todes explores Pavlov's early work in digestive physiology through the structures and practices of his landmark laboratory the physiology department of the Imperial Institute for Experimental Medicine In Lectures on the Work of the Main Digestive Glands for which Pavlov won the Nobel Prize in 1904 the scientist frequently referred to the experiments of his coworkers and stated that his conclusions reflected the deed of the entire laboratory This novel claim caused the prize committee some consternation Was he alone deserving of the prize Examining the fascinating content of Pavlov's scientific notes and correspondence unpublished memoirs and laboratory publications Pavlov's Physiology Factory explores the importance of Pavlov's directorship of what the author calls a physiology factory and illuminates its relationship to Pavlov's Nobel Prize winning work and the research on conditional reflexes that followed it Todes looks at Pavlov's performance in his various roles as laboratory manager experimentalist entrepreneur and scientific visionary He discusses changes wrought by government and commercial interests in science and sheds light on the pathways of scientific development in Russia making clear Pavlov's personal achievements while also examining his style of laboratory management Pavlov's Physiology Factory thus addresses issues of importance to historians of science and scientists today big versus small science the dynamics of experiment and interpretation and the development of research cultures

The Ten Most Beautiful Experiments George Johnson, 2009-03-10 A dazzling irresistible collection of the ten most groundbreaking and beautiful experiments in scientific history With the attention to detail of a historian and the storytelling ability of a novelist New York Times science writer George Johnson celebrates these groundbreaking experiments and re-creates a time when the world seemed filled with mysterious forces and scientists were in awe of light electricity and the human body Here we see Galileo staring down gravity Newton breaking apart light and Pavlov studying his now famous dogs This is science in its most creative hands on form when ingenuity of the mind is the most useful tool in the lab and the rewards of a well considered experiment are on exquisite display

Ivan Pavlov Daniel P. Todes, 2014-10-15 Winner of the Pfizer Award from the History of Science Society Contrary to legend Ivan Pavlov 1849-1936 never trained a dog to salivate to the sound of a bell So begins this definitive deeply researched biography of Ivan Pavlov Daniel P. Todes fundamentally reinterprets the Russian physiologist's famous research on conditional reflexes and weaves his life values and science into the tumultuous century of Russian history particularly that of its intelligentsia from the reign of tsar Nicholas I to Stalin's time Ivan Pavlov was born to a family of priests in provincial Riazan before the serfs were emancipated and made his home and professional success in the booming capital of St Petersburg in late imperial Russia He suffered the cataclysmic destruction of his world during the Bolshevik

seizure of power and civil war of 1917 21 rebuilt his life in his seventies as a prosperous dissident during the Leninist 1920s and flourished professionally as never before in the 1930s industrialization revolution and terror of Stalin times Using a wide variety of previously unavailable archival materials Todes tells a vivid story of that life and redefines Pavlov s legacy Pavlov was not in fact a behaviorist who believed that psychology should address only external behaviors rather he sought to explain the emotional and intellectual life of animals and humans the torments of our consciousness This iconic objectivist was actually a profoundly anthropomorphic thinker whose science was suffused with his own experiences values and subjective interpretations Todes s story of this powerful personality and extraordinary man is based upon interviews with surviving coworkers and family members along with never before analyzed taped interviews from the 1960s and 1970s examination of hundreds of scientific works by Pavlov and his coworkers and close analysis of materials from some twenty five archives The materials range from the records of his student years at Riazan Seminary to the transcripts of the Communist Party cells in his labs and from his scientific manuscripts and notebooks to his political speeches they include revealing love letters to his future wife and correspondence with hundreds of scholars artists and Communist Party leaders and memoirs by many coworkers his daughter his wife and his lover The product of more than twenty years of research this is the first scholarly biography of the physiologist to be published in any language

Understanding Nature Hub Zwart,2008-01-29

This summons clearly resonates with the archetypal image associated with water as a basic element discussed in Chapter 2 water as the element of freedom of mobility of widening one s horizon Although Nietzsche himself refrained from doing what he summoned others to do scientists like Darwin and novelists like Melville actually went to sea Darwin although regarded by Nietzsche as an arid 6 and mediocre mind exposed himself to the experience of a long term trans oceanic voyage in the course of which he did discover new worlds new justifications new moral watchwords even struggle for life that were to have a tremendous impact on science philosophy and even culture at large Other perspectives are present in Moby Dick as well such as the theologian s one depicting the whale as the biblical Leviathan and the ocean as that part of the world where the great flood never abated Indeed the interpretation of marine phenomena in Biblical terms is more or less omnipresent in the novel and also resounds in the views and language of the philosophical sailor and story teller Ishmael But what about the novelist s whale Actually there is not one novelist s whale Ishmael the narrator unmistakably sides with the whaler s point of view but Melville the author is interested in and tries to do justice to a plurality of voices

Science of the Child in Late Imperial and Early Soviet Russia Andy Byford,2020

From the 1880s to the 1930s children became the focus of unprecedented scientific and professional interest in modernizing societies worldwide Science of the Child charts the rise and fall of the interdisciplinary field devoted to the study of children across the late Imperial and early Soviet eras *The History and Evolution of Psychology* Brian D. Cox,2019-07-15 This book discusses key figures in history in the context of their time takes students on a carefully formulated chronological journey through the build up of psychology from ancient times to

the present and seeks to draw students into the way science is done rather than merely presenting them with historical fact. Students will learn not only the what but the why of the history of psychology and will acquire the necessary background historical material to fully understand those concepts. Organized around a series of paradigms a shift from scholasticism to rationalism or empiricism and a shift from idealism to materialism the book seeks to portray psychology as an on going evolving process rather than a theory.

Sport and the Transformation of Modern Europe Alan Tomlinson, Christopher Young, Richard Holt, 2013-06-17 In the modern era sport has been an important agent and symptom of the political cultural and commercial pressures for convergence and globalization. In this fascinating inter disciplinary study leading international scholars explore the making of modern sport in Europe illuminating sport and its cultural and economic impacts in the context of the supra state formations and global markets that have re shaped national and trans national cultures in the later twentieth century. The book focuses on the emergence and expansion of media markets high performance sport s transformation by and effects upon Cold War dynamics and relations and the implications of the Treaty of Rome for an emerging European identity in sport as in other areas for example the influence of soccer s governing body in Europe UEFA and its club and international competitions. It traces the connections between the forces of ideological division economic growth leisure consumption European integration and the development of European sport and examines the role of sport in the changing relationship between Europe and the US. Illuminating a key moment in global cultural history this book is important reading for any student or scholar working in international studies modern history or sport.

Ivan Pavlov Daniel P. Todes, 2022 Winter at Koltushi Certainty religious and scientific The haunted factory Pavlov s quest Come the Bolsheviks Nervous types Year of climaxes Final reflections

The Lighthouse and the Observatory Daniel A. Stolz, 2018-01-11 This history of astronomy in Egypt reveals how modern science came to play an authoritative role in Islamic religious practice

Pavlov on the Conditional Reflex Ivan Petrovich Pavlov, 2023 Pavlov s research was foundational to the twentieth century understanding of physiology and psychology yet much of his work remains untranslated from the original Russian language. In this book Olga Yokoyama translates the third volume of Pavlov s Complete Works as well as his last unpublished paper. The volume also contains the papers from the sixth edition of Twenty Years of Objective Study of the Higher Nervous Activity of Animals. His concept of the conditional reflex has influenced human thought far beyond physiology raising philosophical questions of the mind and its relationship to the psyche creativity and individual freedom.
