Reading Narrative:

Reading Narrative Fiction Seymour Benjamin Chatman, 1993 This short fiction anthology offers a more precise and extensive treatment of narrative technique than other books of its kind Targeting the needs and interests of today's readers the author uses down to earth language and builds on readers familiarity with narrative devices in film television and other popular media to teach this new approach to literary analysis While offering more technical depth Chatman never overwhelms He provides unusually clear and exact definitions of such terms as characterization and point of view along with many illustrations of how these techniques actually operate in short stories His explanations and examples enable readers to read narratives with a new awareness of how they are constructed

Reading Narrative Joseph Hillis Miller, 1998 Reading Narrative is in the author's words a book about how to make sense of stories or how to identify the ways they may fail to make sense Hillis Miller presents discussions of narratives and dialogues in the Western European tradition the works of such writers as Sophocles Plato Shakespeare Henry James Kierkegaard Laurence Sterne Proust Balzac and Elizabeth Gaskell Miller's new readings of Aristotle's Poetics Sophocles Oedipus the King Gaskell's Cranford Pater's Apollo in Picardy and many other works generate a comprehensive and original theory of narrative as he addresses questions about the ends beginnings and middles of the narrative line Miller demonstrates the uses of multiple narrators abrupt shifts in syntax anacoluthon indirect discourse interwoven plots and figures of speech including irony the master trope that is not a trope His narrative analysis in which line images function as salient examples draws the reader's attention in the same way that a master storyteller holds an audience

Douglass, 2018-10-02 Narratives

are the concrete manifestation of an author's subjectivity. They function as that person's voice and should be treated with the same respect that is granted to all voices. In *Interpreting New Testament Narratives* Eric Douglass develops this ethical perspective so that narratives are treated as communication and the author's voice is regarded as a valued perspective. Employing a cross disciplinary approach Douglass shows how readers engage narratives as mental simulations creating a temporary possible world that readers enter and experience. To recover communication readers locate the events of this world in the culture of the intended audience and translate this meaning into the modern reader's worldview. Using a staged reading design this initial reading is followed by readings of critique.

Narrative Form Suzanne Keen, 2015-07-28 This revised and expanded handbook concisely introduces narrative form to advanced students of fiction and creative writing with refreshed references and new discussions of cognitive approaches to narrative nonfiction and narrative emotions.

Reading the Old Testament John Barton, 1984-01-01 John Barton's revised classic text is intended for students who have already learned some of the techniques of biblical study and who wish to explore the implications and aims of the various critical methods currently in use. Chapters include form criticism, redaction criticism, canonical criticism, structuralism, reader response criticism, and postmodern approaches. Copyright Libri GmbH. All rights reserved.

Narrative Medicine James Phelan, 2022-10-27 Narrative Medicine: A Rhetorical Rx rests on the principles that storytelling is central to medical encounters between caregivers and patients and that narrative competence enhances medical competence. Thus the book's goal is to develop the narrative competence of its reader. Grounded in the rhetorical theory of narrative that Phelan has been constructing over the course of his career, this volume utilizes a three-step method. Offering a jargon-free explication of core concepts of narrative such as character, progression, perspective, time, and space. Demonstrating how to use those concepts to interpret a diverse group of medical narratives, including two graphic memoirs. Pointing to the relevance of those demonstrations for caregiver-patient interactions. Narrative Medicine: A Rhetorical Rx is the ideal volume for undergraduate students interested in pursuing careers in healthcare, students in medical and allied health professional schools, and graduate students in the health humanities and social sciences.

published instruments *The Psychology of Reading* Mildred C. Robeck, Randall R. Wallace, 2017-11-06 The need to know why as well as how children and youth respond as they do to reading instruction has guided the selection of this book's content. The second edition of this title originally published in 1990 has retained and elaborated upon the three major themes previously presented: that reading is a linguistic process; that motivation in the affective domain may be as important in learning to read as the cognitive domain; and that the reality of learning theory is to be found in the mechanisms of the brain where information is mediated and memory traces are stored. The text integrates views from cognitive psychology, psycholinguistics, and neuropsychology as they relate to reading and writing. A learning motivation model is provided to present associative learning, conceptualization, and self-directed reading in a hierarchical relationship with distinct cognitive and affective components. The distinction between beginning and proficient reading is maintained throughout the text. *The Travelling Concepts of Narrative* Mari Hatavara, Lars-Christer Hydén, Matti Hyvärinen, 2013-06-15 Narrative is a pioneer concept in our transdisciplinary age. For decades it has been one of the most successful catchwords in literature, history, cultural studies, philosophy, and health studies. While the expansion of narrative studies has led to significant advances across a number of fields, the travels for the concept itself have been a somewhat more complex. Has the concept of narrative passed intact from literature to sociology, from structuralism to therapeutic practice, or to the study of everyday storytelling? In this volume, philosophers, psychologists, literary theorists, sociolinguists, and sociologists use methodologically challenging test cases to scrutinize the types, transformations, and trajectories of the concept and theory of narrative. The book powerfully argues that narrative concepts are profoundly relevant in the understanding of life experience and literary texts. Nonetheless, it emphasizes the vast contextual differences and contradictions in the use of the concept. **Postethnic Narrative Criticism** Frederick Luis Aldama, 2009-09-15 Magical realism has become almost synonymous with Latin American fiction, but this way of representing the layered and often contradictory reality of the topsy-turvy late capitalist globalizing world finds equally vivid expression in U.S. multiethnic and British postcolonial literature and film. Writers and filmmakers such as Oscar Zeta Acosta, Ana Castillo, Julie Dash, Hanif Kureishi, and Salman Rushdie have made brilliant use of magical realism to articulate the trauma of dislocation and the legacies of colonialism that people of color experience in the postcolonial multiethnic world. This book seeks to redeem and refine the theory of magical realism in U.S. multiethnic and British postcolonial literature and film. Frederick Aldama engages in theoretically sophisticated readings of Ana Castillo's *So Far from God*, Oscar Zeta Acosta's *Autobiography of a Brown Buffalo*, Salman Rushdie's *Midnight's Children*, Shame's *The Satanic Verses*, and The Moor's *Last Sigh*, Julie Dash's *Daughters of the Dust*, and Stephen Frears' and Hanif Kureishi's *Sammy and Rosie Get Laid*. Coining the term *magicorealism* to characterize these works, Aldama not only creates a postethnic critical methodology for enlarging the contact zone between the genres of novel, film, and autobiography but also shatters the interpretive lens that traditionally confuses the transcription of the real world where truth and falsity apply with narrative modes governed by other criteria.

Style and Rhetoric of Short Narrative Fiction Dan Shen, 2013-11-12 In many fictional narratives the progression of the plot exists in tension with a very different and powerful dynamic that runs at a hidden and deeper level throughout the text In this volume Dan Shen systematically investigates how stylistic analysis is indispensable for uncovering this covert progression through rhetorical narrative criticism The book brings to light the covert progressions in works by the American writers Edgar Allan Poe Stephen Crane and Kate Chopin and British writer Katherine Mansfield **Narrative Fiction and Death** Sabine Köllmann, 2023-09-29 Narrative Fiction and Death Dying Imagined offers a new perspective on the study of death in literature It focuses on narrative fiction that conveys the experience of dying from the internal perspective of a dying protagonist Writers from Victor Hugo in the early 1800s to Elif Shafak in the present day have imagined the unknowable final moments on the threshold to death This literary study examines the wide range of narrative strategies used to evoke the transition from life to death and to what effect revealing not only each writer's unique way of representing the dying experience the comparative reading also finds common concerns in these texts and uncovers surprising parallels and unexplored intertextual relations between works across time and space that will interest comparatists as well as specialists in the literatures discussed Students of individual texts examined here will benefit from detailed analyses of these works The fictional evocation of dying addresses our basic human fears offering catharsis consolation and a greater cognitive and emotional understanding of that unknowable experience Presented in an engaging and highly readable manner this study argues for literature's potential to challenge our assumptions about the end of life and change our approach to dying an aspect that will interest students and researchers of the health humanities palliative caregivers and all those interested in questions of the end of life **A Theory of Narrative** Rick Altman, 2008 Narrative is a powerful element of human culture storing and sharing the cherished parts of our personal memories and giving structure to our laws entertainment and history This text presents a wide ranging and wholly original approach to understanding the nature of narrative *The Oxford Handbook of Cognitive Literary Studies* Lisa Zunshine, 2015 The Oxford Handbook of Cognitive Literary Studies applies developments in cognitive science to a wide range of literary texts that span multiple historical periods and numerous national literary traditions Narrative Paul Cobley, 2013-12-04 Human beings have constantly told stories presented events and placed the world into narrative form This activity suggests a very basic way of looking at the world yet this book argues even the most seemingly simple of stories is embedded in a complex network of relations Paul Cobley traces these relations considering the ways in which humans have employed narrative over the centuries to represent time space and identity This second revised and fully updated edition of the successful guidebook to narrative covers a range of narrative forms and their historical development from early oral and literate forms through to contemporary digital media encompassing Hellenic and Hebraic foundations the rise of the novel realist representations narratives of imperialism modernism cinema postmodernism and new technologies A final chapter reviews the way that narrative theory in the last decade has re-orientated definitions of

narrative Written in a clear engaging style and featuring an extensive glossary of terms this is the essential introduction to the history and theory of narrative
