## Lord Kelvin And The Age Of The Earth:

**Lord Kelvin and the Age of the Earth** Joe D. Burchfield, 2009-05-11 Burchfield charts the enormous impact made by Lord Kelvin's application of thermodynamic laws to the question of the earth's age and the heated debate his ideas sparked among British Victorian physicists, astronomers, geologists, and biologists. Anyone interested in geologic time and that should include all geologists and a fair smattering of biologists, physicists, and chemists should make Burchfield's commendable and time-tested volume part of their personal library. **Kelvin, Thermodynamics and the Natural World** M.W. Collins, R.C. Dougal, C. Koenig, I. Ruddock, Strathclyde University, UK, 2015-12-14 This volume looks afresh at the life and works of Lord Kelvin including his standing and relationships with Charles Darwin, T.S. Huxley, and the X club, thereby throwing new light on the nineteenth-century conflict between the British energy and biology specialists. It focuses on two principal issues. Firstly, there is the contribution made by Kelvin to the formulation of the Laws of Thermodynamics, both personal and in the content of the scientific communications exchanged with other workers such as Joule and Clausius. Secondly, there is Kelvin's impact on the wider field of science such as thermoelectricity and geology, determination of the age of the earth. Of late, a number of studies and initiatives including the Centenary celebrations of Kelvin's death and exhibits such as that of the Revolutionary Scientist in the Hunterian Museum, Glasgow, have been undertaken, aiding the redefinition of Kelvin's greatness and achievements. The book also raises awareness to improve our approach to the teaching of elementary thermodynamics by attempting to empathise with Kelvin's perspective. It is completed by a full biography, overviews of various monuments to his memory, and short Stories in Pictures on the Atlantic cable, Maxwell's Demon, the universities associated with the development of thermodynamics, and the Royal Society of Edinburgh. Scientists and engineers with an interest in thermodynamics and anyone interested in the work of Lord Kelvin will find benefit in *Kelvin, Thermodynamics and the Natural World*.

**Useless Arithmetic** Orrin H. Pilkey, Linda Pilkey-Jarvis, 2007 Writing for the general non-mathematician reader and using examples from throughout the environmental sciences, Orrin Pilkey and Linda Pilkey-Jarvis show how unquestioned faith in mathematical models can blind us to the hard data and sound judgment of experienced scientific fieldwork. They begin with the extinction of the North Atlantic cod on the Grand Banks of Canada and then they discuss the limitations of many models across a broad array of crucial environmental subjects. Case studies depict how the seductiveness of quantitative models has led to unmanageable nuclear waste disposal practices, poisoned mining sites, unjustifiable faith in predicted sea level rise rates, bad predictions of future shoreline erosion rates, overoptimistic cost estimates of artificial beaches, and a host of other problems. The authors demonstrate how many modelers

have been reckless employing fudge factors to assure correct answers and caring little if their models actually worked

*The Flamingo's Smile: Reflections in Natural History* Stephen Jay Gould, 2010-11-29 Gould himself is a rare and wonderful animal a member of the endangered species known as the ruby throated polymath He is a leading theorist on large scale patterns in evolution and one of the sharpest and most humane thinkers in the sciences David Quammen New York Times Book Review

**Environmental Risk Assessment** Ted Simon, 2019-12-06 The purpose of risk assessment is to support science based decisions about how to solve complex societal problems Indeed the problems humankind faces in the 21st century have many social political and technical complexities Environmental risk assessment in particular is of increasing importance as health and safety regulations grow and become more complicated Environmental Risk Assessment A Toxicological Approach 2nd Edition looks at various factors relating to exposure and toxicity human health and risk In addition to the original chapters being updated and expanded upon four new chapters discuss current software and platforms that have recently been developed and provide examples of risk characterizations and scenarios Features Introduces the science of risk assessment past present and future Provides environmental sampling data for conducting practice risk assessments Considers how bias and conflict of interest affect science based decisions in the 21st century Includes fully worked examples case studies discussion questions and suggestions for additional reading Discusses new software and computational platforms that have developed since the first edition Aimed at the next generation of risk assessors and students who need to know more about developing conducting and interpreting risk assessments the book delivers a comprehensive view of the field complete with sufficient background to enable readers to probe for themselves the science underlying the key issues in environmental risk

Nuclear Forces Silvan S. Schweber, 2012-06-18 A highly readable account tracing the future Nobel laureate through his formative years and up to the eve of World War II The Wall Street Journal On the fiftieth anniversary of Hiroshima Nobel winning physicist Hans Bethe called on his fellow scientists to stop working on weapons of mass destruction What drove Bethe the head of Theoretical Physics at Los Alamos during the Manhattan Project to renounce the weaponry he had once worked so tirelessly to create That is one of the questions answered by Nuclear Forces a riveting biography of Bethe's early life and development as both a scientist and a man of principle As Silvan Schweber follows Bethe from his childhood in Germany to laboratories in Italy and England and on to Cornell University he shows how these differing environments were reflected in the kind of physics Bethe produced Many of the young quantum physicists in the 1930s including Bethe had Jewish roots and Schweber considers how Liberal Judaism in Germany helps explain their remarkable contributions A portrait emerges of a man whose strategy for staying on top of a deeply hierarchical field was to tackle only those problems he knew he could solve Bethe's emotional maturation was shaped by his father and by two women of Jewish background his overly possessive mother and his wife who would later serve as an ethical touchstone during the turbulent years he spent designing nuclear bombs Situating Bethe in the context of the various communities

where he worked Schweber provides a full picture of prewar developments in physics that changed the modern world and of a scientist shaped by the unprecedented moral dilemmas those developments in turn created Praise for Nuclear Forces Schweber's account of Hans Bethe's life reveals the origins of a charismatic scientist grounded in the importance of his parents and his Jewish roots Schweber recreates the social world that shaped the character of the last of the memorable young scientists who established the field of quantum mechanics Publishers Weekly Nuclear Forces is a carefully researched historically and biographically insightful account of the development of a profession and of one of its leading representatives during a century in which physics and physicists played key roles in scientific cultural political and military developments

David C Cassidy author of A Short History of Physics in the American Century **Darwin's First Theory** Rob

Wesson,2017-04-11 Everybody knows or thinks they know Charles Darwin the father of evolution and the man who altered the way we view our place in the world But what most people do not know is that Darwin was on board the HMS Beagle as a geologist on a mission to examine the land not flora and fauna Tracing Darwin's footsteps in South America and beyond geologist Rob Wesson sets out on a trek across the Andes repeating the nautical surveys made by the Beagle's crew hunting for fossils in Uruguay and Argentina and explores traces of long vanished glaciers in Scotland and Wales By following Darwin's path literally and intellectually Rob experiences the landscape that absorbed Darwin followed his reasoning about what he saw and immerses himself in the same questions about the earth Upon Darwin's return from the five year journey he conceived his theory of tectonics his first theory These concepts and attitudes the vastness of time the enormous cumulative impact of almost imperceptibly slow change change as a constant feature of the environment underlie his subsequent discoveries in evolution And this peculiar way of thinking remains vitally important today as we enter the Anthropocene

Landsberg,2019-04-30 Seeking Ultimates An Intuitive Guide to Physics Second Edition takes us on a journey that explores the limits of our scientific knowledge emphasizing the gaps that are left The book starts with everyday concepts such as temperature and proceeds to energy the Periodic Table and then to more advanced ideas The author examines the nature of ti **Time And Age: Time Machines, Relativity And Fossils** Michael Mark

Woolfson,2015-02-11 Time and Age explores how time is defined by man It follows the development of our means for measuring time from early methods using the flow of water or the steady burning of candles through to the atomic clock that records time with incredible precision The classical idea of time as something that progresses at a uniform rate and as something that is the same to all observers was overturned by Einstein's Theory of Relativity The conclusions coming from this theory are described including the anti intuitive twin paradox where one twin returning from a journey to a distant star is younger than his twin brother Also covered is how age can be determined in a wide range of situations such as how we work out the age of the Universe to how we calculate the age of artefacts that are just a few centuries old *Journal de la Société Royale D'astronomie Du Canada* Royal Astronomical Society of Canada,1907 Library catalogue in 1911 31 p
