Lost In Washington Finding The Way Back To Democracy In America:

Lost in Washington Barry M. Casper, 2000 Part memoir part public policy analysis *Lost in Washington* grew out of the author's experience as senior policy adviser to Senator Paul Wellstone of Minnesota An insider's look at how Washington really works the book traces the history of three major policy initiatives sponsored by Wellstone after his election to the U S Senate in 1990 a proposed national energy strategy campaign finance reform and health care reform All three became the focus of contentious public policy debates and a decade later they remain unresolved issues on the national political agenda According to Barry M Casper the persistent failure of Congress to take action on these matters reflects not simply a lack of legislative accountability but a fundamental breakdown of American democracy Most ordinary citizens today feel excluded from the political process unable to exert any real influence on the issues that most affect their lives One source of this alienation is money more specifically the inordinate influence exercised by well funded special interest groups that finance American election campaigns Another is the concentration of too much congressional power in too few hands To break the legislative deadlock and reinvigorate the democratic process in America Casper proposes broadly based but locally centered political action Pointing to the success of the Clean Money Campaign Reform initiative which has already passed in several states he advocates a strategy of building grassroots organizations state by state until sufficient momentum is gained to compel federal legislation He also proposes a National Citizens Agenda Setting Initiative that would allow organized citizens to force policy proposals onto the congressional agenda With these two additional tools he believes nationwide social movements can much more readily be constructed from the bottom up inviting ordinary citizens in rather than shutting them out thus creating a robust new framework for the practice of democracy in America *The Eagle's Shadow* Mark

Hertsgaard, 2003-09-01 What America looks like to the rest of the world Americans rarely used to think about the outside world As the mightiest nation in history the United States could do as it pleased Now Americans have learned the hard way that what outsiders think matters When terror struck last September 11 author Mark Hertsgaard was completing a trip around the world gathering perceptions about America from people in fifteen countries Whether sophisticated business leaders starry eyed teenagers or Islamic fundamentalists his subjects felt both admiring and uneasy about the United States enchanted yet bewildered appalled yet envious This complex catalogue of impressions good bad but never indifferent is the departure point for a short pointed essay in the tradition of *Common Sense* and *The Fate of the Earth* How can the world's most open society be so proud of its founding ideals yet so inconsistent in applying them So loved for its pop culture but so resented for its high handedness Exploring such paradoxes Hertsgaard exposes uplifting and uncomfortable truths that force natives and outsiders alike to see America with fresh eyes Like it or not America is the future a European tells Hertsgaard In a world growing more American by the day *The Eagle's Shadow* is a major statement about and to the place everyone discusses but few understand **Poor Participation** Thomas A. Bryer, Sofia Prysmakova-Rivera, 2018-02-19 This book

argues that active citizenship and poverty are inextricably linked A common sentiment in discussions of poverty and social policy is that decisions made about those living in poverty or near poverty are illegitimate inadvisable and non responsive to the needs and interests of the poor if the poor themselves are not involved in the decision making process Inside this intuitively appealing idea however are a range of potential contradictions and conflicts These conflicts are at the nexus between active citizenship and technical expertise between promotion of stability in governance and empowerment of people between empowerment that is genuine and sustainable and empowerment that is artificial and between a war on poverty that is built on the ideas of collaborative governance and one that is built on an assumption of rule of the elite The poor have long been consigned to a group of included out citizens They are legally living in a place but they are not afforded the same courtesies entrusted with the same responsibilities or respected in parallel processes as those citizens of greater means and those who behave in manners that are more consistent with middle class values Poor citizens engaged in the war on poverty of the 1960s started to emerge and force their agenda through adversarial action and social protest This book explores the clear linkages between engaged citizenship and poverty in the United States revealing a war on poverty and impoverished citizenship that continues to develop in the twenty first century Powerline Paul David Wellstone,2003 Powerline describes the opposition of rural Minnesotans to the building of a high voltage powerline across 430 miles of farmland from central North Dakota to the Twin Cities suburbs Convinced that the safety of their families and the health of their land was disregarded in favor of the gluttonous energy consumption of cities the farmer led revolt began as questioning and escalated to rampant civil disobedience peaking in 1978 when nearly half of Minnesota s state highway patrol was engaged in stopping sabotage of the project BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

Higher Education beyond Job Creation Thomas A. Bryer,2014-05-27 Higher education in the United States and elsewhere is being forced to respond to several disparate social and economic pressures social trust and connectedness is down empathy across citizens is deteriorating political awareness and participation are low and job prospects and financial security are sobering for many citizens even the college educated The response to these pressures is not to double down on one mission of higher education namely job creation Instead higher education marching into the next decades requires an integrative approach that promotes job creation skill development citizen cultivation and knowledge dissemination all oriented towards strengthening communities and providing opportunity for all citizens to pursue the good life Across eight chapters this book provides historical and theoretical analyses of the role of higher education in society across these four missions as well as applied mini and extended case examples demonstrating how the four missions can be successfully integrated The extended cases consist of one pedagogy example a teaching initiative labeled joined up service learning that represents deep partnership between the university and community and an institutional design case of an academic research center and its work conducted in partnership with community stakeholders Recommendations are advanced for an integrated
