Lost Knowledge Confronting The Threat Of An Aging Workforce:

Lost Knowledge David W. DeLong, 2004-09-09 Executives today recognize that their firms face a wave of retirements over the next decade as the baby boomers hit retirement age. At the other end of the talent pipeline the younger workforce is developing a different set of values and expectations which creates new recruiting and employee retention issues. The evolution from an older traditional highly experienced workforce to a younger more mobile employee base poses significant challenges particularly when considered in the context of the long term orientation towards downsizing and cost cutting. This is a solution oriented book to address one of the most pressing management problems of the coming years. How do organizations transfer the critical expertise and experience of their employees before that knowledge walks out the door? It begins by outlining the broad issues and providing tools for developing a knowledge retention strategy and function. It then goes on to outline best practices for retaining knowledge including knowledge transfer practices using technology to enable knowledge retention, retaining older workers and retirees and outsourcing lost capabilities.

Lost Knowledge David W. De Long, 2004 Addressing one of the most vital management problems of the coming years this book asks how organisations can transfer the stores of knowledge experience from older workers to the next generation. As the workforce ages so this dilemma is becoming more acute.

Aging workforce : what does it mean for businesses and the economy? : hearing , *The Aging Workforce* United States. Congress. Senate. Special Committee on Aging, 2007

Managing the Aging Workforce Marius Leibold, Sven C. Voelpel, 2007-06-27 Managing the Aging Workforce is one of the crucial topics for many of the world's enterprises. The increasing average age of populations does not only affect social systems, countries and communities but also has a strong impact on the work of businesses and companies. The decline in demographic fitness will not only hit countries like the U.S., the Western European countries or Japan but also the upcoming societies in China or in the Eastern European countries. In many of these countries during three or four decades the average age will grow from about 40 years now to about 50 years. Where experts are needed this may result in an increase of the workforce's age of between 5 and 10 years in only one decade. For companies thus a number of challenges arise that have to be overcome fast and continuously. The main topics in this field will be new strategies in leadership, new concepts in health management, new ways in knowledge management and learning as well as new models how to drive ideas for diversity and innovation. On the one hand enterprises therefore will have to invest in their aging employees for supporting their talents, helping them to learn and keeping them in the company. On the other they will have to increase productivity, keep on searching for new products and integrate experts from abroad. This has to be combined with new ways of strategies and HR management. This book presents an analysis of the present and upcoming situation and an introduction into the strategic concepts enterprises will need to survive in aging societies.

Information Diffusion Management and Knowledge Sharing: Breakthroughs in Research and Practice Management Association, Information Resources, 2019-10-11 Within the

past 10 years tremendous innovations have been brought forth in information diffusion and management. Such technologies as social media have transformed the way that information is disseminated and used, making it critical to understand its distribution through these mediums. With the consistent creation and wide availability of information, it has become imperative to remain updated on the latest trends and applications in this field. *Information Diffusion Management and Knowledge Sharing Breakthroughs in Research and Practice* examines the trends, models, challenges, issues, and strategies of information diffusion and management from a global context. Highlighting a range of topics such as influence maximization, information spread control, and social influence, this publication is an ideal reference source for managers, librarians, information systems specialists, professionals, researchers, and administrators seeking current research on the theories and applications of global information management. **Invaluable Knowledge** William J. Rothwell, 2011. As organizations face a loss of people due to retirement, resignation, or disability, leaders are paying more attention to their talent management strategies, from grooming internal successors to aggressively recruiting from their competitors. The need is most acute in technical and other knowledge areas where the loss of a particular skill set demands an equally focused response. *Invaluable Knowledge* clarifies the unique and urgent issues of attracting, developing, retaining, and transferring the knowledge of IT professionals, engineers, accountants, analysts, and other specialists. The book's structure follows a typical talent cycle, from identifying recruitment challenges to hiring and training top talent, to building career development initiatives and finally to laying the groundwork for the next generation. *Invaluable Knowledge* makes an indisputable case for the importance of this specific facet of talent management and offers practical examples, repeatable processes, and a multitude of specific tips to help any organization's talent strategists create seamless transitions and maintain critical knowledge functions indefinitely.

Knowledge Governance And Learning For Organizational Creativity And Transformation Patricia De Sa Freire, Suliman Hawamdeh, Gertrudes Aparecida Dandolini, 2021-08-24. Today, Learning Organizations are shaped by collective knowledge and the existence of teams and groups of people that are continuously developing their capacity and ability to create results. Knowledge-based organizations understand the importance of continually learning at all levels and facilitate learning for their members through empowering people, encouraging collaboration, and promoting open dialogue. Organizational management issues have become strategic and fundamental in the collection and sharing of data and information and are recognized as challenging to both public and private organizations around the world. This has created the need for knowledge governance mechanisms to support Knowledge Management practices in organizations. For this governance, the mechanisms and procedures that encompass Knowledge Management, advancing beyond the traditional Corporate Governance/CorpGov model, have been consolidated into a new governance model described as Knowledge Governance/KGov. Such model considers the processes of the knowledge related to the use, creation, retention, integration, and sharing. In order to implement governance, it is essential to develop competencies and establish corporate policies and

structures focusing on respect for common interests and collective goals In this context mechanisms must be created for the creation sharing storage and transfer of knowledge making changes happen in synergy and adding value to the organization as a whole The book covers the newly emerging area of knowledge governance and Learning Organizations and expands our understanding of Learning Organizations and their ability to acquire create and share knowledge while continually examining organizational behavioral issues affecting their productivity
