Pierre Deransart,Jan Maluszynski,1990-08-08 This volume consists of the papers accepted for presentation at the second international workshop on Programming Language Implementation and Logic Programming PLILP 90 held in Link ping Sweden August 20 22 1990 The aim of the workshop was to identify concepts and techniques used both in implementation of programming languages regardless of the underlying programming paradigm and in logic programming The intention was to bring together researchers working in these fields The volume includes 26 selected papers falling into two categories Papers in the first category present certain ideas from the point of view of a particular class of programming languages or even a particular language The ideas presented seem to be applicable in other classes of languages Papers in the second category directly address the problem of integration of various programming paradigms The proceedings of the predecessor workshop PLILP 88 held in Orl ans France May 16 18 1988 are available as Lecture Notes in Computer Science Vol 348 *Advanced Information Systems Engineering* Rudolf Andersen,Janis Bubenko,1991-04-30 Proceedings *Attribute Grammars and Their Applications* Pierre Deransart,Martin Jourdan,1990-09-07 Proceedings <u>Automatic Verification Methods for Finite State Systems</u> Joseph Sifakis,1990-01-10 This volume contains the proceedings of a workshop held in Grenoble in June 1989 This was the first workshop entirely devoted to the verification of finite state systems The workshop brought together researchers and practitioners interested in the development and use of methods tools and theories for automatic verification of finite state systems The goal at the workshop was to compare verification methods and tools to assist the applications designer The papers in this volume review verification techniques for finite state systems and evaluate their relative advantages The techniques considered cover various specification formalisms such as process algebras automata and logics Most of the papers focus on exploitation of existing results in three application areas hardware design communication protocols and real time systems **Expert Systems in Engineering** Georg Gottlob,Wolfgang Nejdl,1990-09-12 The goal of the International Workshop on Expert Systems in Engineering is to stimulate the flow of information between researchers working on theoretical and applied research topics in this area It puts special emphasis on new technologies relevant to industrial engineering expert systems such as model based diagnosis qualitative reasoning planning and design and to the conditions in which they operate in real time with database support The workshop is especially relevant for engineering environments like CIM computer integrated manufacturing and process automation <u>Concrete and Abstract Voronoi Diagrams</u> Rolf Klein,1989-12-20 The Voronoi diagram of a set of sites is a partition of the plane into regions one to each site such that the region of each site contains all points of the plane that are closer to this site than to the other ones Such partitions are of great importance to computer science and many other fields The challenge is to compute Voronoi diagrams quickly The problem is that their structure depends on the notion of distance and the sort of site In this book the author proposes a unifying approach by introducing abstract Voronoi diagrams These are based on the concept of bisecting curves which are required to have some simple properties that are actually possessed by most bisectors of concrete Voronoi diagrams Abstract

Voronoi diagrams can be computed efficiently and there exists a worst case efficient algorithm of divide and conquer type that applies to all abstract Voronoi diagrams satisfying a certain constraint The author shows that this constraint is fulfilled by the concrete diagrams based on large classes of metrics in the plane   Logic Programming '88 Koichi Furukawa,Hozumi Tanaka,1989-09-06 This volume contains a selection of papers presented at the Seventh Logic Programming Conference that took place in Tokyo April 11 14 1988 It is the successor to the previous conference proceedings published as Lecture Notes in Computer Science Volumes 221 264 and 315 The book covers various aspects of logic programming such as foundations programming languages systems concurrent programming knowledge bases applications of computer aided reasoning and natural language processing The papers on foundations present theoretical results on narrowing a proof strategy for proving properties of Prolog programs based on inductionless induction and several issues in nonmonotonic reasoning Of special interest to mathematicians is the paper on computer aided reasoning which describes a system for assisting human reasoning Natural language application papers treat the lexical analysis of Japanese sentences a system that generates a summary of a given sentence and a new knowledge representation formalism suited for representing dynamic behavior by extending the frame system   **Analogical and Inductive Inference** Klaus P. covered through 12 invited talks presented by pro nent researchers There were 18 contributed talks selected by the international Program Committee from among 46 submitted papers The conference was also accompanied by workshops on Electronic Commerce Systems coordinated by H D Zimmermann and Soft Computing coordinated by P H ajek *Advances in Petri Nets 1990* Grzegorz Rozenberg,1991-03-13 The main idea behind the series of volumes Advances in Petri Nets is to present to the general computer science community recent results which are the most representative and significant for the development of the area The papers for the volumes are drawn mainly from the annual International Conferences on Applications and Theory of Petri Nets Selected papers from the latest conference are independently refereed and revised and extended as necessary Some further papers submitted directly to the editor are included Advances in Petri Nets 1990 covers the Tenth International Conference on Applications and Theory of Petri Nets held in Bonn Germany in June 1989 Additional highlights of this volume include a tutorial on refinements of Petri nets by W Brauer R Gold and W Vogler and a tutorial on analysis and synthesis of free choice systems by J Esparza and M Silva both prepared in the framework of the ESPRIT Basic Research Actions Project DEMON **Compiler Compilers** Dieter Hammer,1991-02-12 Advances and problems in the field of compiler compilers are considered in this volume which presents the proceedings of the third in a series of biannual workshops on compiler compilers Selected papers address the topics of requirements properties and theoretical aspects of compiler compilers as well as tools and metatools for software engineering The 23 papers cover a wide spectrum in the field of compiler compilers ranging from overviews of new compiler compilers for generating quality compilers to special problems of code generation and optimization Aspects of compilers for parallel systems and knowledge based development tools are also discussed Meta-Level Control for Deductive Database Systems Helmut Schmidt,1991 The development of database technology has currently reached the stage of deductive database systems which use Horn clauses for defining relations An important characteristic of these systems is the clear separation of logic and control However the programmer cannot affect the control part of a deductive database system To eliminate this deficiency this monograph presents a so called expert deductive database system that allows explicit control of the deduction process The system consists of an object level describing the logical aspects of a problem and of a meta level that contains application specific control information affecting the object level deduction process For example object level rules can be disregarded and some tuples deduced at the object level can be preferred to others Besides the architecture of this system the book also identifies some important possibilities of deduction control which are explained by characteristic examples
