H. Louie, 2013-04-17 A H Louie's The Reflection of Life Functional Entailment and Imminence in Relational Biology is a continuation of the exploratory journey in relational biology which began with his 2009 monograph More Than Life Itself A Synthetic Continuation in Relational Biology The theme of his first book was What is life the theme of this sequel is How do two life forms interact Biology is a subject concerned with organization of relations Relational biology is the approach that advocates function dictates structure rather than structure implies function It is mathematics decoded into biological realizations The book demonstrates some of the powers of the approach of relational biology and illustrates how pertinent problems in biology can be better addressed this way In the first volume the theory was developed by using partially ordered sets lattices simulations models Aristotle's four causes graphs categories simple and complex systems anticipatory systems and metabolism repair M R systems Here in the second volume these tools are expanded to employ set valued mappings adjacency matrices random graphs and interacting entailment networks The theory of set valued mappings culminates in the imminence mapping which equips the further investigation of functional entailment in complex relational networks Imminence in M R networks that model living systems addresses the topics of biogenesis and natural selection Interacting M R networks with mutually entailing processes serve as models in the study of symbiosis and pathophysiology The formalism also provides a natural framework for a relational theory of virology and oncology This book will serve researchers and graduate students in mathematics and biology Geographical Thought Lalita Rana, 2014-01-01 Geographical thought at any point in time is a manifestation of the prevailing viewpoints and methodological approaches in vogue The development of geography has a history of evolution of over 2000 years The discipline has been crafted over time to incorporate ideas from various schools of thought and several other disciplines from ancient to modern times The existing methodology and the subject matter of Geography is a reflection of this assemblage and evolution The nature of development remained more philosophical up to modern period The First edition of this book published in 2008 was an attempt towards compilation of

relevant study material on evolution of Geographic thought in a systematic way up to the modern period The book has been revised with the addition of two elaborated sections i e one each on the Classical and the Contemporary tradition in geography However the major thrust of present book is on the nature of geographic developments in its contemporary phase More recently the anthropocentricism and a concern about methodology are more evident in the development of discipline
