Operational Research and the Social Sciences S.A. Cropper,Michael C. Jackson,Paul Keys,2012-12-06 Twenty five years ago in 1964 The Operational Research Society s first International Conference held at Gonville and Caius College Cambridge took as its theme Operational Research and the Social Sciences The Conference sessions were organised around topics such as Organisations and Control Social Effects of Policies Conflict Resolution The Systems Concept Models Decisions and Operational Research An examination of the published proceedings J R Lawrence ed 1966 Operational Research and the Social Sciences Tavistock London reveals a distinct contrast between the types of contribution made by the representatives of the two academic

communities involved Nevertheless the Conference served to break down some barriers largely of ignorance about the objects methods and findings of each concern In the ensuing twenty five years although debate has continued about the relationship between OR and the social sciences mutual understanding has proved more difficult to achieve than many must have hoped for in 1964 *Scholars' Guide to Humanities and Social Sciences in the Soviet Union and the Baltic States* Tigran Martirosyan, Silvia Maretti, S. Frederick Starr, 2019-11-21 In the years since the first edition of the Guide was published the research institutions of the academies of sciences of the USSR and the republics have undergone several sometimes radical reorganizations and reaffiliations This guide to academy institutions supplies names addresses and historical research and organizational profiles for each institution with summary information on staffing current projects special facilities and libraries The end of the Cold War has brought with it many changes of attitude and policy in the political arena however nowhere has change been so emotionally charged as in the area of politically based emigration Refugee policy is the driving force behind many of today's headlines influencing both foreign and domestic policy In *Desperate Crossings* authors Norman L and Naomi Flink Zucker chronicle and analyze the phenomenon of mass escape that began with the Haitians but exploded into the American consciousness in the spring of 1980 with the Mariel boatlift and the subsequent mass exodus from Central America and was most recently manifested in the Haitian and Cuban exoduses of 1994 In a compelling and carefully documented narrative they identify the troika of interests foreign policy domestic pressures and costs that have controlled and determined the American response to refugees since before the Second World War continuing until today *Desperate Crossings* concludes by proposing a comprehensive and politically palatable approach to future refugee flows both in our hemisphere and for the world community at large including Europe and Asia The authors suggest how by changing the course of its refugee policies and programs the United States can better respond to both the needs of refugees and the demands of its citizens *The Handbook of Rational and Social Choice* Paul Anand, Prasanta Pattanaik, Clemens Puppe, 2009-01-15 The Handbook of Rational and Social Choice provides an overview of issues arising in work on the foundations of decision theory and social choice over the past three decades Drawing on work by economic theorists mainly but also with contributions from political science philosophy and psychology the collection shows how the related areas of decision theory and social choice have developed in their applications and moved well beyond the basic models of expected utility and utilitarian approaches to welfare economics Containing twenty three contributions in many cases by leading figures in their fields the handbook shows how the normative foundations of economics have changed dramatically as more general and explicit models of utility and group choice have been developed This is perhaps the first time these developments have been brought together in a manner that seeks to identify and make accessible the recent themes and developments that have been of particular interest to researchers in recent years The collection will be of particular value to researchers in economics with interests in utility or welfare but it will also be of interest to any social scientist or philosopher interested in

theories of rationality or group decision making
