Mathematics All Around Thomas L. Pirnot, 2001 Problem solving principles and strategies are introduced in chapter one and are used consistently throughout the text. Of Further Interest sections appear at the end of the chapter and cover current topics that are exciting for students but are not typically part of the standard curriculum. Statement Headings provide the students with a clear idea of the concept being discussed and are useful when reviewing for exams. Applications motivate the discussion of the mathematics and increase student interest in the material. Quiz Yourself questions are found throughout each section and allow students to gauge their level of understanding before moving on to the next concept. Some Good Advice is a feature that provides students with timely hints, tips, cautions, and warnings about the material being covered. Highlights are boxed features that consist of historical notes or biographical vignettes, uses of technology, and interesting applications.

Probability Eric T. Olson, 1998 Covers key middle school and high school topics in the context of everyday life scenarios. Makes data collection and description outcomes, probability tree diagrams, multiplying probabilities, and odds fun and understandable.
