The Reviews of State Content Standards in English Language Arts and Mathematics Douglas A. Archbald, 1998 This report compares and contrasts the evaluation methods and findings of the American Federation of Teachers AFT Council for Basic Education CBE and the Fordham Foundation reviews of state English language arts and mathematics content standards It states that the reviews found that state content standards vary greatly in how they are organized in the levels of detail and specificity of their content prescriptions and in the clarity of their expression According to the report although a number of the states standards were found to be of exemplary quality and could be used as models an unacceptably large number of state content standards were judged to be of inadequate quality The report cites the average ratings on the 0 to 4 scale given by each rating group for English language arts and for mathematics It finds considerable discrepancy in the reviewers ranking of the states there was considerable disagreement among the reviewers about which states had high quality and which states had low quality content standards The report states that the reviewers used different criteria defining the qualities they used for evaluation and applying their evaluation criteria differently The report concludes by discussing ways research and policy initiatives could improve the quality of state content standards Contains 18 references 11 notes and 3 tables of data NKA Mathematics Explorations David Spangler, 2011 What are your chances of winning the lottery How much interest will you end up paying on that credit card purchase Thought provoking real world math problems and some humorous ones too require inductive and deductive reasoning as students search for a pattern break a code uncover and correct errors or use clues to solve a mystery Teacher pages set up full instructions for 27 activities driven by reproducible student handouts and correlated to NCTM standards A workbook containing all the handouts allows teachers to conveniently collect a students work Grades 6-9 Bibliography Answer keys with full solutions Good Year Books 199 pages Second Edition *Core Curriculum Content Standards* Ellen M.
