Mathematics Exploring Your World Exploring Your Multicultural World Mathematical Projects:

Mathematics, Exploring Your World Herbert Ginsburg, Silver Burdett & Ginn (Firm), 1992 **Guide to Math Materials** Phyllis J. Perry, 1997-02-15 Now it's easy to locate the materials you need to implement the new NCTM math standards. Organized by such math topics as problem solving, estimation, number sense and numeration, and geometry and spatial relationships, this book shows users where to find manipulatives and materials such as attribute blocks, pattern blocks, clocks, scales, multilink cubes, and prisms, calculators, and sorting toys. It also lists specialized math books, computer software, and a host of other learning materials, e.g., activity cards, puzzles, posters, games, reproducibles. The author briefly describes each product, cites grade level when given, and explains possible applications. Products of exceptional quality and value are highlighted, and the addresses of publishers and suppliers are given. A real time saver. Grades K-4 *Upper Elementary Mathematics Lessons to Explore, Understand, and Respond to Social Injustice* Tonya Gau Bartell, Cathery Yeh, Mathew D. Felton-Koestler, Robert Q. Berry III, 2022-07-20 A very compelling set of fresh ideas are offered that prepare educators to turn the corner on advocating for social justice in the mathematics classroom. Each book is full of engaging activities, frameworks, and standards that center instruction on community worldview and the developmental needs of all students, a must-needed resource to reboot our commitment to the next generation. Linda M. Fulmore, TODOS Mathematics For ALL, Cave Creek, AZ Empower students to be the change, join the teaching mathematics for social justice movement. We live in an era in which students of all ages have, through media and their lived experiences, a more visceral experience of social injustices. However, when people think of social justice, mathematics rarely comes to mind. With a teacher-friendly design, this book brings upper elementary mathematics content to life by connecting it to student curiosity, empathy, and issues students see or experience. Tested in Grades 3-5 classrooms, the model lessons in this book walk teachers through the process of applying critical frameworks to instruction using standards-based mathematics to explore, understand, and respond to social justice issues. Learn to plan instruction that engages students in mathematics explorations through age-appropriate, culturally relevant topics such as valuing differences, health, and pay inequality, bullying, voting rights, and environmental justice. Features include: Content cross-referenced by mathematical concept and social issues; Connection to Learning for Justice's social justice standards; Downloadable instructional materials and lesson resources; Guidance for lessons driven by students' unique passions and challenges; Connections between research and practice. Written for teachers committed to developing equitable and just practices through the lens of mathematics content and practice standards, as well as social justice standards, this book will help connect content to students' daily lives, fortify their mathematical understanding, and expose them to issues that will support them in becoming active citizens and leaders. *Explore the World* Denise Bieniek, 1996 *Multicultural and Gender Equity in the Mathematics Classroom* Janet Trentacosta, Margaret J. Kenney, 1997 This 1997 yearbook presents a vision of how research and classroom practices related to multicultural diversity and gender equity can reinforce each other.

to ensure a powerful mathematics program for all students regardless of their gender race ethnicity or socioeconomic status This book contains a variety of perspectives and diverse voices that address relevant issues and suggest possible models that exemplify the vision The yearbook is organized in five parts 1 Issues and Perspectives 2 Classroom Cultures 3 Curriculum Instruction and Assessment 4 Professional Development and 5 Future Directions The first section contains five papers that address topics such as the inclusion of blacks in the mathematics community and lessons from multicultural classrooms in Australia The second section contains seven papers addressing topics such as ethnomathematics bias in the classroom and gender equitable classrooms Nine papers on a variety of equity issues including integrating culture into the mathematics classroom and assessment are presented in next section and five papers that cover family involvement and communication strategies are included in the fourth section The book concludes with two papers that discuss perspectives on the future direction of equity efforts in mathematics education

Science for Girls Susan Gibbs

Goetz,2007 Science for Girls Successful Classroom Strategies looks at how girls learn beginning with the time they are born through both the informal and formal education process In the author s current role as professor of science education Dr Goetz has surveyed hundreds of female elementary education majors in their junior and senior year of college The results of her study show that the majority of the future teachers do not feel confident teaching science at the elementary level feel ill prepared to teach science in general and have had negative experiences during their elementary middle and high school years in science classes Dr Goetz raises the question of whether or not there is a cycle of poor science instruction during the early years delivered by poorly prepared teachers who themselves had poor instruction from poorly prepared teachers In order to break this cycle it is necessary to better prepare our future female teachers who will then model excitement enthusiasm and expertise in science instruction Perhaps then we ll begin to see our girls show increased interest and achievement in the sciences While the focus of Science for Girls is on science education information about current research in the area of female learning styles in general is also presented Furthermore the author is careful to point out that the strategies suggested will not only benefit female students but also their male counterparts Containing current research lesson plans and learning strategies and resources in science education this book will be of benefit for classroom teachers
