Mathematics in Everyday Life The hidden Language of the World is a textbook for Undergraduate and Post Graduate students to develop problem solving skills with the advent of logical thinking. Here the authors' objective is how mathematics will be useful in the fields we come across in Science, Economics, Engineering, and Technology by keeping the syllabi of various prestigious universities. The major subfields it covers: Mathematical modeling, model theory, proof theory, set theory, recursion theory, Financial Mathematics, Statistics, and probability in decision making, Mathematics in Technology and Communication Engineering, etc. It is also useful in Cryptography and Encryption, Algorithm and coding development. Here the authors were focused on mathematical theory which is a mathematical model of a branch of mathematics that is based on a set of axioms and they emphasized it can also concurrently be a body of knowledge. This textbook has been written with great effort made by referring text books written on the modern trend of Applicable Mathematics. The topics covered in this book are practical for a scholar who starts learning education in Economics, Sciences, Technology, Engineering fields. The mathematical concepts are written from the basic level to reach out to a wide range of student fraternities and teachers in every walk of life, more particularly in industrial related challenging problems.
