Nicolaas Kuiper Honorary Professor at the Institut des Hautes études Scientifiques **The Construction of New Mathematical Knowledge in Classroom Interaction** Heinz Steinbring, 2006-03-30 Mathematics is generally considered as the only science where knowledge is uniform universal and free from contradictions Mathematics is a social product a net of norms as Wittgenstein writes In contrast to other institutions traffic rules legal systems or table manners which are often internally contradictory and are hardly ever unrestrictedly accepted mathematics is distinguished by coherence and consensus Although mathematics is presumably the discipline which is the most differentiated internally the corpus of mathematical knowledge constitutes a coherent whole The consistency of mathematics cannot be proved yet so far no contradictions were found that would question the uniformity of mathematics Heintz 2000 p 11 The coherence of mathematical knowledge is closely related to the kind of professional communication that research mathematicians hold about mathematical knowledge In an extensive study Bettina Heintz Heintz 2000 proposed that the historical development of formal mathematical proof was in fact a means of establishing a communicable code of conduct which helped mathematicians make themselves understood in relation to the truth of mathematical statements in a coordinated and unequivocal way **Concept-Based Mathematics** Jennifer T.H. Wathall, 2016-01-14 Give math students the connections between what they learn and how they do math and suddenly math makes sense If your secondary school students are fearful of or frustrated by math it's time for a new approach When you teach concepts rather than rote processes you help students discover their own natural mathematical abilities This book is a road map to retooling how you teach math in a deep clear and meaningful way to help students achieve higher order thinking skills Jennifer Wathall shows you how to plan units engage students assess understanding incorporate technology and there's even a companion website with additional resources
