Committee on Post Office and Civil Service. Subcommittee on Census and Population, 1994 Mathematics Curriculum in Pacific Rim Countries - China, Japan, Korea, and Singapore Zalman Usiskin, Edwin Willmore, 2008-09-01 This volume contains the proceedings of the First International Curriculum Conference sponsored by the Center for the Study of Mathematics Curriculum CSMC The CSMC is one of the National Science Foundation Centers for Learning and Teaching Award No ESI 0333879 The countries China Japan Korea and Singapore in alphabetical order which also happens to be the order of their populations have each been in the news because of their performance on international tests and or their economic performance and potential They also have centralized education ministries that create a single mathematics curriculum framework followed in the entire country In all these countries curricula are differentiated for students with different interests usually around Grade 10 or 11 We think the reader will agree that the papers are of very high quality befitting the standing of the individuals who were invited but particularly notable for our international speakers because in three of these countries English is not the speaker's first language Following each paper we have included a short biography of the author so that the reader can understand the perspective of the paper's author **Instructor**, 1978 *Elementary Mathematics Curriculum Materials* Janine T. Remillard, Ok-Kyeong Kim, 2020-03-16 The book presents comparative analyses of five elementary mathematics curriculum programs used in the U S from three different perspectives the mathematical emphasis the pedagogical approaches and how authors communicate with teachers These perspectives comprise a framework for examining what curriculum materials are comprised of what is involved in reading and interpreting them and how curriculum authors can and do support teachers in this process Although the focus of the analysis is 5 programs used at a particular point in time this framework extends beyond these specific programs and illuminates the complexity of curriculum materials and their role in teaching in general Our analysis of the mathematical emphasis considers how the mathematics content is presented in each program in terms of sequencing the nature of mathematical tasks cognitive demand and ongoing practice and the way representations are used Our analysis of the pedagogical approach examines explicit and implicit messages about how students should interact with mathematics one another the teacher and the textbook around these mathematical ideas as well as the role of the teacher In order to examine how curriculum authors support teachers we analyze how they communicate with teachers and what they communicate about including the underlying mathematics noticing student thinking and rationale for design elements The volume includes a chapter on curriculum design decisions based on interviews with curriculum authors *Everyday Mathematics*, 2004 Contains easy to follow three part daily lesson plans This assists teachers in focusing on lesson objectives providing ongoing practice for all students and addressing individual student needs for a variety of populations A unit organizer provides learning goals planning and assessment support content highlights a materials chart suggestions for problem solving cross curricular links and options for individualizing Each guide is grade level specific
