Although written primarily for mathematics educators, this handbook will also be of interest to researchers of the history of education in general as well as specialists in cultural and even social history. *ENC Focus*, 1994. Guide to Math Materials. Phyllis J. Perry, 1997-02-15. Now it's easy to locate the materials you need to implement the new NCTM math standards. Organized by such math topics as problem solving, estimation, number sense and numeration, and geometry and spatial relationships, this book shows users where to find manipulatives and materials such as attribute blocks, pattern blocks, clocks, scales, multilink cubes, and prisms, calculators, and sorting toys. It also lists specialized math books, computer software, and a host of other learning materials, e.g., activity cards, puzzles, posters, games, reproducibles. The author briefly describes each product, cites grade level when given, and explains possible applications. Products of exceptional quality and value are highlighted, and the addresses of publishers and suppliers are given. A real time saver. Grades K-4. *Mathematics Assessment and Evaluation*. Thomas A. Romberg, 1992-07-01. Are current testing practices consistent with the goals of the reform movement in school mathematics? If not, what are the alternatives? How can authentic performance in mathematics be assessed? These and similar questions about tests and their uses have forced those advocating change to examine the way in which mathematical performance data is gathered and used in American schools. This book provides recent views on the issues surrounding mathematics tests, such as the need for valid performance data, the implications of the Curriculum and Evaluation Standards for School Mathematics for test development, the identification of valid items and tests in terms of the Standards, the procedures now being used to construct a sample of state assessment tests, gender differences in test taking, and methods of reporting student achievement. **Mathematics & Science in the Real World**, 2000.
