Abraham's Dice Karl Giberson, 2016 Most of us believe everything happens for a reason Whether it is God s will karma or fate we want to believe that nothing in the world especially disasters and tragedies is a random meaningless event But now as never before confident scientific assertions that the world embodies a profound contingency are challenging theological claims that God acts providentially in the world The random and meandering path of evolution is widely used as an argument that God did not create life Abraham s Dice explores the interplay between chance and providence in the monotheistic religious traditions looking at how their interaction has been conceptualized as our understanding of the workings of nature has changed This lively historical conversation has generated intense ongoing theological debates and provocative responses from science what are we to make of the history of our universe where chance and law have played out in complex ways Or the evolution of life where random mutations have challenged attempts to find purpose within evolution and convinced many that human beings are but a glorious accident The enduring belief that everything happens for a reason is examined through a conversation with major scholars among them holders of prestigious chairs at Oxford and Cambridge Universities and the University of Basel as well as several Gifford lecturers and two Templeton prize winners Organized historically Abraham s Dice provides a wide ranging scientific theological and biblical foundation to address the question of providence and divine action in a world shot through with contingency

Critical Race Theory and the Struggle at the Heart of Legal Education Paul Zwier, 2023-09-21 This book is an examination of the reception of critical race theory CRT in America s legal education system Critical race theory has been roiling legal education since the aftermath of Obama s presidency The killings of unarmed Black people fueled Black Lives Matter BLM protests in law schools which created a sense of urgency behind the plea for the law to do more to stop the killings of unarmed Black people Some BLM led protests called for faculty and administrators to be fired if they didn t act There has been an upsurge of states legislating against the teaching of CRT and law schools are struggling to respond How should legal education view CRT What are the neutral unifying values in the law that offer hope in the fight to alleviate the wave of racism that seems to continually batter law schools and society as a whole This book looks for answers and encourages the

God's Providence and Randomness in Nature Robert John Russell, Joshua M. Moritz, 2019-02-11 In October 2014 a group of mathematicians physicists ecologists philosophers and theologians gathered at a special conference in Berkeley California to present the results of a two year research program dubbed Project SATURN This program explored many rich avenues of thought at the intersection of modern science and Christian theology Chief among them is the possibility that specific processes might be so complex that they do not have sufficient physical causes Known as ontological indeterminism this idea has profound implications for theology Specifically it allows God to be thought of as acting providentially within nature without violating the laws and processes of nature Such a momentous insight could influence how we understand free will natural evil suffering in nature and the relation between divine providence and human evolution The essays collected here discussed these topics and were initially presented at the 2014 conference Part I establishes the scientific basis for conceptualizing specific processes in the universe as inherently random and possibly indeterministic Part II discusses the philosophical and theological issues that spring from this understanding Together they represent the cutting edge of thought in the increasingly productive dialogue between science and theology Short for the Scientific and Theological Understandings of Randomness in Nature Project SATURN was created by the Center for Theology and the Natural Sciences a Program of the Graduate Theological Union Berkeley It was funded with a grant administered by Calvin College and provided by the John Templeton Foundation
