Haslam, Myint Swe Khine, 2016-08-18 Much has been written of late about the need to reform school systems across the world In like manner there have been many attempts to change school systems for the better but without a great deal of success This in part has much to do with the inertia in school systems and the nature of the work The professional isolation of teachers from one another in schools is no excuse but it is a key factor in the development of system wide professional capital This book explores the importance of school leadership and the use of digital media to develop social capital in schools Particular examples of school reforms that focused on developing professional capital with varying degrees of success are to be seen in the UAE in reforms to the Australian middle school and in attempts to reform the Community College in the USA Throughout the book there are three powerful ideas associated with successful large scale reforms First there are the structural elements that all successful school systems have in common including revised curriculum standards a reliable assessment system technical skills of teachers and school leaders a comprehensive data system rewards and remuneration of workforce and policy documents to support change Second strategic imperatives such as the singular focus on teaching and learning for student success the need to build workforce capacity in schools the need to ensure system wide implementation of reforms and the importance of collaboration and team building Third the systematic development of professional learning communities and teacher leadership will increase social capital in schools which will ensure student success This book looks at overcoming the inertia to school reform in education systems caused by structural deficiencies strategic shortfalls and implementation procedures Primary Science Education Anne Forbes, 2023-06-15 Primary Science Education A Teacher s Toolkit is an accessible guide to primary science education and its effective practice in classrooms *Summing Up* John Ainley, Brian Doig, 2001 This publication sets out to clarify what has been meant by numeracy in the past as well as more recently in order to better understand how numeracy teaching and learning can be improved in Australian classrooms Defining numeracy inevitably assists understanding of what kinds of research may improve numeracy teaching and learning Mathematical Modelling: From Theory To Practice Ngan Hoe Lee, Kit Ee Dawn Ng, 2015-01-19 This book documents the journey undertaken by educators from the Mathematics and Mathematics Education MME Academic Group in the National Institute of Education NIE and Singapore schools during a Mathematical Modelling Outreach MMO event in June 2010 under the guidance of renowned experts in the field of mathematical modelling The main goal of MMO was to reach out to Singapore primary and secondary schools and introduce the potentials of mathematical modelling as a platform for eliciting mathematical thinking communication and reasoning among students This book contributes to the expanding literature on mathematical modelling by offering voices from the Singaporean context It suggests how theoretical perspectives on mathematical modelling can be transformed into actual practice in schools all within the existing infrastructure of the

current Singapore mathematics curriculum More importantly the book provides documentary evidence on how plans put in place through MMO in 2010 have since been realised The publication of this book is hence timely at this juncture Not only does the book record how MMO was among the first pebbles launched into the pond it also serves as a bridge over which educators can stand upon to view how the ripple effect had developed from the initial MMO pebble and the directions it may continue to extend Perhaps in the process other ripples in the teaching learning and research of mathematical modelling can be created
