**Early Learning through Play** Kristin Grabarek, Mary R. Lanni, 2019-03-13. This creative guidebook teaches librarians in diverse communities how to develop and implement early learning programming beyond traditional storytimes. While traditional library storytimes are excellent tools for families, equally important is play. Children learn through play in many ways; it stimulates exploration and curiosity and builds gross and fine motor skills that are critical to reading and writing success. Perhaps most importantly, play has the power to cross barriers of culture and language, allowing families from differing backgrounds to learn together. In this book, Kristin Grabarek and Mary R. Lanni, the pioneers of Little University, an early learning program that focuses on play-based learning, share their experiences and provide guidance for implementing similar programs at libraries of various sizes and budgets. They teach readers how to create programs for a diverse group of families, work with outside providers, choose supplies, estimate costs, market your programming, and overcome the challenges of both big and small budgets, and many or

few patrons These practical plans will enhance storytimes and even help build a brand new early learning program **The Mathematical Gazette** ,1989 Mathematics Through Play in the Early Years Kate Tucker,2010-03-18 Teaching mathematics to young children in creative ways is made easy with this second edition of a wonderful book which offers the reader clear advice and lots of exciting ideas to use in any early years setting By showing how to introduce mathematical concepts through play based activities this book is in tune with current thinking about best practice in teaching and with the requirements of the Early Years Foundation Stage and current Primary National Strategy New material includes an additional chapter on creative recording a whole new chapter on ways to involve parents discussion of policy throughout the UK more on using ICT case studies covering the whole birth to eight age range Essential reading for any practitioner who wants to develop their mathematics teaching this book is equally important for all trainee teachers and early years students Kate Tucker is an early years teacher trainer and writer based in Exeter she has over 20 years of experience and has written widely on early years mathematics and Foundation Stage practice *Exploring Mathematics Through Play in the Early Childhood Classroom* Amy Noelle Parks,2015-04-28 This practical book provides pre and inservice teachers with an understanding of how math can be learned through play The author helps teachers to recognize the mathematical learning that occurs during play to develop strategies for mathematizing that play and to design formal lessons that make connections between mathematics and play Common Core State Standards are addressed throughout the text to demonstrate the ways in which play is critical to standards based mathematics teaching and to help teachers become more familiar with these standards Classroom examples illustrate that unlike most formal tasks play offers children opportunities to solve nonroutine problems and to demonstrate a variety of mathematical ways of thinking such as perseverance and attention to precision This book will help put play back into the early childhood classroom where it belongs Book Features Makes explicit connections to play and the Common Core State Standards in Mathematics Offers many examples of free play activities in which mathematics can be highlighted as well as formal lessons that are inspired by play Provides strategies for making assessments more playful helping teachers meet increasing demands for assessment data while also reducing child stress Includes highlight boxes with recommended resources questions for reflection key research findings vocabulary lesson plan templates and more This is one of those books that I wish I had written It is smart readable relevant and authentically focused on children From the Foreword by Elizabeth Graue Sorenson Professor of Early Childhood Education University of Wisconsin In this deceptively easy to read book Amy Parks explains two things that could make a world of difference in early childhood and elementary classrooms Mathematics isn t something in a workbook it s a fascinating part of the real world And playing in school isn t a luxury it s an essential context for learning about all sorts of things including mathematics Through vignettes of children learning mathematics as they play Parks helps teachers recognize their answerability to the moment eschewing someone else s determination of best practice in favor of what works with actual children eager to learn
