**Frontiers and Advances in Molecular Spectroscopy** Jaan Laane, 2017-11-13 Frontiers and Advances in Molecular Spectroscopy once again brings together the most eminent scientists from around the world to describe their work at the cutting edge of molecular spectroscopy Much of what we know about atoms molecules and the nature of matter has been obtained using spectroscopy over the last one hundred years or so Going far beyond the topics discussed in Jaan Laane's earlier book on the subject these chapters describe new methodologies and applications instrumental developments and theory which are taking spectroscopy into still new frontiers The robust range of topics once again demonstrates the wide utility of spectroscopic techniques New topics include ultrafast spectroscopy of the transition state SERS far uv spectroscopy femtosecond coherent anti Stokes Raman spectroscopy high resolution laser induced fluorescence spectroscopy Raman spectroscopy and biosensors vibrational optical activity ultrafast two dimensional spectroscopy biology with x ray lasers isomerization dynamics and hydrogen bonding single molecule imaging spectra of intermediates matrix isolation spectroscopy and more Covers spectroscopic investigations on the cutting edge of science Written and edited by leading experts in their respective fields Allows researchers to access a broad range of essential modern spectroscopy content from a single source rather than wading through hundreds of scattered journal articles      **Molecular Ions** Joseph Berkowitz, Karl-Ontjes E. Groeneveld, 2012-12-06 The present volume contains contributions presented at the NATO Advanced Study Institute on Molecular Ions held on the island of Kos Greece from September 30 to October 10 1980 The meeting was attended by some 60 participants from 15 different countries It was the first meeting devoted exclusively to the

topic of molecular ions Its vitality derived from bringing together experts and students from a wide variety of disciplines whose studies bear upon the structure of molecular ions The aim of the meeting was to assemble these scientists representing many countries in Europe and North America to discuss the advances and capabilities of the various experimental and theoretical approaches and to point out unsolved problems and directions for future research The format involving lecturers and students served as a tutorial Molecular ions play an important role in very diverse fields of nature such as reactions in the ionosphere the processes of formation of molecules in dense interstellar clouds and the magnetohydrodynamics of plasmas used for energy generation Our understanding of the properties of molecular ions their electronic and geometric structures has been developing from a variety of sources as far removed as tickling ions with radiofrequency radiation and smashing them apart at relativistic energies Various laser techniques are described and the queen of structural determination spectroscopy is well represented On the instrumental side older techniques have been perfected and new methods have evolved

**Low-Temperature Chemistry of the Atmosphere** Geert K. Moortgat, Austin J. Barnes, Georges Le Bras, John R. Sodeau, 2013-06-29 Presented here are authoritative and up to date assessments of the homogenous and heterogenous chemical and physical processes occurring in the troposphere and stratosphere especially during the ozone hole event The book begins with an overview of atmospheric chemistry followed by reviews of relevant homogenous reactions in the gas phase and the microphysics and physical chemistry of heterogenous processes that occur on or in aerosols rain and ice Low temperature laboratory studies are compared with related fieldwork measurements particularly in relation to the formation and composition of polar stratospheric clouds Also discussed are measurements in glacial ice Finally chemical modelling of the troposphere and stratosphere including heterogenous processes is reviewed

*Matrix-isolation Techniques* Ian R. Dunkin, 1998 Matrix isolation is a technique for trapping reactive species at very low temperatures and studying them spectroscopically This book offers detailed practical advice on how to carry out matrix isolation experiments and is a unique introduction to the subject Chapter 1 introduces a brief historical survey of the development of the technique that incorporates a discussion of its strength and limitations Chapter 2 provides a thorough description of the building of a matrix isolation laboratory from scratch All the necessary equipment is described in full and there are diagrammatic examples throughout In later chapters ancillary equipment for generating reactive species and an informative description of the various methods for forming low temperature matrices are dealt with There then follows a chapter on the specialized technique of matrix photochemistry with polarized light The final chapter comprises an extensive collection of classic matrix experiments which have been selected due to their ease of application and which will thus serve as useful exercises for testing new pieces of equipment This accessible text offers thorough coverage of the topic and will be invaluable to postgraduate and industrial chemists as an introduction to matrix

isolation techniques Researchers in chemistry and related fields who are considering whether matrix isolation can play a part in their own research will also find this book useful      Air Monitoring by Spectroscopic Techniques Markus W. Sigrist, I. M. Kolthoff, 1994-03-31 Leading experts discuss the characteristics advantages limitations and future aspects of modern spectroscopic techniques for environmental analysis Demonstrates how these methods can be applied to trace gas detection and assessment Concentrates on the latest techniques both laser and non laser based which offer advantages for air pollution and gas monitoring as opposed to more conventional methods Numerous examples of applications illustrate the potential of the techniques backed up by cutting edge information and representative data      *Matrix Isolation* Stephen Cradock, A.
