Matter and Memory Henri-Louis Bergson, 2019-03-28 Matter and Memory An Essay on the Relation of Body and Spirit is a complex exploration of human nature and the spirituality of memory In this work Henri Bergson investigates the function of the brain and opposes the idea of memory being of a material nature lodged within a particular part of the nervous system He claims that Matter and Memory is frankly dualistic leading to a careful consideration of the problems in the relation of body and mind His theories on sense dualism pure perception the concept of virtuality and his image of the memory cone may make this a confusing and challenging existentialist work However the years of research and extensive pathological investigations he spent in preparation for this and other essays have gained him great a justly deserved distinction as a brilliant theorist and philosopher Bergson wrote Matter and Memory in reaction to The Maladies of Memory 1881 by Thodule Ribot in which he claimed that the findings of brain science proved that memory is lodged within a particular part of the nervous system localized within the brain and thus of a material nature Bergson opposed this reduction of spirit to matter Defending a clear anti reductionist position he considered memory to be of a deeply spiritual nature the brain serving the need of orienting present action by inserting relevant memories The brain thus being of a practical nature certain lesions

tend to perturb this practical function but without erasing memory as such The memories are instead simply not incarnated and cannot serve their purpose French philosopher Henri Louis Bergson 1859 1941 was influential in the tradition of continental philosophy especially during the first half of the 20th century until the Second World War Bergson is known for his arguments that processes of immediate experience and intuition are more significant than abstract rationalism and science for understanding reality He was awarded the 1927 Nobel Prize for Literature in recognition of his rich and vitalizing ideas and the brilliant skill with which they have been presented In 1930 France awarded him the Grand Croix de la Legion d honneur

Matter and Memory Henri Bergson,2018-11-01 Matter and Memory presents an analysis of the classical philosophical problems concerning this relation Within that frame the analysis of memory serves the purpose of clarifying the problem Matter and Memory was written in reaction to the book The Maladies of Memory by Th odule Ribot which appeared in 1881 Ribot claimed that the findings of brain science proved that memory is lodged within a particular part of the nervous system localized within the brain and thus being of a material nature Bergson was opposed to this reduction of spirit to matter Defending a clear anti reductionist position he considered memory to be of a deeply spiritual nature the brain serving the need of orienting present action by inserting relevant memories The brain thus being of a practical nature certain lesions tend to perturb this practical function but without erasing memory as such The memories are instead simply not incarnated and cannot serve their purpose

Bergson, Nancy Margaret Paul, William Scott Palmer, 1911 **Bergson's Scientific Metaphysics** Yasushi Hirai, 2023-05-18

This volume brings Bergson's key ideas from *Matter and Memory* into dialogue with contemporary themes on memory and time in science across analytic and continental philosophy Focusing specifically on the application of Bergson's ideas to cognitive science the circuit between perception and memory receives full explication in 15 different essays By re-reading Bergson through a cognitive lens the essays provide a series of alternative analytic interpretations to the standard continental approach to Bergson's oeuvre without fully discounting either approach The relevance of philosophies of mind and memory sit alongside the role of a metaphysics of time in exploring connections to psychology biology and physics This eclecticism includes an exciting focus on numerous topics that are not given sufficient attention in extant studies of Bergson including the precise nature of his ideas on dualism memory and ecological theories of perception especially in relation to his contemporaries Led by leading Bergson scholars from France and Japan this book maps the rich terrain of Bergson's contemporary relevance alongside the historical context of his ideas *Matter and Memory* Henri Bergson, Nancy M.

Paul, W. Scott Palmer, 2018-07-11 *Matter and Memory* is a book of cognitive philosophy by Henri Bergson which discusses the classic problem of how the human mind and its memories are related to the spirit Bergson uses the phenomena of memory to construct arguments in favor of the spirit's existence The various types of memory and how they are related to the physical world are discussed Bergson analyses how memories are formed what bearing they have on the world and how they ultimately come to constitute their possessor's innate spirit This book was originally written by Bergson in response to an essay by Th odile Ribot who held that all memory could be traced back to the brain's nervous system Thus the essence of human memory could be reduced to mere matter rather than containing a higher spiritual element Bergson fervently disagreed with this opinion and strove to write this thesis as a counter to the notion that the spirit can be reduced to only molecular activity **Matter and Memory.
