Matter Of Consequences Part Three Of An Autobiography:

A Matter of Consequences Burrhus Frederic Skinner, 1984 **The Utopian Dilemma in the Western Political Imagination** John Farrell, 2023-03-31 In this volume John Farrell shows that political utopias societies with laws and customs designed to short circuit the foibles of human nature for the benefit of our collective existence have a perennial opponent the honor based culture of aristocracy that dominated most of the world from ancient times into early modernity and whose status based competitive psychology persists to the present day While utopias aim at equality the heroic imperative defends the need for personal and collective dignity It asks the utopian Do we really want to live in a world without struggle without heroes and without the stories they create Because the utopian dilemma pits essential values against each other equity versus freedom dignity versus justice few who confront it can simply take sides Rather the dilemma itself has been a generative stimulus for classic authors from Plato and Thomas More to George Orwell and Aldous Huxley Farrell follows their struggles with the utopian dilemma and with each other providing a deepened understanding of the moral and emotional dynamics of the western political imagination Introduction Chapter 8 Chapter 9 Chapter 15 Chapter 16 and Conclusion of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license *Threads of Life* Richard Freadman, 2001-02 Many autobiographers share profound questions about human life with their readers questions like To what extent was my life imposed on me To what extent did I bring it about through particular choices and actions through the activity of my own will Indeed the issue of the will is central to autobiographical writing and some of the greatest autobiographies give extended consideration to the will its nature its powers its limitations the forms of freedom constraint and expression it finds in various cultures its role in particular human lives In this new study unprecedented in subject and scope Richard Freadman offers the first sustained account of how changing theological philosophical and psychological accounts of the human will have been reflected in the writing of autobiography and of how autobiography in its turn has helped shape various understandings of the will Early chapters trace narrative representations of the will from antiquity the Greeks and Augustine to postmodernism Derrida and Barthes with particular emphasis on late modernity's culture of the will Later chapters then present detailed and powerfully original readings of autobiographical texts by Louis Althusser Roland Barthes B F Skinner Ernest Hemingway Simone de Beauvoir Arthur Koestler Stephen Spender and Diana Trilling Freadman's interdisciplinary approach to autobiography and the will includes a theoretical defense of the view that autobiographers are in varying degrees agents in their own texts *Threads of Life* argues that late modernity has inherited deeply conflicted attitudes to the will Freadman suggests that these attitudes now deeply embedded in contemporary cultural discourse need reexamining In this he contends reflective autobiography has an important part to play *The Psychology of B F Skinner* William O'Donohue, Kyle E. Ferguson, 2001-03-15 Behaviorists or more precisely Skinnerians commonly consider Skinner's work to have been

misrepresented misunderstood and to some extent defamed In this book the author clarifies the work of B F Skinner and puts it into historical and philosophical context Though not a biography the book discusses Skinner himself in brief But the bulk of the book illuminates Skinner's contributions to psychology his philosophy of science his experimental research program logical positivism and the behavioral principles that emerged from it and applied aspects of his work It also rebuts criticism of Skinner's work including radical behaviorism and discusses key developments by others that have derived from it **The Science of Consequences** Susan M. Schneider, 2012-12-11 Actions have consequences and the ability to learn from them revolutionized life on earth While it's easy enough to see that consequences are important where would we be without positive reinforcement few have heard there's a science of consequences with principles that affect us every day Despite their variety consequences appear to follow a common set of scientific principles and share some similar effects in the brain such as the pleasure centers Nature and nurture always work together and scientists have demonstrated that learning from consequences predictably activates genes and restructures the brain Applications are everywhere at home at work and at school and that's just for starters Individually and societally for example self control pits short term against long term consequences Ten years in the making this award winning book tells a tale ranging from genetics to neurotransmitters from emotion to language from parenting to politics taking an inclusive interdisciplinary approach to show how something so deceptively simple can help make sense of so much Benjamin Franklin, Jonathan Edwards, and the Representation of American Culture Barbara Oberg, Harry S. Stout, 1993 This is an interdisciplinary collection of comparative essays which looks at aspects of the thought of Edwards and Franklin and considers their places in American culture The Wiley Blackwell Handbook of Operant and Classical Conditioning Frances K. McSweeney, Eric S. Murphy, 2014-05-23 This combined survey of operant and classical conditioning provides professional and academic readers with an up to date inclusive account of a core field of psychology research with in depth coverage of the basic theory its applications and current topics including behavioral economics Provides comprehensive coverage of operant and classical conditioning relevant fundamental theory and applications including the latest techniques Features chapters by leading researchers professionals and academicians Reviews a range of core literature on conditioning Covers cutting edge topics such as behavioral economics *On the Way* Les L. Steele, 1998-08-10 **James B. Conant: Harvard to Hiroshima and the Making of the Nuclear Age** James Herschberg, 2019-07-31 James B Conant 1893 1978 was one of the titans of mid 20th century American history attaining prominence and power in multiple fields Usually remembered as an educational leader he was president of Harvard University for two tumultuous decades from the Depression to World War II to the Cold War and McCarthyism To take that job he gave up a scientific career as one of the country's top chemists and he left it twenty years later to become Eisenhower's top diplomat in postwar Germany Herschberg's prize winning study however examines a critical aspect of Conant's life that was long obscured by government secrecy his pivotal role in the birth of the nuclear age During World War II as an advisor to

Roosevelt and then Truman on the elite Interim Committee that considered how to employ the bomb against Japan Conant was intimately involved in the decisions to build and use the atomic bomb During and after the Manhattan Project he also led efforts to prevent a postwar nuclear arms race between the United States and the Soviet Union that he feared threatened the survival of civilization an apocalyptic prospect he glimpsed in the first instant of the new age when he witnessed the first test of the new weapon at Alamogordo on July 16 1945 a vivid inquiry a model of historiography evocative reading Conant was central to atomic policy and progress the bomb would be as much Conant's as it was anyone's in Government His inner response to that burden responsibility has long been obscured but it is illumined here Philip Morrison The New York Times Book Review In his splendid portrait of Conant James Hershberg has illuminated the life of a pivotal figure in the making of U S nuclear scientific educational and foreign policy for almost a half century But the book is much more It is not only an insightful narration of Conant's life it is also a brilliant and important account of the making of the nuclear age a chronicle that contains much that is new Hershberg's superb study is a chronicle of Conant's moral journey and we are the wiser for his having charted Conant's path S S Schweber Washington Post Book World James G Hershberg ably comes to grips with Conant and his hazardous times His book is vibrantly written and compelling and it breaches Conant's shield of public discretion in masterly fashion making extensive use of unpublished interviews diaries reports and correspondence pried from private and governmental repositories It is a huge ambitious work a history of the Cold War as Conant encountered it as well as a study of the man Daniel J Kevles The New Yorker a well written comprehensive nonjudgmental but sensitive biography Conant was involved in so many and such critical events that students of almost any aspect of our public life over the past half century will find useful the new material and helpful insights in this book This fine biography of one of the most important and complicated of America's twentieth century leaders immediately establishes James Hershberg as one of America's outstanding young historians Stephen E Ambrose Foreign Affairs magnificent Any reader interested in nuclear weapons Cold War history or American politics from FDR to JFK will find this biography riveting Priscilla McMillan Chicago Tribune masterful The prose is clear the narrative forceful and the author's judgments are balanced and judicious This is simply splendid biography The highest praise one can give for a book of this sort is that the historian has not shrunk from speaking truth to power This book quietly but insistently does so It should be read by the public at large as one of the definitive texts on the cold war and the nuclear age Hershberg's triumph is that he has prevailed over all the official lies to give us one more layer of the historical truth Kai Bird The Nation riveting an impressive achievement honest and comprehensive in its scholarship the author has shown himself to be a historian of notable achievement and promise McGeorge Bundy Nature Hershberg's outstanding balanced biography lifts the self imposed secrecy surrounding a key architect of U S Cold War policy and of the nuclear age Publisher's Weekly an impressive and substantial achievement Hershberg has used the life of one strategically placed individual to illuminate the most important issues surrounding

America's role and conduct in the nuclear age His book will be invaluable to scholars assessing the impact and legacy of the group who acquired the epithet wise men now that the Cold War has receded Carol S Gruber Science definitive a far more textured picture than one finds in Conant's own guarded and unrevealing autobiography an important and rewarding book illuminating Conant led a remarkable and eventful life in remarkable and eventful times James Hershberg has explored that life and those times in exhaustive and revealing detail Paul Boyer The New Republic James G Hershberg has achieved the impossible He has written a huge biography of a Harvard president that is fascinating informative and as valuable a piece of American history as anything I have read in years Mr Hershberg has brought us back vividly to an age that seems remote so long ago but the questions about nuclear proliferation are the same even while the answers are still ambiguous As we watch men struggling with unanticipated post Cold War problems and civil wars sprouting like Jason's men at arms it is good to read this story about a complex man who deserves an important place in our history because he helped make that history possible Arnold Beichman The Washington Times engrossing A magisterial study of an awesome and intriguing public career Kirkus Reviews entertaining thought provocative Dick Teresi The Wall Street Journal Hershberg's book helps us more clearly understand the postwar Establishment and offers a challenging appraisal of the role of elites of universities and of the state Gar Alperovitz In These Times Hershberg deserves great credit for cracking a tough New England walnut analyzing this very important public figure demonstrating how he fit into his own time and showing us what we can learn from the man Daniel R Mortensen The Friday Review of Defense Literature a compelling account an engaging examination of one of the central figures of the nuclear age It succeeds in showing one man's intersection with great events and issues and in the process illuminates those issues for us all American Historical Review well written Conant's participation in one of our country's most dynamic periods is thanks to Hershberg now much better understood Library Journal A reader of the book will enter the realm of the greats the shapers of worlds created by the atomic blasts at Hiroshima and Nagasaki Conant was no bit player in Cold War history the book is very successful in weaving Conant's subsurface persona in with his ups and downs as a prominent and committed public figure And it leaves out little detail in describing top level decisions involving the Cold War geopolitics of nuclear weaponry Conant was a participant in most of these decisions with Presidents Roosevelt and Truman themselves their Secretaries of War and State and of course all the major scientific figures of the time Chemical Engineering News A wonderfully rich portrait that emerges from a carefully documented account of Conant's role in the development of the atomic bomb and post war nuclear policy An extraordinarily well written text Hershberg lays bare the person behind the persona warts dimples and all Stanley Goldberg Bulletin of the Atomic Scientists **Current Catalog** National Library of Medicine (U.S.), *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1985 [The SAGE Encyclopedia of Theory in Counseling and Psychotherapy](#) Edward S. Noble,2017-09-29 A quarter of a century after its initial publication The Classroom Arsenal remains pivotal in understanding and challenging the relentless promotion of technology to reform education This seemingly benign education technology juggernaut carries forward the momentum of military agendas in man machine systems detailed in the book Promoters continue to flood schools with technology and its still unfulfilled promise of cutting edge personalized learning Meanwhile they continue as well their insatiable pursuit of federal funding educational legitimacy corporate profits and access to student subjects and their accumulated learning data for product development Less understood though is a companion enterprise there from the start to replace teaching and learning in traditional classrooms by efficient automated systems that manage and monitor human cognition and learning for high performance systems from weapons systems to high tech corporations As education is moved imperceptibly away from its traditional humanistic aims and from the classroom itself the goal of this human engineering project the depersonalized accumulation of cognitive components for a 21st century militarized economy best befits the book s original title The Human Arsenal This ongoing military corporate sponsored enterprise continues to impact education today largely unnoticed One example is the federally funded Advanced Distributed Learning Initiative ADL which has been a major force behind the implementation of electronic learning systems now used in all Defense Department and federal employee training With the Defense Advanced Research Project Agency ARPA ADL is developing structures to capture students soft skills and the Army Research Laboratory is developing intelligent tutoring systems to enable instructional management of affect engagement and grit perseverance ADL through the Department of

Defense has developed Experience API a learning technology that can monitor all student online and offline interactions and archive these in data lockers or learning record stores ADL has already impacted thousands of school districts through nonprofits such as IMS Global and Future Ready Schools part of an industry massively subsidized by high tech corporations and valued at 255 billion annually A 90 million Advanced Research Projects Agency for Education ARPA ED modeled after the military's ARPA has been proposed to fund dramatic breakthroughs in learning and teaching These include digital tutors as effective as personal tutors and with the Navy's Full Spectrum Learning project data collection tools for personalized education modeled after corporate data analysis that identifies consumer patterns and preferences ADL is just one example of how the military corporate ed tech enterprise is changing public education by hollowing it out into something that can be digitized data driven automated and monitored Its promoters envision education as children interacting with online learning systems where based on past performance algorithms will serve up what each student needs to know next Through this digital curriculum students create virtual educational identities at very young ages and learning devices are watching students as much as students are watching them Such is the education landscape presaged by *The Classroom Arsenal* a quarter century ago whose origins and trajectories need to be deeply understood now more than ever **James B. Conant**

James G. Hershberg, 1995 James B Conant 1893 1978 was one of the giants of the American establishment in the twentieth century President of Harvard University from 1933 to 1953 he was also a scientist who led the US government's effort to develop weapons of mass destruction and his story mirrors the transition of the United States from isolationism to global superpower at the dawn of the nuclear age This splendid portrait of Conant illuminates the life of a pivotal figure in the making of US nuclear scientific educational and foreign policy for almost half a century But the book is much more it is not only an insightful narration of Conant's life it is also a brilliant and important account of the making of the nuclear age a chronicle that contains much that is new *The Washington Post* The bomb would be as much Conant's as it was anyone's in government His inner response to that burden of responsibility has long been obscured but it is illumined here This is a model of historiography that is evocative reading *The New York Times Book Review* Vibrantly written and compelling it breaches Conant's shield of public discretion in masterly fashion **Bibliography of the History of Medicine** ,

Wanted, More than Human Intellectual Property Johanna Gibson, 2024-12-27 This book analyses animal creativity in order to unsettle the dominant assumptions that underpin current ideas of authorship and ownership in intellectual property Drawing upon theories of animal behaviour and cognitive ethology the book exposes and disrupts the anthropocentrism that informs prevailing assumptions about creativity intentionality and authorship within the field of intellectual property towards a new theory of authorship and personhood through play and the playful Moving on to challenge the invocation of a more general human nonhuman distinction in this context the book also engages the challenge to this distinction posed by artificial intelligence Incorporating critical animal studies behavioural science ethology critical legal studies and legal philosophy the

book presents a new idea of creativity which undermines the kind of rivalrous models now common in the field of intellectual property This book will be of considerable interest to those studying and teaching in the area of intellectual property as well as in animal law It will also appeal to legal theorists and others working in the social sciences in the areas of posthumanism and animal studies

Psychology in the Indian Tradition Ramakrishna K. Rao, Anand C Paranjpe, 2023-03-06 Professors Ramakrishna Rao and Anand Paranjpe are two distinguished psychologist philosophers who pioneered what has come to be known as Indian psychology In this authoritative volume they draw the contours of Indian psychology describe the methods of study define the critical concepts explain the central ideas and discuss their implications to psychological study and application to life The main theme is organized around the theme that psychology is the study of the person They go on to present a model of the person as a unique composite of body mind and consciousness Consciousness is conceived to be qualitatively and ontologically different from all material forms The goal of the person is self realization which consists in the realization of the true self as distinct and separate from the manifest ego It is facilitated by cultivating consciousness which leads to some kind of psycho spiritual symbiosis personal transformation and flowering of one s hidden human potentials

The Celluloid Specimen Benjamin Schultz-Figueroa, 2023-02-28 The Celluloid Specimen examines twentieth century behaviorist films that captured animal experiments revealing the central role of cinema in generating psychosocial definitions of species race identity and culture that continue to shape our contemporary political and scientific discourses Benjami n Schultz Figueroa analyzes rarely seen archival films made by Robert Yerkes in the 1930s at the first experimental primate colonies in North America the rat films made to simulate human society at Yale University in the 1930s and 1940s and the promotional films made by B F Skinner to sell the U S military on his design for a pigeon guided missile during World War II These laboratory films have long been categorized as passive recordings of scientific research but when examined in their own right they become rich historical political and aesthetic texts that played a crucial role in the history of science

The Alignment Problem Brian Christian, 2020-10-06 If you re going to read one book on artificial intelligence this is the one Stephen Marche New York Times A jaw dropping exploration of everything that goes wrong when we build AI systems and the movement to fix them Today s machine learning systems trained by data are so effective that we ve invited them to see and hear for us and to make decisions on our behalf But alarm bells are ringing Recent years have seen an eruption of concern as the field of machine learning advances When the systems we attempt to teach will not in the end do what we want or what we expect ethical and potentially existential risks emerge Researchers call this the alignment problem Systems cull r sum s until years later we discover that they have inherent gender biases Algorithms decide bail and parole and appear to assess Black and White defendants differently We can no longer assume that our mortgage application or even our medical tests will be seen by human eyes And as autonomous vehicles share our streets we are increasingly putting our lives in their hands The mathematical and computational models driving these changes range in complexity from something that can fit on

a spreadsheet to a complex system that might credibly be called artificial intelligence. They are steadily replacing both human judgment and explicitly programmed software. In best-selling author Brian Christian's riveting account, we meet the alignment problem's first responders and learn their ambitious plan to solve it before our hands are completely off the wheel. In a masterful blend of history and on-the-ground reporting, Christian traces the explosive growth in the field of machine learning and surveys its current sprawling frontier. Readers encounter a discipline finding its legs amid exhilarating and sometimes terrifying progress. Whether they and we succeed or fail in solving the alignment problem will be a defining human story. *The Alignment Problem* offers an unflinching reckoning with humanity's biases and blind spots, our own unstated assumptions and often contradictory goals. A dazzlingly interdisciplinary work, it takes a hard look not only at our technology but at our culture and finds a story by turns harrowing and hopeful.
