A Matter of Life and Death ,1996 *A Matter of Life & Death* Albert Z. Carr,1969 **Matters of Life & Death** Bernard MacLaverty,2025-04-25 MacLaverty's tales are poised and beautifully balanced outward yet intimate graced by both subtlety and substance The Independent A new book from Bernard MacLaverty is a cause for celebration but Matters of Life and Death is more than that It is the finest collection yet from a contemporary master of the form Beginning with the sudden terror of a family caught up in shocking sectarian violence and ending with the whiteout of an Iowa blizzard and the fear of losing your way very far from home this collection is about bonds made and broken secret and known In the extraordinary story Up the Coast a landscape painter discovers a place that makes her finally feel whole only to have that communion shattered by an arbitrary act of aggression that will resonate throughout her life Written with effortless skill and empathy these stories are hauntingly real MacLaverty's perfect attention to every detail every nuance of idiom and character remakes the world for us here on the page Matters of Life and Death John Cairns,2021-02-09 Cancer has become the scourge of the twentieth century It was always part of the human condition but until recently it was not a common cause of death because most people died from the infectious diseases Now that so many of us will live long enough to develop cancer we need to learn as much about it as we can This requires some understanding of molecular biology John Cairns has made significant contributions to cancer research molecular biology and virology He believes that it is possible to explain what is known about cancer and about molecular biology in terms that are easily understood by people with little or no scientific training In this fascinating book he explores the revolution in public health the origins and principles of molecular biology and our emerging understanding of the causes of cancer Finally he discusses how these developments are likely to affect future generations As Cairns points out the last two hundred years have altered our life expectations beyond all recognition Even in the less developed nations of the world people are starting to believe that everyone ought to be able to live into old age and be protected from the major causes of premature death This change in our expectations is one of the major benefits of technology and the biological sciences But the resulting explosion in the human population ultimately threatens everything we have gained by scientific progress The Saturday Evening Post ,1918 *A New Look at Children's Literature* William Anderson,Patrick J. Groff,1972 *Current Books* National Association of Independent Schools,1957 **Tracing the Steps of a Disciplined Life** Christopher Robinson,2011-02-09 **Best Books for Children** ,1969 Library Journal ,1967 **Subject Catalog** Library of Congress,1965 **Library Journal** Melvil Dewey,Richard Rogers Bowker,L.
