Error Reduction and Prevention in Surgical Pathology Raouf E. Nakhleh, Keith E. Volmar, 2019-07-09 The 1st edition of Error Reduction and Prevention in Surgical Pathology was an opportunity to pull together into one place all the ideas related to errors in surgical pathology and to organize a discipline in error reduction This 2nd edition is an opportunity to refine this information to reorganize the book to improve its usability and practicality and to include topics that were not previously addressed This book serves as a guide to pathologists to successfully avoid errors and deliver the best diagnosis possible with all relevant information needed to manage patients The introductory section includes general principles and ideas that are necessary to understand the context of error reduction In addition to general principles of error reduction and legal and regulatory responsibilities a chapter on regulatory affairs and payment systems which increasingly may be impacted by error reduction and improvement activities was added This later chapter is particularly important in view of the implementation of various value based payment programs such as the Medicare Merit Based Incentive Payment System that became law in 2015 The remainder of the book is organized in a similar manner to the 1st edition with chapters devoted to all aspects of the test cycle including pre analytic analytic and post analytic The 2nd Edition of Error Reduction and Prevention in Surgical Pathology serves as an essential

Handbook of Autopsy Practice Jurgen Ludwig,2002-07-18 The second edition of Handbook of Autopsy Practice appeared in 1979 under the title Current Methods of Autopsy Practice W B Saunders Company that edition was out of print in the early 1980s Now over 20 years later it appeared timely to thoroughly update the material in a third edition by adding what we have learned in the meantime and eliminating text that has become obsolete There is an acute need for a complete and readily accessible resource for autopsy work because few pathologists still specialize in autopsy practice and as a consequence expertise in autopsy technology and autopsy pathology has declined Our colleagues in the forensic field have remained the only large group of autopsy practitioners For most other pathologists the economic situation time constraints and the steadily decreasing autopsy rates have made a career in autopsy pathology unattractive This state of affairs is perpetuated by a lack of interest among many of our young colleagues partly because the teaching of autopsy pathology and autopsy techniques during most residencies is insufficient Numerous articles have been moaned this situation but the trend I fear is irreversible Still autopsies will be requested particularly in complex and difficult situations where the questions remaining after the death of the patient might challenge even experienced autopsy pathologists Under these circumstances

this Handbook of Autopsy Practice should meet a particular need by providing the prosecutor with a source of information when it is most required in the autopsy room
