The two topics of politics and the economy are interconnected. Economics is mainly concerned with analyzing and influencing the market. The activities involved in running a country or region are referred to as politics, notably the disputes between the parties in control. The American economy was in dire straits in January 1981 when President Reagan took office. Numerous Americans were unemployed, American businesses were having trouble, and inflation and interest rates were out of control. The President stated in his inaugural address that reviving the American economy was his top priority, but it would not be simple. He had to make some difficult decisions that would affect both the course of his presidency and the long-term health of the American economy. The problem of price rise did not go away. Nixon's strategies were to blame, but he had warned Ford not to make the same blunder again by enforcing wage and price restrictions as he did in 1971. Ford pointed out another factor contributing to the sluggish economy: the lasting effects of the Great
