Pathways Of Change In Africa:

Pathways of Change in Africa Ian Scoones, 2002 In the literature of sustainable development many have argued for the encouragement of mixed farming involving the integration of livestock and crops on one farm to meet the needs of small scale African farming systems Scoones and Wolmer both with the Environment Group at the Institute of Development Studies U of Sussex argue that behind this argument is the implicit or explicit assumption that mixed farming represents a stage in a normative evolutionary process towards an ideal They suggest that this view is mistaken and that mixed farming is only one of a range of possible pathways of change in agricultural systems They present case studies from Ethiopia Mali and Zimbabwe and analyze how social actors have varying access to resources This variance is often due to institutional arrangements that are too often ignored in discussions of mixed farming and therefore fail to take into account situations that could help development efforts to be more effectively targeted Annotation copyrighted by Book News Inc Portland OR

and Power in Post-Conflict Africa Aili Mari Tripp, 2015-10-20 The book explains an unexpected consequence of the decrease in conflict in Africa after the 1990s Analysis of cross national data and in depth comparisons of case studies of Uganda Liberia and Angola show that post conflict countries have significantly higher rates of women's political representation in legislatures and government compared with countries that have not undergone major conflict They have

also passed more legislative reforms and made more constitutional changes relating to women's rights. The study explains how and why these patterns emerged, tying these outcomes to the conjuncture of the rise of women's movements, changes in international women's rights norms, and most importantly, gender disruptions that occur during war. This book will help scholars, students, women's rights activists, international donors, policy makers, non-governmental organizations (NGOs), and others better understand some of the circumstances that are most conducive to women's rights reform today and why.

Gender Equality, Climate Action, and Technological Innovation for Sustainable Development in Africa Ogechi Adeola, Olaniyi Evans, Innocent Ngare, 2023-12-07. This open access book explores the intersection of gender and climate change, suggesting ways in which innovative technologies can accelerate climate relief actions and offers strategies for integrating climate change initiatives into national policies and planning. By examining the devastating consequences of climate change on women and girls throughout the continent, the authors pose a crucial question: Does gender matter in climate change discussions in Africa? Political and social traditions have burdened women with greater vulnerability to the impacts of climate-related natural disasters, including violence, displacement, poverty, famine, and lack of access to clean water. However, women are also key to effective and inclusive climate mitigation, adaptation, and decision making. The authors provide a compelling discourse that identifies the social and economic benefits for all citizens when gender-inclusive policies shape equitable and targeted action plans from mitigation to adaptation and funding. The UN's SDG 13 calls for urgent action and commitment to combat climate change. The implementable and action-oriented propositions presented in this book will be of interest to students, educators, practitioners, third sector actors, and policymakers committed to gender equality, sustainable development, and climate action in Africa.
