Cincinnati Magazine ,2006 Cincinnati Magazine taps into the DNA of the city exploring shopping dining living and culture and giving readers a ringside seat on the issues shaping the region **Academic Freedom at American Universities** Philip Lee,2014-11-19 This book details the legal and historical development of institutional and professorial academic freedoms to better understand the relationship between these concepts While some judges and scholars have focused on the divergence of these protections this book articulates an aligned theory that brings both the professorial and institutional theories together It argues that while constitutionally based academic freedom does its job in protecting both public and private universities from excessive state interference or at the very least it asks the right questions it is inadequate because it fails to protect many individual professors in the same way This solution entails using contract law to fill in the gaps that constitutional law leaves open in regard to protecting individual professors Contract law is an effective alternative to constitutional law for three reasons First unlike constitutional law it covers professors at both public and private universities Second it allows for the consideration of the custom and usage of the academic community as either express or implied contract terms in resolving disputes between universities and professors Third contract law enables courts to structure remedies that take into account the specific campus contexts that give rise to various disputes instead of crafting broad remedies that may ill fit certain campus environments The proposed reconceptualization of academic freedom merges constitutional protection for institutions and contractual protection for individual professors This combined approach would provide a more comprehensive framework than is currently available under the predominantly constitutional paradigm of academic freedom *Digital Transformation of Regional Education in China* Haijun Zeng,Jingwen Pan,Jian Xu,Qiurui Sun,2025-02-24 This book presents the best practices of smart education in different regions across China Each chapter addresses one or more of the following topics smart learning environments new education and teaching models teaching platforms and digital tool applications teacher professional development smart education evaluation education governance

and education digitization This edited collection promotes digital integration and innovative development of education improves regional education levels and ultimately forms a new model to support and lead the modernization of education in China
