Patterns Of Thinking:

Patterns of Thinking John H. Clarke, 1990 **Patterns, Thinking, and Cognition** Howard Margolis, 1987 What happens when we think How do people make judgments While different theories abound and are heatedly debated most are based on an algorithmic model of how the brain works Howard Margolis builds a fascinating case for a theory that thinking is based on recognizing patterns and that this process is intrinsically a logical Margolis gives a Darwinian account of how pattern recognition evolved to reach human cognitive abilities Illusions of judgment standard anomalies where people consistently misjudge or misperceive what is logically implied or really present are often used in cognitive science to explore the workings of the cognitive process The explanations given for these anomalous results have generally explained only the anomaly under study and nothing more Margolis provides a provocative and systematic analysis of these illusions which explains why such anomalies exist and recur Offering empirical applications of his theory Margolis turns to historical cases to show how an individual's cognitive repertoire the available cognitive patterns and their relation to cues changes or resists changes over time Here he focuses on the change in worldview occasioned by the Copernican discovery not only how an individual might come to see things in a radically new way but how it is possible for that new view to spread and become the dominant one A reanalysis of the trial of Galileo focuses on social cognition and its interactions with politics In challenging the prevailing paradigm for understanding how the human mind works **Patterns Thinking and Cognition** is certain to stimulate fruitful debate Discover Design Pattern Thinking DR. RUDY A. MAGNAN, 2013-07 Thinking skill is unquestionably the fundamental human resource We need to do much more about developing this skill because the complexity of modern life demands more than routine reactions There is an even bigger need for productive constructive and generative thinking I hope that everyone concerned with the future direction of education will pay attention to these important matters which you raise in this book Dr Edward de Bono WORLD'S LEADING AUTHORITY on THINKING AS A DELIBERATE SKILL Pattern Theory Rachel H. 50 key principles that can be applied across various settings Researchers scholars and practitioners are encouraged to explore and critique this unified theory as a lens for examining social and cognitive phenomena Ideal for academics and professionals seeking to challenge their understanding of the connections between mind and society as well as for those looking to deepen their understanding of pattern as a cognitive phenomenon as a theoretical lens and as a meta methodology for inquiry this text provides a substantive foundation for ongoing development and application of pattern science across multiple fields
