Patterns of Social Inequality Huw Beynon, Pandeli Glavanis, 2014-06-06 Written by a group of the UK's leading Sociologists this book covers in one volume all of the themes central to an understanding of contemporary British Society Essays provide an historical overview of such topics as class gender work ethnicity and community but also make a theoretical and substantive contribution to current debates Work Identity at the End of the Line? T. Strangleman, 2004-05-21 Work Identity at the End of the Line tells the story of workplace culture and identity in the railway industry before during and after privatization in the mid 1990s It combines rich interview material from workers and managers involved in the privatisation process with a fascinating background detail of nationalization The book will be of interest to sociologists cultural and economic historians as well as those studying culture change in business Work Identity at the End of the Line has been shortlisted for the British Sociological Association's Philip Abrams Memorial Prize 2005 It is one of only four titles to be shortlisted **Classed Intersections** Yvette

Taylor, 2016-05-23 Classed Intersections examines the salience transformation and tension of class analysis at a crucial juncture in its return to and reinvention of sociological agendas The contributors including both established and emerging academics examine class as produced through combined social cultural and economic practices but are clear not to reify class over and above other paradigms instead a number of key intersections are foregrounded including gender ethnicity and sexuality The collection draws on a variety of methodological positions including in depth interviews ethnographies and auto biographical approaches It scrutinizes classed intersections across a wide range of social spheres and practices including education the workplace everyday life citizenship struggles consumption the family and sexuality Taken together this volume will enhance efforts to establish new working class studies both in the UK and around the world Class Strategies and the Education Market Stephen J. Ball, 2003-08-29 Examines the ways in which the middle classes maintain and improve their social advantages in and through education Assembling Work Tony Elger, Chris Smith, 2005-04-07 Japanese

manufacturing firms established in Britain have often been portrayed as carriers of Japanese corporate best practice for work and employment In this book the authors challenge these views through case study research undertaken at several Japanese manufacturing plants in Britain during the 1990s The authors argue that in actual fact production and employment regimes are adapted and re made in a number of ways responding to specific corporate and local contexts In particular they focus upon the ways in which Japanese and British managers have sought to construct distinctive work regimes in the light of their particular branch plant mandates and competencies the evolving character of management worker relations within factories

and the varied product and labour market conditions they face The book highlights the constraints as well as the opportunities facing managers of these greenfield workplaces and the uncertainties that continued to characterize the development of management strategies Ultimately the authors show how arguments about the role of overseas branch plants in the dissemination of management practices must take more careful account of the varied ways in which such factories are implicated in wider corporate strategies The operations of international firms are embedded within intractable features of capitalist employment relations especially as they are re made in specific local and national settings This book is an important intervention in contemporary debate about international firms and globalization and will be of interest to teachers researchers and advanced students of this subject from disciplines including Business Studies Organization Studies Industrial Relations Sociology Political Economy and Economic and Social Geography

Fitting into Place? Yvette Taylor, 2016-04-15 Fitting into Place adopts a multi dimensional interdisciplinary approach to explore shifting geographies and temporalities that re constitute city publics and the place of the public sociologist Class race and gender disadvantages are situated in relation to urban rural contrasts where future selves are reconfigured in and through local and global sites people inhabit shifting times and places from industrial landscapes of the past to a current present and imagined cosmopolitan regenerated future The rhetorics and vocabularies of place as affective and material suggest a more complex fit than the language of masculine crisis for past times or feminised fit into new futures suggests Across the generations women's labour is still effaced as maps of loyalty hold up families as reference points of belonging and fitting in such architecture of place complicates reified geographies of choice which centre a middle class mobile subject Based upon funded empirical research this book will be of interest to sociologists and geographers

Migration and Inequality Tanja Bastia, 2013-03-05 The migration development nexus has emerged as an important area of both research and policy over the last ten years However most of the interest has focused on the potential that migration holds for poverty alleviation Relatively little attention has been paid to the relationship between migration and inequality particularly on inequality as a consequence of migration This is unfortunate given that inequality is emerging as an important area of inquiry within development studies This edited collection explores the relationship between migration and inequality in Africa Asia and Latin America by taking into account economic and social inequalities While the focus on inequality as opposed to poverty is in itself original the book offers additional points of interest First it combines chapters on internal and international migration thereby challenging the current focus in the migration literature that focuses almost exclusively on cross border migration Internal migration greatly outnumbers cross border moves Yet policy makers as well as most studies focus on cross border international migration We are only just beginning to unravel the relationship between internal and cross border migration Second the theme of inequality complements the existing focus in the migration development nexus on issues of poverty Third the chapters focus on both economic and social inequalities often combining an analysis of different types of

inequalities The book also covers governance and migrants rights gender and intersectionality and health The chapters in this edited volume make an original contribution to debates on the migration development nexus as well as the literature on inequality which often tends to focus on economic measurements of inequality at the expense of including a thorough analysis of social inequality **Stretching the Sociological Imagination** Andrew Smith, Matt Dawson, Bridget Fowler, David Miller, David Rampton, 2015-11-08 This edited collection calls for renewed attention to the concept of the sociological imagination allowing social scientists to link private issues to public troubles Inspired by the eminent Glasgow based sociologist John Eldridge it re engages with the concept and shows how it can be applied to analyzing society today
