Social Studies Education Keith C. Barton,2006-03-01 This volume fills a significant gap in the scholarship on social studies education by providing thoughtful reflections on research methods in the field It is not a how to guide but an exploration of key issues related to the design and implementation of empirical studies The authors are active researchers who use varied methods in diverse settings including historical research international comparative studies survey research interviews with students and teachers classroom observations self studies and action research and emancipatory methodologies They use their own experiences to examine such topics as the conceptualization of research questions relationships with participants researchers identities and elicitation of students and teachers thinking This collection should become indispensable for both beginning and experienced scholars in social studies In the Shadow of Authoritarianism Thomas D. Fallace,2018 In the Shadow of Authoritarianism explores how American educators in the wake of World War I created a student centered curriculum in response to authoritarian threats abroad For most of the 20th century American educators lived in the shadow of ideological political cultural and existential threats including Prussianism propaganda collectivism dictatorship

totalitarianism mind control the space race and moral relativity To meet the perceived threat the American curriculum was gradually moved in a more student centered direction that focused less on what to think and more on how to think This book examines the period between World War I and the 1980s focusing on how U S schools countered the influence of fascist and communist ideologies as well as racial discrimination Fallace also considers this approach in light of current interests in the Common Core State Standards Perhaps the recent rise of new authoritarian threats not just abroad but also at home will rejuvenate our long tradition of democratic education Schools have served as the bulwarks of democracy before Let s hope they can do so again guided by this smart little book Jonathan Zimmerman University of Pennsylvania Fallace offers a fresh provocative history of democratic education as it has been practiced in the United States Walter Parker University of Washington

Burlbaw,2024-03-01 America s schools are constantly in the news today for safety concerns contested curricula teacher quality test scores and a variety of other topics Although most people spend at least 12 years in school systems they know little of the history or evolution of American schooling The collection of papers assembled in this book are divided into three categories which greatly impacted American schooling people policy and practices This work seeks to shed light on what has occurred in curriculum history in the past so as to help readers develop a deeper understanding of how our system of schooling arrived at its current state The first

section of the book examines the stories of people who had an influence on schooling and education The second section focuses on the curricula and programs that were utilized in schools and districts throughout the country The final chapter of the book looks at decisions that had long ranging impact on educational policies The chapters of this book offer a glimpse into the history of American schooling and those people policies and practices that influenced its development It is the editors hope that the work will spark interest in scholars and students of educational history to examine other past as well as present stories of educators to expand our understanding of the saga that is the American schooling experience

Social Studies Education in South and South East Asian Contexts Kerry J Kennedy, 2021-07-22 The education of young people is context bound This edited volume explores the contexts that characterise South and South East Asia and their influence on social studies education There is not a single context across this broad geographical expanse rather different religions different political systems and different values exert influences that create distinctive programmes that characterise different countries Yet there are also commonalities such as the post colonial nature of most of the countries portrayed in this book determined efforts at establishing new national communities and multiple value systems that lead to distinctive local priorities There are also voices of resistance in these chapters recognising the realities of local contexts but also recognising the need for change Social studies education in these contexts may well be descended from its origins in North America but in South and South Asian contexts it has taken on new purposes new forms and new values Education researchers policymakers and postgraduate students in comparative education will find the volume useful in its exploration and comparison of the social studies curricular and reforms that shaped them
