,2003 **Proceedings and Addresses of the American Philosophical Association** American Philosophical Association,2006 List of members in v 1 The Reading of Theoretical Texts Peter Ekegren,2002-01-04 Since the structuralist debates of the 1970s the field of textual analysis has largely remained the preserve of literary theorists Social scientists while accepting that observation is theory laden have tended to take the meaning of texts as given and to explain differences of interpretation either in terms of ignorance or bias In this important contribution to methodological debate Peter Ekegren uses developments within literary criticism philosophy and critical theory to reclaim this study for the social sciences and to illuminate the ways in which different readings of a single text are created and defended **American Book Publishing Record** ,2003 **The Philosophical Review** Jacob Gould Schurman,James Edwin Creighton,Frank Thilly,Gustavus Watts Cunningham,2003 **University of Pennsylvania Bulletin** University of Pennsylvania,1893

*Reading Aesthetics and Philosophy of Art* Christopher Janaway,2005-10-07 Designed for readers with no or little prior knowledge of the subject this concise anthology brings together key texts in aesthetics and the philosophy of art Designed for readers with no or little prior knowledge of the subject Presents two contrasting pieces on each of six topics Texts range from Plato s famous critique of art in the Republic through Nietzsche s The Birth of Tragedy to Barthes The Death of the Author and pieces in recent philosophical aesthetics from a number of traditions Interactive editorial commentary helps readers to engage with the philosophical train of thought Explains the argumentative and historical context in which each piece was written Includes questions for debate and suggestions for further reading The Emergence of Sin Matthew Croasmun,2017-06-01 We can have a sense that when we try to do right by one another we aren t merely striving against ourselves The feeling is that we are struggling against something someone else As if there s a force a person that wishes us ill In his letter to the Romans the apostle Paul describes just such a person Sin a cosmic tyrant who constrains our moral freedom confuses our moral judgment and condemns us to slavery and to death Commentators have long argued about whether Paul literally means to say Sin is a person or is simply indulging in literary personification but regardless of Paul s intentions for modern readers it would seem clear enough there is no such thing as a cosmic tyrant Surely it is more reasonable to suppose Sin is merely a colorful way of describing individual misdeeds or at most a way of evoking the intractability of our social ills In The Emergence of Sin Matthew Croasmun suggests we take another look The vision of Sin he offers is at once scientific and theological social and individual corporeal and mythological He argues both that the cosmic power Sin is nothing more than an emergent feature of a vast human network of transgression and that this power is nevertheless real personal and one whom we had better be ready to resist Ultimately what is on offer here is an account of the world re mythologized at the hands of chemists evolutionary biologists sociologists and entomologists In this world Paul s text is not a relic of a forgotten mythical past but a field manual for modern living **Guiding Adolescent Readers to Success** Mark Donnelly,Julie Donnelly,2011-10-01 This is an easy to follow resource that explains how to transition

successful Guided Reading strategies into the upper grades It provides strategies differentiation suggestions and practical tips for successfully incorporating various genres of literature into instruction to keep students motivated and interested in reading This resource is aligned to the interdisciplinary themes from the Partnership for 21st Century Skills and supports the Common Core and other state standards *Summer Seminars for Secondary School Teachers* National Endowment for the Humanities. Division of Fellowships and Seminars,1986 *The Problem of Free Will in David Foster Wallace* Paolo Pitari,2024-06-27 This book argues that David Foster Wallace failed to provide a response to the existential predicament of our time Wallace wanted to confront despair through art but he remained trapped and his entrapment originates in the existentialist contradiction the impossibility of affirming the meaningfulness of life and an ethics of compassion while believing in free will To substantiate this thesis the analysis reads Wallace in conversation with the existentialist philosophers and writers who influenced him S ren Kierkegaard Fyodor Dostoevsky Martin Heidegger Jean Paul Sartre Albert Camus and Ludwig Wittgenstein It compares his non fiction with the sociologies of Christopher Lasch Zygmunt Bauman Ulrich Beck and Elisabeth Beck Gernsheim and Anthony Giddens And it finds inspiration in Giacomo Leopardi Friedrich Nietzsche and Emanuele Severino to conclude that the philosophy which pervades Wallace s works entails despair and represents the essence of our civilization s interpretation of the world *Dialogue, Skill and Tacit Knowledge* Bo Goranzon,Richard Ennals,Maria Hammeron,2006-02-22 Everyone in an organization from cleaner to CEO has expert knowledge Yet only a fraction of it can be codified and expressed explicitly as facts and rules A little more is visible implicitly as accepted procedures but even this is only the beginning Submerged beneath the explicit and implicit levels is a vast iceberg of tacit knowledge that cannot be reliably accessed by traditional analytical approaches And yet without it organizational learning means little Interweaving theory with practical guidance this book looks at the importance of tacit knowledge and shows how it is now being put in motion through groundbreaking analogical thinking methods Chief among these is the Dialogue Seminar developed by the editors in which learning is seen as arising from encounters with differences There can be no consensus on the value of corporate knowledge until what is meant by that knowledge is discussed and defined Based on two decades of research and a host of practical cases this book offers a way forward G ranzon argues that the question of whether machines can think is not the right question to ask The more important question he believes is the impact of automation on work and human skills and he is looking for a way of describing skills that allows us to discuss this question Janet Vaux New Scientist A Swedish initiative to rethink the relationship between learning and work Rolf Hughes The Times Higher Education
