Jonathan Bernstein, 2021-10-28 Since the end of World War 2 the tactical air war over Europe has been largely overlooked by historians and authors alike in favour of analysis of the higher profile strategic bombing campaign Involving just as many aircraft as the daylight heavy bombing campaign the fighter bombers principally of the Ninth Air Force wreaked considerably more havoc on German ground forces Indeed Thunderbolt units undertaking such missions effectively complemented the strategic campaign ensuring the defeat of Nazi Germany P 47 pilots paid a high price to achieve this victory however as the German flak arm was well equipped nearly a quarter of all war related production was devoted to anti aircraft weaponry with weapons of various calibres to counter tactical air power's low to medium altitude threat The USAAF four numbered air forces that saw action over the European continent suffered significant fighter bomber losses to flak The principle fighter bomber from the summer of 1944 through to VE Day was the P 47D with both dedicated ground attack units and squadrons that had completed their bomber escort tasking seeking out targets of opportunity across occupied Western Europe While heavy calibre anti aircraft fire was intended to both shoot down enemy aircraft and force bombers to drop their ordnance sooner or from higher altitudes thus reducing bombing accuracy low altitude flak batteries put up a virtual wall of steel for enemy fighter bombers to fly through Damaging a low flying fighter bomber made it easier for other flak gunners to track engage and destroy it Innovations like lead computing gunsights gave gunners a higher probability of intercepting low altitude fighters Conversely the appearance of air to ground rockets beneath the wings of P 47s gave pilots better standoff range and a harder hitting punch when dealing with low and medium altitude flak units This volume analyses the tactics and techniques used by both P 47 fighter bomber pilots and German flak gunners featuring full colour illustrations to examine the

Allied tactical air power in Europe from 1943 and how German defences were overpowered by the air threat **Warbirds**

Mustang James William "Bill" Marshall,Lowell F. Ford,2020-07-09 The story of the P 51B Mustang aircraft from its development prior to the American entry into the war through to D Day in June 1944 During World War II the United States Army Air Corps was led by a cadre of officers who believed implicitly that military aviation particularly fast heavy bombers at high altitude would be able to destroy strategic enemy targets during daylight with minimal losses However by 1942 the Flying Fortress was proving vulnerable to Luftwaffe fighters This title charts the United States Army Air Force s struggle to develop a Long Range Escort which would enable them to achieve the Combined Bomber Objectives and gain mastery of the

skies over the Third Reich The commitment of the USAAF to the Mediterranean and European theatres saw an increasingly desperate need to find a fighter escort which reached crisis point in 1943 as losses suffered in the Tidal Wave offensive and Schweinfurt Regensburg Munster raids emphasised the mounting strength of the Luftwaffe The USAAF leaders increasingly accepted the probability of bomber losses and the deployment of the P 51B Mustang solved the problem of Germany's layered defence strategy as Luftwaffe fighters had been avoiding the P 47 Thunderbolt and P 38 Lightning escort fighters by concentrating their attacks beyond the range of the Thunderbolt and Lightning The P 51B duly emerged as the The Bastard Stepchild that the USAAF Material Division did not want becoming the key Long Range Escort fighter alongside the P 38 and P 47 that defeated the Luftwaffe prior to D Day As well as the P 51B's history this title explores the technical improvements made to each of these fighters as well as the operational leadership and technical development of the Luftwaffe they fought against

United States Army in World War II, 1951 **P-47 Thunderbolt Units of the Twelfth Air Force** Jonathan Bernstein, 2012-08-20 The P 47 Thunderbolt originally designed as a high altitude interceptor became the principal US fighter bomber of World War II First adapted to the ground attack role by units of the Twelfth Air Force in early 1944 the strength and durability of the P 47 airframe along with its massive size earned it the nickname Juggernaut which was quickly shortened to Jug throughout the MTO and ETO By October 1943 with the creation of the Fifteenth Air Force nearly half of the Twelfth's fighter groups would be retasked with strategic escort missions leaving six groups to perform close air support and interdiction missions throughout the entire Mediterranean theatre The groups inflicted incredible damage on the enemy's transport routes in particular using rockets bombs napalm and machine gun rounds to down bridges blow up tunnels and strafe trains Myriad first hand accounts and period photography reveal the spectacular success enjoyed by the Thunderbolt in the MTO in the final year of the war

Inner Seven William E. Oliver, 1999-06-01 The history of seven unique American combat aces of World War II and Korea Sharks of the Air James Neal Harvey, 2020-01-10 A perfect blend of sympathetic career biography and gripping military history a definite winner for all World War II military history buffs Library Journal In July 1944 the Allies were stunned by the appearance of the Messerschmitt Me 262 the world's first operational jet warplane More than one hundred mph faster than any other aircraft in the skies the Me 262 gained scores of victories over Allied fighters and bombers and by the end of the war many of the Luftwaffe's greatest aces had clamored to be in their cockpits Sharks of the Air tells the story of Willy Messerschmitt's life and shows how this aeronautical genius built

many revolutionary airplanes not excluding the Luftwaffe's mainstay the Me 109 and culminating in the Me 262. It describes how his various warplanes fought in Spain, Poland, France, Britain, the USSR, and Germany, and it provides thrilling accounts of air battles drawn from combat reports and interviews with veterans. And finally, this biography gives insight into the life of a man who played a role in the Nazi war machine but is not defined by it. Scale Aviation Modeller International Aspects of Messerschmitt's life never before made public are revealed, including his love affair with the beautiful Baroness Lilly Michel Rolino, a rich aristocrat who left her husband to live with Willy. Author James Harvey uses his 40 years of flying experience and experience of aviation to tell the fascinating story of Messerschmitt and how, given the right conditions, Messerschmitt and other German aircraft designers could have changed the course of WWII. Military Scale *Lightning Sky* R.C. George, 2019-04-30. A U.S. fighter pilot captured by the enemy, a father determined to rescue his son. One of the most remarkable and moving true stories of faith and perseverance to come out of World War II. October 6, 1944. Twenty-year-old Army Air Corps Second Lieutenant David Mac Warren MacArthur was on a strafing mission over Greece when a round of 88 mm German anti-aircraft flak turned his P-38 Lightning into a comet of fire and smoke. Dave parachuted to safety as the Lightning lived up to her name and struck the Adriatic Sea like a bolt of flames. In minutes, he was plucked from the water only to find himself on the wrong end of a German rifle pointing straight at his head. Dave's father, Lieutenant Colonel Vaughn MacArthur, was a chaplain with the 8th Armored Division of Patton's Third Army when he learned of his son's capture. He made it his personal mission to find him. For the duration of the war, as Dave was shuttled from camp to camp, including Dachau, his father never stopped searching. Then in May 1945, Vaughn's last hope was Stalag VII A in Moosburg, Germany. Through the barbed wire fence, he cried out his son's name. Incredibly, out of tens of thousands of POWs, one of them squinting into the sunlight turned and smiled. Father and son spent the next two weeks together, celebrating a forever-cherished memory. Over the next twenty-five years, Dave would go on to honor his father on rescue missions of his own, becoming a highly decorated and genuine American war hero. In both Korea and Vietnam, Dave would carry with him the legacy of a great man who gave everything to save his son. An inspiring, harrowing, and unforgettable chronicle of love of family and love of country. *Lightning Sky* is a timeless testament to extraordinary lives in extraordinary times. **Air University Library Index to Military Periodicals** ,
