Research In Political Economy Vol 6 Research In Political Economy:

The Political Economy of Third World Intervention David N. Gibbs, 1991-11 Interventionism the manipulation of the internal politics of one country by another has long been a feature of international relations The practice shows no signs of abating despite the recent collapse of Communism and the decline of the Cold War In *The Political Economy of Third World Intervention* David Gibbs explores the factors that motivate intervention especially the influence of business interests He challenges conventional views of international relations eschewing both the popular realist view that the state is influenced by diverse national interests and the dependency approach that stresses conflicts between industrialized countries and the Third World Instead Gibbs proposes a new theoretical model of business conflict which stresses divisions between different business interests and shows how such divisions can influence foreign policy and interventionism Moreover he focuses on the conflicts among the core countries highlighting friction among private interests within these countries Drawing on U S government documents including a wealth of newly declassified materials he applies his new model to a detailed case study of the Congo Crisis of the 1960s Gibbs demonstrates that the Crisis is more accurately characterized by competition among Western interests for access to the Congo's mineral wealth than by Cold War competition as has been previously argued Offering a fresh perspective for understanding the roots of any international conflict this remarkably accessible volume will be of special interest to students of international political economy comparative politics and business government relations This book is an extremely important contribution to the study of international relations theory Gibbs treatment of the Congo case is superb He effectively takes the statist to task and presents a compelling new way of analyzing external interventions in the Third World Michael G Schatzberg University of Wisconsin David Gibbs makes an original and important contribution to our understanding of the influence of business interests in the making of U S foreign policy His business conflict model provides a synthetic theoretical framework for the analysis of business government relations one which yields fresh insights overcomes inconsistencies in other approaches and opens new ground for important research Gibbs provides a sophisticated analysis of the conflicts within the U S business community and identifies the complex ways in which they interacted with agencies within the government to form U S foreign policy toward the Congo This is a well crafted analysis of a critical case of U S postwar intervention which should be of general interest to scholars and others concerned with the domestic bases of foreign policy Thomas J Biersteker Director School of International Relations University of Southern California

Marxian Political Economy B. Milward, 2000-07-05 This book challenges the notion that the Marxian approach is no longer relevant to the problems of contemporary society in the post Soviet world The first part of the book deals with the distinctive method of Marx's political economy with an emphasis on its origins and the problems that arise out of misinterpretations of Capital The second section applies this method to some of the key contemporary issues including unemployment globalization and the crisis of the welfare state and suggests that the approach of Marxist political economy remains a highly relevant and intellectually sound method of analysis *From Political Economy to Economics*

Dimitris Milonakis, Ben Fine, 2009-01-13 Economics has become a monolithic science variously described as formalistic and autistic with neoclassical orthodoxy reigning supreme So argue Dimitris Milonakis and Ben Fine in this new major work of critical recollection The authors show how economics was once rich diverse multidimensional and pluralistic and unravel the processes that lead to orthodoxy's current predicament The book details how political economy became economics through the desocialisation and the dehistoricisation of the dismal science accompanied by the separation of economics from the other social sciences especially economic history and sociology It is argued that recent attempts from within economics to address the social and the historical have failed to acknowledge long standing debates amongst economists historians and other social scientists This has resulted in an impoverished historical and social content within mainstream economics The book ranges over the shifting role of the historical and the social in economic theory the shifting boundaries between the economic and the non economic all within a methodological context Schools of thought and individuals that have been neglected or marginalised are treated in full including classical political economy and Marx the German and British historical schools American institutionalism Weber and Schumpeter and their programme of Social konomik and the Austrian school At the same time developments within the mainstream tradition from marginalism through Marshall and Keynes to general equilibrium theory are also scrutinised and the clashes between the various camps from the famous Methodenstreit to the fierce debates of the 1930s and beyond brought to the fore The prime rationale underpinning this account drawn from the past is to put the case for political economy back on the agenda This is done by treating economics as a social science once again rather than as a positive science as has been the inclination since the time of Jevons and Walras It involves transcending the boundaries of the social sciences but in a particular way that is in exactly the opposite direction now being taken by economics imperialism Drawing on the rich traditions of the past the reintroduction and full incorporation of the social and the historical into the main corpus of political economy will be possible in the future Economic Growth and Development in Africa

Horman Chitonge, 2015-01-09 In recent years Africa has undergone the longest period of sustained economic growth in the continent's history drawing the attention of the international media and academics alike This book

analyses the Africa Rising narrative from multidisciplinary perspectives offering a critical assessment of the explanations given for the poor economic growth and development performance in Africa prior to the millennium and the dramatic shift towards the new Africa Bringing in perspectives from African intellectuals and scholars many of whom have previously been overlooked in this debate the book examines the construction of Africa s economic growth and development portraits over the years It looks at two institutions that play a vital role in African development providing a detailed explanation of how the World Bank and the IMF have interpreted and dealt with the African challenges and experiences The insightful analysis reveals that if Africa is rising only 20 30 per cent of Africans are aboard the rising ship and the main challenge facing the continent today is to bring on board the majority of Africans who have been excluded from growth This book makes the complex and sometimes confusing debates on Africa s economic growth experience more accessible to a wide range of readers interested in the Africa story It is essential reading for students and researchers in African Studies and will be of great interest to scholars in Development Studies Political Economy and Development Economics *Technical Paper (United States.
