childhood impressions It does not see it does not hear it does not recognize past or future it lives and remains in the present This knowledge is vital in communicating with the human operating system I thoroughly discuss childhood impressions and their impact on our lives as adults This book can literally change your life The brain its job is not personal development or goal achievement its job is survival to keep you alive And please note the brain is not the mind mind is what the brain produces Combining all of these creates an algorithm a code a program for your brain and your mind You can speak to each mind and your brain in the language each understands You are the programmer you write the code You create the blueprint Think of your brain as a computer and the subconscious and the conscious mind as two separate hard drives Each hard drive has its own software program or apps Think of the people places and things in your life as the icons on your computer desktop or mobile phone iPad or tablet You click and you open an app and run a program You click X and you close the app or program Your brain and minds operate the same way Your brain is the pharmacy your mind writes the prescription Samuel Arcelay     **Your Mind** Linda Joy Rose,1999     *Your MIND and How to Use It* William Parker Atkinson,2020-04-10 It is not enough merely to have a sound mind one must also learn how to use it if he would become mentally efficient ATKINSON William Walker Atkinson was an merchant publisher and author as well as an occultist and an American pioneer of the New Thought movement This book Your Mind and How to Use It is a series of lessons in psychic influence thought force concentration will power and practical mental science It s a practical guide to the psychology of the mind that you can apply to your everyday life Excerpt In connection with this subject we herewith call the attention of the student to the well known Primary Laws of Thought which have been recognized as valid from the time of the ancient Greek logicians These laws are self evident and are uncontradictable They are axiomatic Jevons says of them Students are seldom able to see at first their full meaning and importance All arguments may be explained when these self evident laws are granted and it is not too much to say that the whole of logic will be plain to those who will constantly use these laws as their key Here are the Three Primary Laws of Thought I Law of Identity Whatever is is II Law of Contradiction Nothing can both be and not be III Law of Excluded Middle Everything must either be or not be there is no middle course     *Your Mind and How to Use It: A Manual of Practical Psychology* William Atkinson,2021-12-02     **Learn Yourself: a Manual for the Mind - Companion Book** ,2013-08-30 The mind is a jungle And like any jungle this one requires a field guide for survival Paired with the original Learn Yourself A Manual for the Mind this companion book offers the reader a hard hitting course in navigating life and its mental perils Building on the first volume s comprehensive yet accessible framework this sequel focuses on mental survival as to create a field guide for the jungle within everyone By moving beyond the psychological basics laid down in the parent book these advanced techniques propel the reader to a new level of empowerment as to defend against even the most devastating of circumstances and experiences Learn how to Think in terms of mental survival Use the power of choice and belief Avoid bad reactions and their damaging consequences Adopt an attitude of vigilance Improve and enhance memory
