

THE PRINCIPLES OF INSTRUCTION

TAKEN FROM THE INTERNATIONAL ACADEMY OF EDUCATION

This poster is from the work of Barak Rosenshine who based these ten principles of instruction on:

- research on how the brain acquires and uses new information
- research on the classroom practices of those teachers whose students show the highest gains
- findings from studies that taught learning strategies to students.

01 DAILY REVIEW

Daily review is an important component of instruction. It helps strengthen the connections of the material learned. Automatic recall frees working memory for problem solving and creativity.

02 NEW MATERIAL IN SMALL STEPS

Our working memory is small, only handling a few bits of information at once. Avoid its overload — present new material in small steps and proceed only when first steps are mastered.

03 ASK QUESTIONS

The most successful teachers spend more than half the class time lecturing, demonstrating and asking questions. Questions allow the teacher to determine how well the material is learned.

04 PROVIDE MODELS

Students need cognitive support to help them learn how to solve problems. Modelling, worked examples and teacher thinking out loud help clarify the specific steps involved.

05 GUIDE STUDENT PRACTICE

Students need additional time to rephrase, elaborate and summarise new material in order to store it in their long-term memory. More successful teachers built in more time for this.

06 CHECK STUDENT UNDERSTANDING

Less successful teachers merely ask "Are there any questions?" No questions are taken to mean no problems. False. By contrast, more successful teachers check on all students.

07 OBTAIN HIGH SUCCESS RATE

A success rate of around 80% has been found to be optimal, showing students are learning and also being challenged. Better teachers taught in small steps followed by practice.

08 SCAFFOLDS FOR DIFFICULT TASKS

Scaffolds are temporary supports to assist learning. They can include modelling, teacher thinking aloud, cue cards and checklists. Scaffolds are part of cognitive apprenticeship.

09 INDEPENDENT PRACTICE

Independent practice produces 'overlearning' — a necessary process for new material to be recalled automatically. This ensures no overloading of students' working memory.

10 WEEKLY & MONTHLY REVIEW

The effort involved in recalling recently-learned material embeds it in long-term memory. And the more this happens, the easier it is to connect new material to such prior knowledge.

Basic Principles and Practices in Analytical Techniques

Radhika Chelamalla,2019-11-30 The present textbook serves the practical requirements of the analysts This context is mostly helpful for converting theory to practical knowledge The product quality can be improved all along during manufacturing or in process time i e initially from the raw material to the finished product during this process the frequent analysis is needed due to which the analytical role has been increased For this high skilled analysts like those who have proper analytical knowledge are required I am sure that it can be attained by knowing about the analytical methodologies mentioned in this handbook In recent days it is easy to gain the theoretical knowledge through a number of books and suggestions from teachers but it is little bit hard to apply the same in developing the analytical methodologies which has a prominent role in the development of newer drugs and regular analysis The book stands as a firm support to carry out Good Laboratory Practices as it holds the matter about standard operating procedures as well as the calibration of various equipment Details about instrumentation and chemical analysis principles are not covered but this contains methodologies which are helpful for the analysis of different dosage forms The context is provided in simple language and is also explained by appropriate diagrams wherever needed This book will be accepted by the students and also teachers of pharmacy Hope this brings special interest not only in the subject but also in the field of analysis Additionally it also serves to the postgraduates researchers and also analytical chemists in various departments of pharmacy
