Gottschalk-Gleser Content Analysis Scales Louis August Gottschalk, Carolyn N. Winget, Goldine C. Gleser, 1969

Content Analysis of Verbal Behavior Louis A. Gottschalk, Fernando Lolas, Linda L. Viney, 2012-12-06 The psychological states of patients with diabetes mellitus were compared with those of patients suffering from other chronic diseases and people with no diagnosed chronic diseases These states were assessed by applying content analysis scales to transcripts of their descriptions of their current experiences Analyses of the diabetics scale scores revealed a pattern characterized by much anxiety depression anger expressed both directly and indirectly together with feelings of helplessness The sources of anxiety which proved to be of most importance to them were fears of death and bodily mutilation as well as guilt and shame They experienced little sense of sharing with most people around them although they showed considerable enjoyment of close relationships with family and friends This pattern of psychological states did not vary with the sex of the patients or whether they were interviewed in a hospital or at home nor with recency of onset or multiplicity of health problems It was similar to the pattern of patients with other chronic diseases but differed significantly from that of the healthy group Acknowledgment The authors wish to acknowledge the contribution of Carol Preston to the collection and analysis of these data which were made available in part by patients of the Wollongong Hospital and members of the Illawarra Branch of the Diabetic Association of New South Wales References 1 Strong JA Baird JD 1971 Diseases of the endocrine system In Davidson S McLeod J eds The principles and practice of medicine Text Analysis for the Social Sciences Carl W. Roberts, 2020-07-24 This book provides descriptions and illustrations of cutting edge text analysis methods for communication and marketing research cultural historical comparative and event analysis curriculum evaluation psychological diagnosis language development research and for any research in which statistical inferences are drawn from samples of texts Although the book is accessible to readers having no experience with content analysis the text analysis expert will find substantial new material in its pages In particular this collection describes developments in semantic and network text analysis methodologies that heretofore have been accessible only among a smattering of methodology journals The book's international and cross disciplinary content illustrates the breadth of quantitative text analysis applications These applications demonstrate the methods utility for international research as well as for practitioners from the fields of sociology political science journalism communication computer science marketing education and English This is an ecumenical collection that contains

applications not only of the most recent semantic and network text analysis methods but also of the more traditional thematic method of text analysis In fact it is originally with this volume that these two relational approaches to text analysis are defined and contrasted with more traditional thematic text analysis methods The emphasis here is on application The book's chapters provide guidance regarding the sorts of inferences that each method affords and up to date descriptions of the human and technological resources required to apply the methods Its purpose is as a resource for making quantitative text analysis methods more accessible to social science researchers

Language in Psychotherapy Robert L. Russell, 2013-11-21 This book of original contributions presents investigations of psychotherapeutic interaction While the methodological strategies and the theoretical orientations of these investigations are notably diverse the utterance by utterance analysis of client therapist dialogue provides a strong commonality of interest and a particularly productive perspective from which the process of psychotherapy can be illuminated It is hoped that the contributions selected and the problems with which they are occupied will make evident the rich possibilities such a perspective has to offer It should be noted however that the present volume is not a compendium any effort to be exhaustive would be thwarted by considerations of length alone Thus certain omissions were inevitable It is hoped that the interested reader will use the extensive references to become acquainted with the works not here included Whatever effort I extended as editor and contributor to this volume could not have been undertaken without the lifelong spirit of support of my parents Selma S and Jay F Russell I dedicate my contribution to them

The Measurement of Psychological States Through the Content Analysis of Verbal Behavior Louis A. Gottschalk, Goldine C. Gleser, 2023-11-15 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1969

The Measurement of Psychological States Through the Content Analysis of Verbal Behavior Goldine C. Gleser, **The Concept of Defense Mechanisms in Contemporary Psychology** Uwe Hentschel, Gudmund J.W. Smith, Wolfram Ehlers, Juris G. Draguns, 2012-12-06 What is the scientific status and the truth value of the concept of defense mechanisms Among contemporary psychologists three types of answers to this question may be expected Some would wholeheartedly endorse the theoretical clinical and research value of this notion others would reject it outright Between these two extremes a large number of observers perhaps the majority would suspend their judgment Their attitude compounded of hope and doubt would capitalize on defense as an interesting and promising concept At the same time these psychologists would express skepticism and disappointment over its clinical limitations theoretical ambiguity and research failures The present volume is primarily addressed to the audience of hopeful skeptics those who have not given up on the notion of defense yet

have been frustrated by the difficulties of incorporating it into the modern streamlined structure of psychology To this end we have brought together theoretical and empirical contributions germane to defense together with reports about their applications to clinical and personality assessment especially in relation to psychopathology psychosomatics and psychotherapeutic intervention **Psychopharmacology Bulletin** ,1979 **Children in the Holocaust and its Aftermath** Sharon Kangisser Cohen,Eva Fogelman,Dalia Ofer,2017-04-01 The testimonies of individuals who survived the Holocaust as children pose distinct emotional and intellectual challenges for researchers as now adult interviewees recall profound childhood experiences of suffering and persecution they also invoke their own historical awareness and memories of their postwar lives requiring readers to follow simultaneous disparate narratives This interdisciplinary volume brings together historians psychologists and other scholars to explore child survivors accounts With a central focus on the Kestenberg Holocaust Child Survivor Archive s over 1 500 testimonies it not only enlarges our understanding of the Holocaust empirically but illuminates the methodological theoretical and institutional dimensions of this unique form of historical record *Computer-Assisted Text Analysis* Roel Popping,2000-02-28 Computer Assisted Text Analysis provides an up to date guide to the methods for the computer based quantitative analysis of texts It concentrates on the methodological and practical issues of coding and handling data *Psychotherapy Change Measures* Irene Elkin Waskow,Morris B. Parloff,1975

The Process of Psychotherapy Donald J. Kiesler,2017-09-29 To understand the process of psychotherapeutic change one must look for the answers in the psychotherapeutic process itself This process involves the exchange of communications between two or more participants and as a result of the exchange modifications in the personality and behavior of the patient are expected to occur But what is the nature of the therapeutic messages How do they produce changes in the patient What aspects of the messages are important for therapeutic change And if the therapeutic force is somehow encoded in the messages where shall we look for it in sentence structure in emotional overtones in gestures and body movements The Process of Psychotherapy is divided into two major parts dealing respectively with method and with systems In Part I the author presents an analysis of psychotherapy process research from a communications perspective developing an incisive and detailed analysis of the methodological issues that confront researchers in this field and suggesting theoretical and empirical strategies for addressing these issues Part II provides the first exhaustive and detailed summary of extant psychotherapy process systems The author first deals with direct systems those procedures of content analysis or rating scales that have been developed to assess the exchanges between therapists and patients Seventeen major direct process systems are presented in detail and are summarized with ample citations to the literature The final section of the book offers an exhaustive listing and concise description of various indirect measures of psychotherapy process which do not assess the verbatim interview exchanges of the participants in therapy but rather assess the participants perceptions via self report or standard analogue procedures This book is a basic sophisticated and exhaustive coverage of psychotherapy process and

content analysis that will become the standard and authoritative source for anyone interested in the process of psychotherapy whether as student researcher or practitioner The Dyadic Transaction Samuel Eisenstein, Norman A Levy, Judd Marmor, 2018-01-18 The Dyadic Transaction presents unique pioneering research on the nature of the psychoanalytic therapeutic process by three leading practitioners The volume demonstrates that the process of psychotherapy is a consequence of reciprocal interaction between the psychotherapist and the patient rather than merely the result of actions of the therapist shedding an important light on how and why psychotherapy works A team of three experienced psychoanalysts discretely and independently recorded their personal observations during a series of therapy sessions At the same time the psychoanalyst conducting the therapy also recorded impressions of each session The results show that the therapist is actually an active participant in verbal and nonverbal interaction Nonverbal aspects of this exchange are a thoroughly original aspect of this study Originated by Franz Alexander one of the great pioneers in psychoanalysis and psychiatry this experimental approach offers valuable insight into the nature of the psychotherapeutic process The basic findings outlined here foreshadow many of the results and new methods of research in subsequent psychoanalytic studies and continue to be highly relevant today The Dyadic Transaction is a necessary source of material for psychotherapists psychoanalysts psychologists and psychiatrists *Crazy Talk* Sherry Rochester, 2013-04-17 This book is a study of discourse the flow of talk of schizophrenic speakers Our goal is to understand the processes which account for the ordinary flow of talk that happens all the time between speakers and listeners How do conversations happen What is needed by a listener to follow a speaker's words and respond appropriately to them How much can a speaker take for granted and how much must be stated explicitly for the listener to follow the speaker's meanings readily and easily Each time we ask these questions we seem to have to go back to some place prior to the ordinary adult conversation This time we have tried reversing the questions and asking What happens when conversation fails Prompted in part by an early paper by Robin Lakoff to the Chicago Linguistics Society and by Herb Clark's studies of listener processes we wondered what a speaker has to do to make the listener finally stop making allowances and stop trying to adjust the conversational contract to cooperate This inquiry led us to the schizophrenic speaker When a listener decides that the speaker's talk is crazy he or she is giving up on the normal form of conversation and saying in effect this talk is extraordinary and something is wrong We thought that if we could specify what makes a conversation fail we might learn what has to be present for a conversation to succeed

Defense Mechanisms Uwe Hentschel, Gudmund Smith, Juris G Draguns, Wolfram Ehlers, 2004-06-12 The book is focused on defense mechanisms as theoretical constructs as well as the possibilities of their empirical registration by different methods and the application of these constructs in different fields of psychology with special regard to concurrent and predictive validity It is argued that defense mechanisms are in many ways to be seen as integrative constructs not necessarily restricted to psychoanalytic theory and that the potential fields of their application have a wide ranging scope comprising

many fields of psychology Consequently empirical studies are presented from the fields of clinical and personality psychology psychotherapy research and psychosomatic phenomena and diseases Methodological questions have a heavy weight in most of these studies Provides coverage of relevant literature Covers different fields of application Attempts an integration of the construct of defense mechanisms into mainstream psychology Provides explanations of the theoretical basis of the construct of defense mechanisms

Psychodynamic Social Work Jerrold R. Brandell, 2004-10-27 A comprehensive guide to psychodynamic clinical practice within a contemporary social work treatment context this book incorporates a number of different theoretical models in tandem with more than thirty five diverse case illustrations Case studies are derived from an assortment of venues including inpatient and outpatient mental health family service residential treatment corrections and private practice Using traditional psychoanalytic theory as a point of departure Psychodynamic Social Work reflects the richness of current thinking in psychoanalysis and dynamic psychotherapy and addresses such important topics as o the unique relationship between social work and psychoanalysis o psychosocial development and dysfunction o strategies for beginning therapy and establishing a relationship between therapist and client o understanding and using the client s transference and the therapist s countertransference to clinical advantage o the clinical process from dynamic assessment through termination including client resistance to treatment as a central challenge o methods for treating children and adolescents o brief and time limited therapy and dynamically oriented case management o the focal conflict model an instrument for analyzing a client s based on changes in speech that is used for clinical instruction as well as in single case research and clinical supervision
