Manual Of Online Search Strategies Humanities And Social Sciences:

Manual of Online Search Strategies C. J. Armstrong, J. A. Large, 2001 Comprehensively updated this three volume edition of the Manual of Online Search Strategies covers the whole range of Internet CD ROM and dial up online services and includes several new chapters International experts on each subject area selected from the UK and North America describe in detail how to identify and exploit specialist bibliographic and non bibliographic databases the best search methods and delivery modes and the relative merits of different services and online hosts in their different disciplines Numerous examples of search results are used to illustrate different strategies and commands Each volume includes the editors introductory chapter on search strategies which gives an overview of searching language platforms and vendors interfaces and search and database evaluation methods Volume III incorporates a new chapter on education in addition to the updated chapters from the last edition The Manual can be used as a subject handbook a directory of recommended resources and as a textbook This new edition provides extensive guidance for searchers of electronic information and is particularly useful for those working in a subject area other than their own Readers will gain a professional edge from the skill and wisdom that the specialist authors have passed on in their chapters and will be able to expand their searching techniques into new areas **Manual of**

Online Search Strategies C.J. Armstrong, J.A. Large, 2018-12-20 Published in 1992 like the first this second edition is not intended as introductory textbook command driven Boolean searching It is targeted at online searchers who already have some knowledge of command languages and may be proficient searchers on databases in one or two subject areas but when required to venture into new and less familiar territory still need guidance It is also offered to end users who possess the subject expertise but lack of information retrieval know how The Manual is offered as a guide to database selection and a navigational aid through the twists and turns of the retrieval maze at least some of the dead ends and backtracking may thereby be avoided This volume written by experts in their various fields deals with the subject coverage and record structures of specific databases offers comparisons between databases context indexing procedures updating policies etc discusses the choice between online and CD ROM sources and between hosts if online is selected and illustrates strategies with numerous search extracts Information Sources in the Social Sciences David Fisher, Sandra Price, Terry

Hanstock, 2018-02-19 No detailed description available for Information Sources in the Social Sciences **Women Online** Steven D. Atkinson, Judith Hudson, 1990 Women Online focuses on the problems of investigating interdisciplinary topics in women s studies working with controlled vocabularies and inconsistent indexing and locating feminist scholarship The authoritative contributors to the book not only analyze these problems in general terms but also suggest practical strategies for making online research more effective and productive The sixteen chapters in this much needed book are organized into three broad categories covering disciplines such as humanities and social sciences format of the material covered such as non bibliographic and cited reference databases and specific topics such as lesbian studies and women of color Chapter

authors employ a variety of useful methods to analyze issues of coverage and content They compare the results of controlled vocabulary and free text or full text searching and make use of search examples cited reference and multi file searching and bibliometric techniques including analysis of recall precision overlap relevancy uniqueness and trends in file growth The Database Matrix provides an alphabetical listing of files discussed in the book and serves as a directory for online research in women s studies Women Online will be useful to librarians scholars and students who search databases as well as to producers who design and market them

Evidence-Based Policy Ray Pawson,2006-04-07 In this important new book Ray Pawson examines the recent spread of evidence based policy making across the Western world Few major public initiatives are mounted these days in the absence of a sustained attempt to evaluate them Programmes are tried tried and tried again and researched researched and researched again And yet it is often difficult to know which interventions and which inquiries will withstand the test of time The evident solution going by the name of evidence based policy is to take the longer view Rather than relying on one off studies it is wiser to look to the weight of evidence Accordingly it is now widely agreed the most useful data to support policy decisions will be culled from systematic reviews of all the existing research in particular policy domains This is the consensual starting point for Ray Pawson s latest foray into the world of evaluative research But this is social science after all and harmony prevails only in the first chapter Thereafter Pawson presents a devastating critique of the dominant approach to systematic review namely the meta analytic approach as sponsored by the Cochrane and Campbell collaborations In its place is commended an approach that he terms realist synthesis On this vision the real purpose of systematic review is better to understand programme theory so that policies can be properly targeted and developed to counter an ever changing landscape of social problems The book will be essential reading for all those who loved or loathed the arguments developed in Realistic Evaluation Sage 1997 It offers a complete blueprint for research synthesis supported by detailed illustrations and worked examples from across the policy waterfront It will be of especial interest to policy makers practitioners researchers and students working in health education employment social care criminal justice regeneration and welfare

Librarian's Guide to Online Searching Christopher C. Brown,2021-06-18 Updates the premier textbook for students and librarians needing to know the landscape of current databases and how to search them Librarians need to know of existing databases and they must be able to teach search capabilities and strategies to library users This practical guide introduces librarians to a broad spectrum of fee based and freely available databases and explains how to teach them The updated 6th edition of this well regarded text covers new databases on the market as well as updates to older databases It also explains underlying information structures and demonstrates how to search most effectively It introduces readers to several recent changes such as the move away from metadata based indexing to full text indexing by vendors covering newspaper content Business databases receive greater emphasis As in the previous editions this book takes a real world approach covering topics from basic and advanced search tools to online subject databases Each chapter

includes a thorough discussion a recap concrete examples exercises and points to consider making it an ideal text for courses in database searching as well as a trustworthy professional resource
