Handbook of Polymers in Paper Conservation**

Elisabetta Princi, 2011-10-31 This book describes the latest developments in paper conservation by using polymeric materials. A short introduction on polymer chemistry is given to highlight the polymer characteristics and properties. The book is then dedicated to the conservative problems and issues in the field of paper artworks. This practical book identifies the importance of each type of polymer related to its nature and properties from the point of view of paper conservation. With the help of schemes and tables the polymers are classified in terms of characteristics and final uses in respect to this very complex material.

Mineralogical Analysis Applied to Forensics Mariano Mercurio, Alessio Langella, Rosa Maria Di Maggio, Piergiulio Cappelletti, 2022-11-22 This book illustrates the main modern mineralogical analytical procedures that can be applied for forensic purposes on various typologies of materials and substances and has both theoretical and practical approach. Moreover, it focuses on all those challenges that can arise with forensic analysis such as the choice of the most proper mineralogical techniques as a function of the material and its quantity, destructive and non-destructive analyses, sampling procedures, mineralogical analysis of micro traces, correct preparation of the samples, correct calibration and analytical conditions of the laboratory instrumentation. Numerous case studies on criminal offenses against persons, environment and cultural heritage are illustrated.
