El-Hi Textbooks & Serials in Print, 2000 ,2000 **Maps of War** Jeremy Black, 2018-10-18 A magnificent visual survey of how conflict was recorded and planned using maps produced at the time to reveal how warfare and its documentation has changed through the centuries There is little documented mapping of conflict prior to the Renaissance period but from the 17th century onwards military commanders and strategists began to document the wars in which they were involved and later to use mapping to actually plan the progress of a conflict Using contemporary maps this sumptuous new volume covers the history of the mapping of war on land and shows the way in which maps provide a guide to the history of war Content includes The beginnings of military mapping up to 1600 including the impact of printing and the introduction of gunpowder The seventeenth century The focus is on maps to illustrate war rather than as a planning tool and the chapter considers the particular significance of maps of fortifications The eighteenth century The growing need for maps on a world scale reflects the spread of European power and of transoceanic conflict between Europeans This chapter focuses in particular on the American War of Independence The nineteenth century Key developments included contouring and the creation of military surveying Subjects include the Napoleonic Wars and the American Civil War The twentieth century including extended features on the First and Second World Wars including maps showing trench warfare and aerial reconnaissance Much of the chapter focuses on the period from 1945 to the present day including special sections on the Vietnam War and the Gulf Wars *Maps and Politics* Jeremy Black, 2000-09-01 We all rely on the apparent accuracy and objectivity of maps but often do not see the very process of mapping as political Are the power and purpose of maps inherently political *Maps and Politics* addresses this important question and seeks to emphasize that the apparent objectivity of the map making and map using process cannot be divorced from aspects of the politics of representation Maps have played and continue to play a major role in both international and domestic politics They show how visual geographical representations can be made to reflect and advance political agendas in powerful ways The major developments in this field over the last century are responses both to cartographic progression and to a greater emphasis on graphic imagery in societies affected by politicization democratization and consumer and cultural shifts Jeremy Black asks whether bias free cartography is possible and demonstrates that maps are not straightforward visual texts but contain political and politicizing

Congress, 1844 *Globi Neerlandici* Peter van der Krogt, 2024-08-19 With bibliography of globes made in the Low Countries ca 1525 1800 **A History of the World in 12 Maps** Jerry Brotton, 2013-11-14 A New York Times Bestseller Maps allow the armchair traveler to roam the world the diplomat to argue his points the ruler to administer his country the warrior to plan his campaigns and the propagandist to boost his cause rich and beautiful Wall Street Journal Throughout history maps have been fundamental in shaping our view of the world and our place in it But far from being purely scientific objects maps of the world are unavoidably ideological and subjective intimately bound up with the systems of power and authority of particular times and places Mapmakers do not simply represent the world they construct it out of the ideas of their age In this scintillating book Jerry Brotton examines the significance of 12 maps from the almost mystical representations of ancient history to the satellite derived imagery of today He vividly recreates the environments and circumstances in which each of the maps was made showing how each conveys a highly individual view of the world Brotton shows how each of his maps both influenced and reflected contemporary events and how by considering it in all its nuances and omissions we can better understand the world that produced it Although the way we map our surroundings is more precise than ever before Brotton argues that maps today are no more definitive or objective than they have ever been Readers of this beautifully illustrated and masterfully argued book will never look at a map in quite the same way again A fascinating and panoramic new history of the cartographer's art The Guardian The intellectual background to these images is conveyed with beguiling erudition There is nothing more subversive than a map The Spectator A mesmerizing and beautifully illustrated book The Telegraph **World History** Candice Goucher, Linda Walton, 2013-03-12 World History Journeys from Past to Present uses common themes to present an integrated and comprehensive survey of human history from its origins to the present day By weaving together thematic and regional perspectives in coherent chronological narratives Goucher and Walton transform the overwhelming sweep of the human past into a truly global story that is relevant to the contemporary issues of our time Revised and updated throughout the second edition of this innovative textbook combines clear chronological progression with thematically focused chapters divided into six parts as follows PART 1 EMERGENCE Human origins to 500 CE PART 2 ORDER 1 CE 1500 CE PART 3 CONNECTIONS 500 1600 CE PART 4 BRIDGING WORLDS 1300 1800 CE PART 5 TRANSFORMING LIVES 1500 1900 PART 6 FORGING A GLOBAL COMMUNITY 1800 Present The expanded new edition features an impressive full color design with a host of illustrations maps and primary source excerpts integrated throughout Chapter opening timelines supply context for the material ahead while end of chapter questions and annotated additional resources provide students with the tools for independent study Each chapter and part boasts introductory and summary essays that guide the reader in comprehending the relevant theme In addition the companion website offers a range of resources including an interactive historical timeline an indispensable study skills

Ships on Maps Richard W. Unger,2010-08-04 Renaissance map makers produced ever more accurate descriptions of geography which were also beautiful works of art They filled the oceans Europeans were exploring with ships and to describe

Globalization in Practice N. J. Thrift, Adam Tickell, Steve Woolgar, William H. Rupp, 2014 The concept of globalization has become ubiquitous in social science and in the public consciousness and is often invoked as an explanation for a diverse range of changes to economies societies politics and cultures both as a positive liberating force and as a wholly negative one While our understanding of the politics economics and social resonance of the phenomenon has become increasingly sophisticated at the macro level this book argues that globalization too often continues to be depicted as a set of extra terrestrial forces with no real physical manifestation except as effects The essays challenge this dominant understanding of globalization from above through explorations of the mundane means by which globalization has been achieved Instead of a focus on the meta political economy of global capitalism the book concentrates on the everyday life of capitalism the not so little things that keep the large forces of globalization ticking over With its eye on the mundane the book demonstrates that a series of everyday and consequently all but invisible formations critically facilitate and create the conditions under which globalization has flourished The emphasis is on concrete moments in the history of capitalism when these new means of regular reproduction were invented and deployed Only by understanding these infrastructures can we understand the dynamics of globalization In short punchy essays by distinguished researchers from across a range of disciplines this book provides a new way of understanding globalization moving away from the standard accounts of global forces economic flows and capitalist dynamics to show how ordinary practices and artefacts are crucial elements and symbols of globalization
