Maple for Environmental Sciences Bill Scott,2011-05-12 Maple® for Environmental Sciences Bill Scott, 2001-04-24 A presentation of what Maple can do and how it does it in the context of environmental sciences The text includes introductory tutorials in each chapter combined with extensive marginal comments which are followed by a complete application These include the contouring of water table data the physical chemistry of kidney stones and acid rain The book also provides a special application to enable students to use self help in the case that Maple seem unable to do the Maple® for Environmental Sciences Bill Scott, 2012-12-06 What is this book about Please take this book simplest things as it is a working docu ment It started as an idea that has grown It will never be correct but should be self correcting In the limit if there is one the book should approach a correct state It is not the detail and the numbers that matter but the structures and the order These structures are inherently linked with the many minds that have made Maple the minds of perhaps the best mathematicians certainly some of the most useful Our environment is not separate from mathematics mathematics is but one tool of several to help with understanding the environment It is a harsh tool that requires numbers and symbolism Maple handles the symbolism superbly numbers need more consideration We have included a substantial amount on reading and writing numbers data and dealing with floating point numbers It is the devil in the detail that continually comes back to us in working with Mathematics and Maple It becomes raw and defined Many of the things we do have rational and logical bases but we don't know what they are Often in following the code and talking with an input line to Maple the detailed way of performing a task becomes clear But not without frustration the task is invariably simple though
