**Spying with Maps** Mark Monmonier,2004-04 Maps as we know help us find our way around But they re also powerful tools for someone hoping to find you Widely available in electronic and paper formats maps offer revealing insights into our movements and activities even our likes and dislikes In *Spying with Maps* the mapmatician Mark Monmonier looks at the increased use of geographic data satellite imagery and location tracking across a wide range of fields such as military intelligence law enforcement market research and traffic engineering Could these diverse forms of geographic monitoring he asks lead to grave consequences for society To assess this very real threat he explains how geospatial technology works what it can reveal who uses it and to what effect Despite our apprehension about surveillance technology *Spying with Maps* is not a jeremiad crammed with dire warnings about eyes in the sky and invasive tracking Monmonier s approach encompasses both skepticism and the acknowledgment that geospatial technology brings with it unprecedented benefits to governments institutions and individuals especially in an era of asymmetric warfare and bioterrorism Monmonier frames his explanations of what this new technology is and how it works with the question of whether locational privacy is a fundamental right Does the right to be left alone include not letting Big Brother or a legion of Little Brothers know where we are or where we ve been What sacrifices must we make for homeland security and open government With his usual wit and clarity Monmonier offers readers an engaging even handed introduction to the dark side of the new technology that surrounds us from traffic cameras and weather satellites to personal GPS devices and wireless communications

**NIJ Research Portfolio** ,2000 National Institute Of Justice, Research Portfolio 4th Edition, June 2000 ,2000 **Critical Mass** Dinur Blum,Christian Jaworski,2021-09-27 This book examines social patterns in 2 000 mass shootings in the United States between 2013 through 2020 While mass shootings are often described as psychological the authors show that there are social factors that produce the anger needed to commit a mass shooting These factors are fairly common and can be addressed to stem the anger earlier The factors include chronic poverty sudden unemployment relationship problems domestic violence social isolation and alcohol Common social strains can metastasize and be lethally dangerous By understanding the social factors we can reduce the anger and frustration people feel that would drive them to killing others

**Applications of Geographical Offender Profiling** Donna Youngs,2017-03-02 Many law enforcement agencies are now analyzing where a crime is committed to develop predictions on the offender their location and other factors that could help with the investigation Known as Geographical Offender Profiling GOP this approach relies on a combination of principles and methodologies drawn from many different disciplines including psychology geography criminology and forensic science This book brings together a

cross section of the major papers published in the field of GOP to explain the scope and application of GOP in different criminal contexts For the first time some widely quoted but difficult to obtain classic papers have been published together with an introduction that provides an up to the minute context and an extensive bibliography of the most relevant publications in this burgeoning area of study      **Handbook of Policing** Tim Newburn,2012-08-21 This new edition of the Handbook of Policing updates and expands the highly successful first edition and now includes a completely new chapter on policing and forensics It provides a comprehensive but highly readable overview of policing in the UK and is an essential reference point combining the expertise of leading academic experts on policing and policing practitioners themselves

**Urban and Regional Data Management** Massimo Rumor,Volker Coors,Elfriede M. Fendel,Sisi Zlatanova,2007-10-04 Spatial technologies like GIS CAD and spatial DBMS have proved their applicability and usability in almost every sector of urban development Urban Planning Systems Public Participation Systems and others have been continuously developed and improved contributing to better decision making communicating ideas between different actors as well as      *The Rise of Big Data Policing* Andrew G. Ferguson,2017-10-03 Winner 2018 Law Legal Studies PROSE Award The consequences of big data and algorithm driven policing and its impact on law enforcement In a high tech command center in downtown Los Angeles a digital map lights up with 911 calls television monitors track breaking news stories surveillance cameras sweep the streets and rows of networked computers link analysts and police officers to a wealth of law enforcement intelligence This is just a glimpse into a future where software predicts future crimes algorithms generate virtual most wanted lists and databanks collect personal and biometric information The Rise of Big Data Policing introduces the cutting edge technology that is changing how the police do their jobs and shows why it is more important than ever that citizens understand the far reaching consequences of big data surveillance as a law enforcement tool Andrew Guthrie Ferguson reveals how these new technologies viewed as race neutral and objective have been eagerly adopted by police departments hoping to distance themselves from claims of racial bias and unconstitutional practices After a series of high profile police shootings and federal investigations into systemic police misconduct and in an era of law enforcement budget cutbacks data driven policing has been billed as a way to turn the page on racial bias But behind the data are real people and difficult questions remain about racial discrimination and the potential to distort constitutional protections In this first book on big data policing Ferguson offers an examination of how new technologies will alter the who where when and how we police These new technologies also offer data driven methods to improve police accountability and to remedy the underlying socio economic risk factors that encourage crime The Rise of Big Data Policing is a must read for anyone concerned with how technology will revolutionize law enforcement and its potential threat to the security privacy and constitutional rights of citizens Read an excerpt and interview with Andrew Guthrie Ferguson in The Economist      **Principles of Geographical Offender Profiling** David Canter,Donna Youngs,2017-03-02 Geographical Offender Profiling GOP is the term that has emerged for the examination of

where offences take place and the use of that examination to formulate views on the nature of the offender and where s he might be based As such it has become the cornerstone of offender profiling By its nature GOP bridges psychology geography criminology and forensic science and is of academic interest to all those disciplines as well as practical significance to police investigators This book brings together a cross section of the major papers published in the field that lay out the concepts and foundations of this area including some widely quoted but difficult to obtain classic papers with an introduction that puts the papers into an overall context and a concluding extensive bibliography of the publications relevant to this rapidly growing area

Introductory Criminology Marcus Felson, Mary A. Eckert, 2017-12-04 Introductory Criminology The Study of Risky Situations takes a unique and intuitive approach to teaching and learning criminology Avoiding the fragmentation of ideas commonly found in criminology textbooks Marcus Felson and Mary A Eckert develop a more practical readable structure that engages the reader and enhances their understanding of the material Their descriptive categories simultaneously broad and realistic serve better than the usual philosophical categories such as positivism and classicalism to stimulate students interest and critical thinking Short chapters each broken into 5-7 sections describe situations in which crime is most likely to happen and explain why they are risky and what society can and can't do about crime They create a framework to organize ideas and facts and then link these categories to the leading theories developed by criminologists over the last 100 years With this narrative to guide them students remember the material beyond the final exam This fresh new text was created by two professors to address the main points they encounter in teaching their own criminology courses Problems solved include reluctant readers aversion to abstract thinking fear of theory and boredom with laundry lists of disconnected ideas Felson a leader in criminology theory with a global reputation for innovative thinking and Eckert an experienced criminal justice researcher are uniquely qualified to reframe criminology in a unified arc By design they offer abstractions that are useful and not overbearing their prose is readable and their concepts are easy to comprehend and remember This new textbook challenges instructors to re-engage with theory and present the essence of criminological thought for adult learners coaching students to grasp the concept before any label is attached and allowing them to emerge with deeper understanding of what each theory means and offers Lean with no filler or fluff like stock photos Introductory Criminology includes the authors graphics to crystallize and expand concepts from the text
