## **Marco Polo Dominican Republic:**

*Dominican Republic* Gesine Froes, 2000      **Democracy and War** David L. Rousseau, 2005-03-24 Conventional wisdom in international relations maintains that democracies are only peaceful when encountering other democracies Using a variety of social scientific methods of investigation ranging from statistical studies and laboratory experiments to case studies and computer simulations Rousseau challenges this conventional wisdom by demonstrating that democracies are less likely to initiate violence at early stages of a dispute Using multiple methods allows Rousseau to demonstrate that institutional constraints rather than peaceful norms of conflict resolution are responsible for inhibiting the quick resort to violence in democratic polities Rousseau finds that conflicts evolve through successive stages and that the constraining power of participatory institutions can vary across these stages Finally he demonstrates how constraint within states encourages the rise of clusters of democratic states that resemble zones of peace within the anarchic international structure      Shedding The Veil: Mapping The European Discovery Of America And The World Thomas Suarez, 1994-04-29 Shedding the Veil is a highly original overview of Europe's exploration and discovery beyond her own confines It tackles the subject via an analysis of maps dating from circa 1434 to 1865 with an emphasis on the period before 1600 The book begins with an appraisal of the peculiar circumstances which led late medieval Europe to pursue long distance travel both overland and by sea introduces cosmographic traditions inherited from classical times and investigates pre Columbian excursions into the western ocean Finally the great voyages and mappamundi of the early sixteenth century are described in depth After 1600 the focus begins to narrow North America and particularly to the colonization of the American Northeast All maps discussed in detail are illustrated 40 full page b w plates 25 full page color plates      **Coast Lines** Mark Monmonier, 2008-09-15 In the next century sea levels are predicted to rise at unprecedented rates causing flooding around the world from the islands of Malaysia and the canals of Venice to the coasts of Florida and California These rising water levels pose serious challenges to all aspects of coastal existence chiefly economic residential and environmental as well as to the cartographic definition and mapping of coasts It is this facet of coastal life that Mark Monmonier tackles in *Coast Lines* Setting sail on a journey across shifting landscapes cartographic technology and climate change Monmonier reveals that coastlines are as much a set of ideas assumptions and societal beliefs as they are solid black lines on maps Whether for sailing charts or property maps Monmonier shows coastlines challenge mapmakers to capture on paper a highly irregular land water boundary perturbed by tides and storms and complicated by rocks wrecks and shoals *Coast Lines* is peppered with captivating anecdotes about the frustrating effort to expunge fictitious islands from nautical charts the tricky measurement of a coastline's length and the contentious notions of beachfront property and public access Combing maritime history and the history of technology *Coast Lines* charts the historical progression from offshore sketches to satellite images and explores the societal impact of coastal cartography on everything from global warming to homeland security Returning to the form of his celebrated *Air Apparent*

Monmonier ably renders the topic of coastal cartography accessible to both general readers and historians of science technology and maritime studies In the post Katrina era when the map of entire regions can be redrawn by a single natural event the issues he raises are more important than ever **An Intellectual History of the Caribbean S.**

Torres-Saillant,2006-01-08 This is first intellectual history of the Caribbean written by a top Caribbean studies scholar The book examines both the work of natives of the region as well as texts interpretive of the region produced by Western authors Stressing the experimental and cultural particularity of the Caribbean the study considers major questions in the field

**The Age of Ecology** Joachim Radkau, 2014-04-03 This book is the first major study of the history of environmentalism from its origins in romanticism and the nature cults of the late 18th century to the global environmental movements of today Radkau shows that this is not a single story of the steady ascent of environmentalism but rather a multiplicity of stories each with its own dramatic tension between single issue movements and the challenges posed by the

interconnection of environmental issues between charismatic leaders and bureaucratic organizations and between grassroots movements and global players While the history can be traced back several centuries environmentalism has flourished since the environmental revolution of 1970 spurred on by the Chernobyl nuclear disaster in 1986 and the growing concern about global warming While environmentalists often opposed the scientific mainstream they were also often led by scientific knowledge Environmentalism is the true Enlightenment of our time so much so that we can call our era the age of ecology This timely and comprehensive global history of environmentalism will be essential reading for anyone concerned with the most pressing global issues of our time

[Introduction to Global Military History](#) Jeremy Black, 2014-06-03 This lucid account of military developments around the modern world begins with the American War of Independence and the French revolutionary wars and continues chronologically to the latest 21st century conflicts It combines determinedly global coverage with thought provoking analysis not only of the military aspects of conflict but also its social cultural political and economic dimensions and consequences By placing familiar events alongside the largely unknown the reader is forced to reassess the standard grand narrative of military history that rests on assumptions of Western cultural and technological superiority It will be essential reading for students worldwide whether studying modern military history modern world history history and international relations or war and society This fully updated second edition includes chapter introductions and conclusions to assist study and revision Voices of War sourced extracts from the field of conflict case studies in each chapter to support the narrative and provoke discussion a 12 page colour map section and over 20 other integrated maps annotated references from the latest publications in the field

[The World Wars - 1871-1945](#) Ruben Ygua, 2025-08-20 Traditional methods of studying the past have always given greater importance to nationalist religious and moral interests which subordinated the historical fact to the System point of view That s how we have been educated The time has come to simplify and show respect for our ancestors striving to know what really happened in the past and not just what they want to inform us about After so many years of studying History I came to the conclusion that the best study system is through an impartial objective Chronology that just put each event in its exact place in time revealing History without manipulation This Chronology contains not only purely political facts such as the

foundation of cities the birth of kingdoms and empires scientific and geographical discoveries natural disasters and epidemics it also includes information on the most different fields of human activity chemistry astronomy geography mathematics and so on In parallel the chronology is complemented by data that do not belong to a specific date but to an entire epoch they are each society generalities curiosities customs the religion of each civilization inventions or discoveries that cannot be placed in an exact date etc The result of all this set is one of the most complete chronologies within its reach periodically updated with the latest archaeological and scientific discoveries and that transforms the reader into an eyewitness of the past understanding the relation of geographically distant facts to each other but closely connected in time and influencing unexpected consequences This is something that traditional history has generally ignored when it was not usable A work of this magnitude could not be published in a single book so I have divided it into several collections and the Spanish originals are being translated into French English Italian and Portuguese The chronology goes from prehistory to the present day year by year as far as possible For those who prefer a deeper and more detailed study I have prepared a second chronology day by day which for now covers from 1789 to 1946 divided into five collections      Tourism Policy and Planning David L. Seaman, 2013-08-27 This detailed study is the only reference work of its kind to address Spain's conquest of Central and South America providing in depth coverage of native and European ideologies political motivations and cultural practices of the region As the study of world history evolves from a Eurocentric perspective to a more global viewpoint formerly marginalized groups are now the focus of discussion revealing a background rich with important military political social and economic achievements This book examines the once prosperous and powerful native civilizations in Central and South America discussing the key individuals strategies and politics that made these countries strong and indomitable In spite of this the author shows how in only a few generations Spain defeated these mini empires eventually dominating much of the Western Hemisphere *Conflict in the Early Americas An Encyclopedia*

of the Spanish Empire's Aztec Incan and Mayan Conquests focuses primarily on the defeat of the Aztec Incan and Mayan civilizations but also includes Spanish interactions with lesser known native groups Supporting documents including primary sources maps and visual aids provide necessary context to this once untold story      **Think You Know It All?** Dan Smith, 2011-02-01 Calling All Know It Alls Can you name an astronaut who has walked on the moon Pretty good but can you name all of them Can you name all of the Marx Brothers How about the Osmonds The Bee Gees The Jonas Brothers Can you identify trees based on their leaves How about sailor's knots Or semaphore signals With questions from high culture to low spanning science language history sports music and more this write in quiz book is a lively parlor game a challenging memory jogger and an ego boosting way to show what you know all wrapped into one handy volume So sharpen your pencils put on your thinking caps and prepare to show what you know
