Informing the News Thomas E. Patterson,2013-10-08 As the journalist Walter Lippmann noted nearly a century ago democracy falters if there is no steady supply of trustworthy and relevant news Today s journalists are not providing it Too often reporters give equal weight to facts and biased opinion stir up small controversies and substitute infotainment for real news Even when they get the facts rights they often misjudge the context in which they belong Information is the lifeblood of a healthy democracy Public opinion and debate suffer when citizens are misinformed about current affairs as is increasingly the case Though the failures of today s communication system cannot be blamed solely on the news media they are part of the problem and the best hope for something better Patterson proposes knowledge based journalism as a corrective Unless journalists are more deeply informed about the subjects they cover they will continue to misinterpret them and to be vulnerable to manipulation by their sources In this book derived from a multi year initiative of the Carnegie Corporation and the Knight Foundation Patterson calls for nothing less than a major overhaul of journalism practice and education The book speaks not only to journalists but to all who are concerned about the integrity of the information on which America s democracy depends

On the Trail of the D.C. Sniper Jack R. Censer,2010-04-06 For a month in the fall of 2002 a series of

sniper attacks suddenly dominated the headlines in the nation's capital. Beginning in the Washington suburbs, these crimes eventually stretched over one hundred miles along I 95 to Richmond. More than a thousand law officers would pursue the perpetrators; an enormous number for one case. The number of reporters covering the story, however, was even greater. On the Trail of the D.C. Sniper uses the remarkable events of that October to explore the shifting character of journalism as it entered the twenty-first century and to question how this change in the way news is gathered and reported impacted the events it covered. Because of its political significance, Washington D.C., although not a huge population center, is home to an international news corps rivaling that of London or New York. The sniper story thus gained unusually broad media coverage. These events also coincided with the rise of cable network news, meaning that the story would be delivered through a greatly accelerated news cycle. Continuous coverage on television meant a more intense race for scoops when a major development wasn't available. Lesser incidents were sometimes played up in an attempt to maintain the sense of an always-unfolding story. Jack Censer looks at the atmosphere of heightened anxiety in which this killing spree occurred, coming only a year after the 9/11 attacks as well as the unsolved anthrax scare centered in the D.C. area, and asks if the press, by intensifying its focus, also intensified the sense of fear. To bring in another perspective, Censer looks closely at the elementary and secondary schools in the area, comparing their experience of the threat with the press's perception and presentation of it. In most cases, school officials chose a course of precaution in which life could carry on rather than one of hypervigilance and lockdowns. Although it is widely thought that journalists have strong political and commercial biases, Censer reveals that in this case the press was motivated above all by the creation of a gripping story to evoke emotion from its audience. One of the most detailed studies yet published of how the press follows a story in the twenty-four-hour news era, this book provides a window on post-9/11 anxiety and the relationship between those fears, public events, and the news media.

The A to Z of Journalism Ross Eaman, 2009-10-12. Journalism is the discipline of gathering, writing, and reporting news, and it includes the process of editing and presenting news articles. Journalism applies to various media, including but not limited to newspapers, magazines, radio, television, and the internet. The word journalist started to become common in the early 18th century to designate a new kind of writer. About a century before journalism made its appearance to describe what those writers produced, though varying in form from one age and society to another, it gradually distinguished itself from other forms of writing through its focus on the present, its eye-witness perspective, and its reliance on everyday language. The A to Z of Journalism relates how journalism has evolved over the centuries. This is done through a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced dictionary entries on the different styles of journalism, the different types of media, and important writers and editors.

American Images of China

Oliver Turner, 2014-04-16 The United States and China are arguably the most globally consequential actors of the early twenty first century and look set to remain so into the foreseeable future. This volume seeks to highlight that American images of China are responsible for constructing certain truths and realities about that country and its people. It also introduces the understanding that these images have always been inextricable from the enactment and justification of US China policies in Washington and that those policies themselves are active in the production and reproduction of imagery and in the protection of American identity when seemingly threatened by that of China. Demonstrating how past American images of China are vital to understanding the nature and significance of those which circulate today. Turner addresses three key questions: What have been the dominant American images of China and the Chinese across the full lifespan of Sino US relations? How have historical and contemporary American images of China and the Chinese enabled and justified US China policy? What role does US China policy play in the production and reproduction of American images of China? Exploring and evaluating a wide ranging variety of sources including films and television programmes newspaper and magazine articles the records and journals of politicians and diplomats and governmental documents including speeches and legal declarations this work will be of great interest to students and scholars of US foreign policy American politics China studies and international relations.
