Health Care Policy and Regulation Thomas A. Abbott III, 2012-12-06 5 care reforms Part II Price Regulation The second part of this volume examines the role of price regulation in controlling health care costs It contains three chapters In chapter seven I examine the alternatives for regulating pharmaceutical prices In chapter eight Jack Hadley examines the impact of various forms of hospital price regulation while in chapter nine Mark Pauly examines the role of price regulation in controlling physician fees Chapter seven focuses on the issue of regulating pharmaceutical prices There are two key issues examined in this paper First is there a clear need for price regulation and second can price regulation work in this industry In response to the first question I come to the conclusion that the proponents of price regulation have not really proven their case Although the financial returns in the pharmaceutical industry have been slightly higher than expected during the 1970s and 1980s there is not overwhelming evidence of price gouging or excessive profits on the part of the industry In response to the second question the answer is clearly no The traditional approaches to price regulation will not have the intended affect of eliminating excess profits from the industry while maintaining the incentives for research and development First rate of return regulation the most natural approach would result in many adverse incentives including excessive investment in research and development in order to inflate the rate base used to calculate the allowable returns

Providing Sustainable Mental and Neurological Health Care in Ghana and Kenya National Academies of Sciences, Engineering, and Medicine, Institute of Medicine, Board on Global Health, Board on Health Sciences Policy, Forum on Neuroscience and Nervous System Disorders, 2016-03-25 Mental neurological and substance use MNS disorders have a substantial impact on global health and well being Disorders such as depression alcohol abuse and schizophrenia constitute about 13 percent of the total burden of disease Worldwide MNS disorders are the leading cause of disability and the 10th leading cause of death Despite this high burden there is a significant shortage of resources available to prevent diagnose and treat MNS disorders Approximately four out of five people with serious MNS disorders living in low and middle income countries do not receive needed health services This treatment gap is particularly high in Sub Saharan Africa SSA Challenges to MNS care in SSA countries include a lack of trained mental health professionals few mental health facilities and low prioritization for MNS disorders in budget allocations African countries on average have one psychiatrist for every 2 million people whereas European countries have one psychiatrist per 12 000 people Expanding on previous efforts to address the development and improvement of sustainable mental health systems in SSA the Institute of Medicine convened this 2015 workshop series bringing together key stakeholders to examine country specific opportunities to improve the health care infrastructure in order to better prevent diagnose and treat MNS disorders Providing Sustainable Mental and Neurological Health Care in Ghana and Kenya summarizes the presentations and discussions from these workshops

Cumulated Index Medicus, 1996 *The Logics of Healthcare* Paul Lillrank, 2018-01-03 Most of the current literature on healthcare operations management is focused on importing principles and methods from manufacturing The evidence of success is scattered and nowhere near what has been achieved in other industries This book develops the idea that the logic of production and production systems in healthcare is significantly different A line of thing that acknowledges the ingenious characteristics of health service production is developed This book builds on a managerial segmentation of healthcare based on fundamental demand supply constellations

Demand can be classified with the variables urgency severity and randomness Supply is constrained by medical technology accuracy of diagnostics efficacy of therapies patient health behavior co creation of health and resource availability Out of this emerge seven demand supply based operational types DSO prevention emergencies one visit electives cure care and projects Each of these have distinct managerial characteristics such as time perspective level of co creation value proposition revenue structure productivity and other key performance indicators KPI The DSOs can be envisioned as platforms upon which clinical modules are attached For example any Emergency Department ED must be managed to deal with prioritization time windows agitated patients the necessity to save and stabilize and variability in demand Specific clinical assets and skill sets are required for say massive trauma strokes cardiac events or poisoning While representing different specialties of clinical medicine they when applied in the emergency context must conform to the demand supply based operating logic A basic assumption in this book is that the perceived complexity of healthcare arises from the conflicting demands of the DSO and the clinical realms The seven DSOs can neatly be juxtaposed on the much used Business Model Canvas BMC which postulates the business model elements as value proposition customer segments channels and relations key activities resources and partners the cost structure and the revenue model **American Book Publishing Record** ,2003
