Hofmann, 2017-06-13 This clear sighted resource

critically examines the status of clinical psychology practice across the diverse regions of the world. Dispatches from North and Latin America, Eastern and Central Europe, China, South Korea, Australia, Africa, the Middle East, and elsewhere illustrate in depth the universality of mental distress and disorders and the intersection of local knowledge and established standards in providing effective care. Pathology and its treatment are viewed in light of cultural values, belief systems, ethics, and norms reflecting the evolution of clinical practice toward personalized care and culturally sensitive intervention. This important information serves a number of immediate and long-term goals, including developing culture-specific diagnoses and treatments, improving professional competencies, and the ongoing exchange of ideas within a global field to benefit all patients worldwide. Coverage compares key areas such as concepts of mental pathology and health, the sociopolitical aspects of psychology rooted in the history of the country/region, popularly used approaches to intervention, types of services and providers, the state of training and credentialing, relationships between clinical psychology and indigenous healing traditions. The audience for *Clinical Psychology across the World* includes advanced undergraduate and graduate students and trainees, interns in clinical psychology, as well as developers of training programs. It can also serve as a valuable supplementary text for seminars or lectures on clinical psychology.

Clinical Psychology David C.S. Richard, Steven K. Huprich, 2011-09-02
Clinical Psychology is a graduate-level introduction to the field of clinical psychology. While most textbooks focus on either assessment, treatment, or research, this textbook covers all three together specifically for the introductory-level graduate course. Chapter coverage is diverse, and contributors come from both PhD and PsyD programs and a variety of theoretical orientations. Chapter topics cover the major activities of the contemporary clinical psychologist, with an introduction focusing on training models. The book has a mentoring style designed to highlight the relevance of the topics discussed to clinicians in training. Assessment and treatment chapters focus on evidence-based practice, comparing and contrasting different options, the basis for clinical choice between them, and efficacy of same. It will also introduce the business and ethical aspects of the clinical career that current introductory books do not include, such as ethics in assessment, treatment, and research, third-party payers, technological developments, dissemination of research findings, cross-cultural issues, and the future of the profession. The text is designed for students in their first year of clinical psychology graduate training. Includes assessment, treatment, and practice issues. Compares and contrasts different therapeutic styles. Exemplifies practical application through case studies. Focuses on evidence-based practice. Orients future clinicians to contemporary issues facing psychological practices.
