This issue's Out Front dossier, coedited by Kitty Krupat and Patrick McCreery, who also contribute essays, takes a hard look at the emergent relationship between sexual politics and the labor movement. AFL-CIO president John J. Sweeney presents a major policy statement, and four other labor leaders—Bill Fletcher Jr., Yvette Herrera, Gloria Johnson, and Van Allen Sheets—discuss homophobia as "labor's new frontier." Nikhil Pal Singh's conversation with lesbian activist Amber Hollibaugh and a virtuoso piece by filmmaker Tami Gold offer incisive personal histories and commentaries, and Cathy J. Cohen takes the politics of the mainstream gay and lesbian movement to task. . . . Also in this issue are two separate essays by Vinay Lal and Paola Sacchetta about the complex state of sexual politics in India. \$12.00 Winter 1999

Science Wars Vol 14 Nos 1 :

Science Wars Andrew Ross,1996 Analyzing the antidemocratic tendencies within science and its institutions they insist on a more accountable relationship between scientists and the communities and environments affected by their research

The Network Collective Klaus Eichmann,2008-11-18 The network paradigm dominated immunological research from the early 1970s to the late 1980s The originator Niels Jerne hypothesized that the vast diversity of antibodies in each individual forms a network of mutual idiotypic recognition thus regulating the immune system In context of emerging concepts of systems biology such as cybernetics and autopoiesis the Eigenbehavior of the immune system fascinated an entire generation of young immunologists But fascination led to experimental errors and overinterpretation eventually magnifying the immune system from a mere infection fighting device to a substrate of personality and individuality As a result what initially appeared as an exciting new perspective of the immune system is now viewed as a scientific vagary and is largely abandoned The author himself a participant in the network vagary begins with a description of the leading theoretical concepts on fact finding in science This is followed by a historical account of the rise and fall of the network paradigm complemented by personal interviews with some of the prominent protagonists By comparing the network paradigm to other more lasting concepts in life science the author develops a general perspective on how solid knowledge is derived from error prone scientific methodology namely by exposure of scientific notions to the scrutiny of reality *The Nature of Being Human*

Harold Fromm,2009-05-04 Essays exploring humanity s connection with the environment Although the physical relationship between the natural world and individuals is quantifiable the psychosocial effect of the former on the latter is often less tangible What for instance is the connection between the environment in which we live and our creativity How is our consciousness bounded and delimited by our materiality And from whence does our idea of self and our belief in free will derive and when do our surroundings challenge these basic assumptions Eco critic Harold Fromm s challenging exploration of these and related questions twines his own physical experiences and observations with insights gathered from both the humanities and the sciences Writing broadly and personally Fromm explores our views of nature and how we write about it He ties together ecology evolutionary psychology and consciousness studies to show that our perceived separation from our surroundings is an illusory construct He argues for a naturalistic vision of creativity free will and the literary arts unimpeded by common academic and professional restraints At each point of this intellectual journey Fromm is honest engaging and unsparing Philosophical critical often personal Fromm s sweeping interdisciplinary and sometimes combative essays will change the way you think about your place in the environment How rare it is that a work of philosophical inquiry is written with the passion of a cri de coeur but Harold Fromm s brilliantly conceived *The Nature of Being Human* resonates with such uncanny depths Here is an utterly engrossing first person account of a harrowing pilgrimage into the 21st century and its disturbing revelations about humankind s truest nature in contrast to the comforting solitudes of a humanist past If the role

of the philosopher is to force us to think Harold Fromm is a born philosopher Joyce Carol Oates Fromm an erudite prolific author of numerous works ranging from ecocritical commentary to self reflective discourses presents a compilation of essays that illuminate his views regarding why most Americans seem oblivious to the destruction of their environment Choice Fromm s journey from victim to campaigner to pioneer of eco criticism that is the study of literature from an ecological viewpoint is documented here alongside challenging analyses of man s place in nature free will our relationship with technology and more Scholarly but engaging Fromm is an environmentalist but also a realist Organic Gardener **Special Effects** Michele Pierson,2002 Moving from an exploration of 19th century popular science and magic to Hollywood science fiction cinema of our time Pierson examines the history advancements and connoisseurship of special effects *The New Media Theory Reader* Hassan, Robert,Thomas, Julian,2006-09-01 The study of new media opens up some of the most fascinating issues in contemporary culture bringing together key readings on new media what it is where it came from how it affects our lives and how it is managed It encourages readers to pay attention to the new in new media as well as consider it as a historical phenomenon *Cognitive Justice in a Global World* Boaventura de Sousa Santos,2007-10-23 Cognitive Justice in a Global World Prudent Knowledges for a Decent Life is an edited collection that springs from the now dormant debates known as The Science Wars which questioned the nature of scientific theories Learning from the debates about the plurality of truths and opinions editor Boaventura de Sousa Santos has realized an opportunity for strengthening the relations between the natural and social sciences with more epistemological affinities and for opening up new transnational dialogues between scientists and other producers of knowledge This book analyses in detail some of the topics that amount to a set of problematic relations between science and ethics between objectivity and neutrality between the sociological and theoretical condition of production and the limits of scientific rigor between public faith in science and the economic powers that determine scientific priorities and between science and other kinds of knowledge existing in society Maintaining that global social injustice is by and large epistemological injustice and that there can be no global social justice without global cognitive justice Cognitive Justice in a Global World is an important collection for higher level students and researchers in the social sciences philosophy of science and intellectual history *Geopolitics and Business* Čedomir Nestorović,2023-11-29 This book sheds light on the intricate relationship between geopolitics and business and the essential interdependence between corporations and geopolitics Despite apparent animosity practical solutions and theories proposed by geopolitics find resonance within the business world and vice versa Concepts like critical theory disruption hegemony strategic rivalry and cost effectiveness hold common ground in both realms even though they have historically been disregarded Geopolitical authors have often overlooked the vital role played by businesses in shaping global affairs while businesses themselves view geopolitics as a risk to be managed These contrasting viewpoints have given rise to misunderstandings and misconceptions between the two spheres The author sets out to bridge the gap between geopolitics and business exploring how corporations

perceive space state and power while also analyzing the influence of classical critical and feminist geopolitics on business strategies This comprehensive analysis reveals that businesses are not mere non state agents among many but indeed the principal non state agents in geopolitics The book is an essential read for scholars researchers and professionals seeking a deeper understanding of the dynamic interplay between these critical forces **Interdiscipline** Petar

Ramadanovic,2021-11-29 This book brings together two different discussions on the value of the humanities and a broader debate on interdisciplinary scholarship in order to propose a new way beyond current threats to the humanities Petar Ramadanovic offers nothing short of a drastic rehaul of our approaches to literary scholarship the humanities and university systems Beginning with an analysis of what is often referred to as the crises in the humanities the author looks at the specifics of literary studies but also issues around working conditions for academics From precarity and pay conditions to peer review the book has practical as well as theoretical implications that will resonate throughout the humanities While most books defending the humanities emphasize the uniqueness of the subject or area Ramadanovic does the opposite emphasizing the need for interdisciplinarity and combined knowledge This proposal is then fully explored through literary studies and its potential throughout the humanities and beyond into the sciences Interdiscipline is not just a defense of literature and the humanities it offers a clear and inspiring pathway forwards drawing on all disciplines to show their cultural and social significance The book is important reading for all scholars of literary studies and also throughout the humanities

Thicker Than Water Leonore Davidoff,2012 A pioneering new study of nineteenth century kinship and family relations focusing on the British middle class and highlighting both the similarities and the differences in relations between brothers and sisters in the past and in the present *Elite Cultures* Cris Shore,Stephen L. Nugent,2002 What makes an elite This authoritative new volume examines elite groups in power across Europe North America Mexico Peru Indonesia and Africa to answer this question fully at a time of their increasing dominance **Hazards Vulnerability and Environmental Justice**

Susan L. Cutter,2012-05-04 From Hurricane Katrina and the south Asian tsunami to human induced atrocities terrorist attacks and the looming effects of climate change the world is assailed by both natural and unnatural hazards and disasters These expose not only human vulnerability particularly that of the poorest who are least able to respond and adapt but also the profound worldwide environmental injustices that result from the geographical distribution of risks hazards and disasters This collection of essays from one of the most renowned and experienced experts provides a timely assessment of these critical themes Presenting the top selections from Susan L Cutter s thirty years of scholarship on hazards vulnerability and environmental justice the volume tackles issues such as nuclear and toxic hazards risk assessment communication and planning and societal responses Cutter maps out the terrain and draws out the salient themes with a fresh powerful introduction written in the wake of her work in the aftermath of Katrina This essential collection is ideal for professionals researchers academics and students working on hazards risk disasters and environmental justice across a range of

disciplines The Empire Strikes Back Rebecca Harrison, 2020-10-29 The Empire Strikes Back 1980 the second film in the original Star Wars trilogy is often cited as the best and most popular Star Wars movie In her compelling study Rebecca Harrison draws on previously unpublished archival research to reveal a variety of original and often surprising perspectives on the film from the cast and crew who worked on its production through to the audiences who watched it in cinemas Harrison guides readers on a journey that begins with the film's production in 1979 and ends with a discussion about its contemporary status as an object of reverence and nostalgia She demonstrates how Empire's meaning and significance has continually shifted over the past 40 years not only within the franchise but also in broader conversations about film authorship genre and identity Offering new insights and original analysis of Empire via its cultural context production history textual analysis exhibition reception and post 1980 re-evaluations of the film the book provides a timely and relevant reassessment of this enduringly popular film Foreign Intervention, Warfare and Civil Wars Adam Lockyer, 2017-09-01 This book examines the impact of foreign intervention in the course and nature of warfare in civil wars Throughout history foreign intervention in civil wars has been the rule rather than the exception The involvement of outside powers can have a dramatic impact on the course and nature of internal conflicts Despite this there has been little research which has sought to explain how foreign intervention influences the course of civil wars This book seeks to rectify this gap It examines the impact of foreign intervention on the warfare that characterises civil wars through by studying the cases of the Angolan and Afghan civil wars It investigates how foreign resources affect the military power of the recipient belligerent and examines how changes in the balance of capabilities influence the form of warfare that characterises a civil war Warfare in civil wars is often highly fluid with belligerents adapting their respective strategies in response to shifts in the balance of military capabilities This book shows how the intervention of foreign powers can manipulate the balance of capabilities between the civil war belligerents and change the dominant form of warfare The findings presented in this book offer key insights for policy makers to navigate the increasing internationalization of civil wars around the globe This book will be of much interest to students of civil wars intra state conflict war and conflict studies and security studies *Survivor-Centred Justice* Ingrid Roestenburg-Morgan, Tim Murithi, 2025-02-04 This volume interrogates global perspectives and issues that constitute and characterize survivor centred justice exploring both conceptual and theoretical issues surrounding the definition of a survivor practical considerations of what constitutes a survivor centred approach to justice and available avenues of justice for survivors of mass atrocities In the first part of the book survivor centred justice is explored at the level of the International Criminal Court ICC The second part evaluates developments taking place at the local and domestic levels where traditional customary or local justice mechanisms find affinity with survivors in their quest for justice The third part focuses on advocacy based approaches being utilized specifically by non governmental organizations NGOs multilateral and regional institutions such as the United Nations and African Union in support of survivors In the final part of the book future prospects for

survivors in the promotion of peacebuilding and atrocity prevention are discussed The discussions in this volume will be of particular value and importance to international and transitional justice scholars including legal and development practitioners interested in survivor centred approaches to mass atrocity crimes Most importantly it aims to be of value to survivors survivor communities and survivor centred networks *The Publishers Weekly*, 1923 **Analytical and Classified Catalogue of the Library of the Parliament of Queensland** Queensland.
