Scientific Interfaces and Technological Applications National Research Council Staff, **Physics Through the 1990s**, 1986 **Physics Through the 1990's** National Research Council (USA). Physics Survey Committee, 1986

Scientific and Technical Aerospace Reports, 1987 **Physics Through the 1990s** National Research Council (U.S.). Physics Survey Committee, 1986 *Scientific Interfaces and Technological Applications* National Research Council (U.S.). Panel on Scientific Interfaces and Technological Applications, 1986 Research Project Selection United States. Congress. House. Committee on Science and Technology. Task Force on Science Policy, 1986 *Energy Research Abstracts*, 1993 Superconducting Super Collider United States. Congress. Senate. Committee on Energy and Natural Resources. Subcommittee on Energy Research and Development, 1988 Knowledges Ellen Messer-Davidow, David R. Shumway, David Sylvan, 1993 Anyone interested in the relationship between disciplines and today this means everyone should read this collection which is itself a model of interdisciplinarity Stanley Fish Duke University **Complete Catalog of Books and Periodicals** National Academy Press (U.S.), 1990 **CEPR Publication**, 1991 Crossing Boundaries Julie Thompson Klein, 1996 An interdisciplinary approach to knowledge **INIS Atomindex**, 1988 *Work at the Boundaries of Science* C.L. Palmer, 2013-06-29 Interdisciplinary inquiry has become more pervasive in recent decades yet we still know little about the conduct of this type of research or the information problems associated with it This book is one of few empirical studies of interdisciplinary knowledge practices It examines how interdisciplinary scientists discover and exchange information and knowledge highlighting how the boundaries between disciplines affect how information is used and how knowledge is constructed It is written for scholars and practitioners with an interest in developing information systems and research environments to foster innovative scientific work Target groups include researchers in information science science studies communication as well as research administrators and information professionals *Schumpeter and the Endogeneity of Technology* Nathan Rosenberg, 2000 Explores Schumpeter's views as an economist who was long ago committed to the notion of the endogeneity of technology *The Economics of Science and Innovation* Paula E. Stephan, David B. Audretsch, 2000 **Government Reports Annual Index**, 1988 *Exploring the Black Box* Nathan Rosenberg, 1994-03-10 The process of technological change takes a wide variety of forms Propositions that may be accurate when referring to the pharmaceutical industry may be totally inappropriate when applied to the aircraft industry or to computers or forest products The central theme of Nathan Rosenberg's new book is the idea that technological changes are often path dependent in the sense that their form and direction tend to be influenced strongly by the particular sequence of earlier events out of which a new technology has emerged The book advances the understanding of technological change by explicitly recognising its essential diversity and path dependent nature Individual chapters explore the particular features of new technologies in different historical and sectoral contexts This book presents a unique account of how technological change is generated and

the processes by which improved technologies are introduced Studies On Science And The Innovation Process: Selected Works By Nathan Rosenberg Nathan Rosenberg, 2009-08-18 Science and technology have become increasingly intertwined in the twentieth century However little attention has been paid to the forces that have brought about this condition Indeed many scholars have taken it simply for granted that causality always runs from science to technology In this groundbreaking book Rosenberg s research suggests that history and extensive empirical evidence lead to a reality that is far more complex as well as far more interesting Here Rosenberg s papers explore a wide range of pertinent issues especially those connected with the innovative process including the realms of electric power electronics chemicals aircraft medicine instrumentation and in particular higher education and the organization of research activities
