Screening Science Contexts Texts And Science In Fifties Science Fiction Film:

Science Fiction Cinema and 1950s Britain Matthew Jones, 2017-11-30 For the last sixty years discussion of 1950s science fiction cinema has been dominated by claims that the genre reflected US paranoia about Soviet brainwashing and the nuclear bomb However classic films such as *Invasion of the Body Snatchers* 1956 and *It Came from Outer Space* 1953 and less familiar productions such as *It The Terror from Beyond Space* 1958 were regularly exported to countries across the world The histories of their encounters with foreign audiences have not yet been told *Science Fiction Cinema and 1950s Britain* begins this task by recounting the story of 1950s British cinema goes and the aliens and monsters they watched on the silver screen Drawing on extensive archival research Matthew Jones makes an exciting and important intervention by locating American science fiction films alongside their domestic counterparts in their British contexts of release and reception He offers a radical reassessment of the genre demonstrating for the first time that in Britain which was a significant market for and producer of science fiction these films gave voice to different fears than they did in America While Americans experienced an economic boom low immigration and the conferring of statehood on Alaska and Hawaii Britons worried about economic uncertainty mass immigration and the dissolution of the Empire *Science Fiction Cinema and 1950s Britain* uses these and other differences between the British and American experiences of the 1950s to tell a new history of the decade s science fiction cinema exploring for the first time the ways in which the genre came to mean something unique to Britons

Screening Science Errol Vieth, Griffith University. School of Film, Media and Cultural Studies, 1999 Investigates the science in the science fiction films of the fifties and how these films inform of the concerns of the time **American Science Fiction Film and Television** Lincoln Geraghty, 2009-10-01 *American Science Fiction Film and Television* presents a critical history of late 20th Century SF together with an analysis of the cultural and thematic concerns of this popular genre Science fiction film and television were initially inspired by the classic literature of HG Wells and Jules Verne The potential and fears born with the Atomic age fuelled the popularity of the genre upping the stakes for both technology and apocalypse From the Cold War through to America s current War on Terror science fiction has proved a subtle vehicle for the hopes fears and preoccupations of a nation at war The definitive introduction to American science fiction this is also the first study to analyse SF across both film and TV Throughout the discussion is illustrated with critical case studies of key films and television series including *The Day the Earth Stood Still* *Planet of the Apes* *Star Trek The Next Generation* *The X Files* and *Battlestar Galactica* **The Art of Movies** Nicolae Sfetcu, 2014-05-06 Movie is considered to be an important art form films entertain educate enlighten and inspire audiences Film is a term that encompasses motion pictures as individual projects as well as in metonymy the field in general The origin of the name comes from the fact that photographic film also called filmstock has historically been the primary medium for recording and displaying motion pictures Many other terms exist motion pictures or just pictures or picture the silver screen photoplays the cinema picture shows flicks and commonly movies

Transforming the Screen, 1950-1959 Peter Lev, 2003 Covering a tumultuous period of the 1950s this work explores the divorce of movie studios from their theater chains the panic of the blacklist era the explosive emergence of science fiction as the dominant genre and the rise of television and Hollywood's response with widescreen spectacles *Imagining Outer Space* Alexander C.T. Geppert, 2018-04-25 *Imagining Outer Space* makes a captivating advance into the cultural history of outer space and extraterrestrial life in the European imagination How was outer space conceived and communicated What promises of interplanetary expansion and cosmic colonization propelled the project of human spaceflight to the forefront of twentieth century modernity In what way has West European astroculture been affected by the continuous exploration of outer space Tracing the thriving interest in spatiality to early attempts at exploring imaginary worlds beyond our own the book analyzes contact points between science and fiction from a transdisciplinary perspective and examines sites and situations where utopian images and futuristic technologies contributed to the omnipresence of fantasmatic thought Bringing together state of the art work in this emerging field of historical research the volume breaks new ground in the historicization of the Space Age *Screening Science* Errol Vieth, 2001-09-18 Vieth contemporary communications Central Queensland U Australia looks at how science was portrayed in the 1950s in the medium of science fiction films He argues that the portrayal of science can provide a three dimensional insight into particular cultural and social contexts After looking at the contextual elements of history culture and the film industry Vieth continues with a discussion of the nature of science and the scientist looking at both the nonhuman sciences i.e. those not related to the human organism as well as medical and psychological sciences c Book News Inc **Philosophy, Science and Cinema** Wenceslao J. Gonzalez, 2025-03-20 Now that cinema is offline and online the capacity of cinema to relate to philosophy and science has increased In this regard this book seeks to deepen the relationship between philosophy science and cinema in terms of bilaterality This analysis leads to several successive levels of analysis First between philosophy and cinema where the philosophical perspective bifurcates in several directions depending on the philosophical branch used This affects in both directions from the philosophical orientation to the cinematographic activity and from cinema towards the philosophical line used Second the relations between science and cinema also go in both directions Thus they are modulated by the type of scientific research used and by the film genre employed Thus bilaterality is altogether a network of bidirectional relations modulated by various possibilities of analysis *The Resilient City in World War II* Simo Laakkonen, J. R. McNeill, Richard P. Tucker, Timo Vuorisalo, 2019-05-27 The fate of towns and cities stands at the center of the environmental history of World War II Broad swaths of cityscapes were destroyed by the bombing of targets such as transport hubs electrical grids and industrial districts and across Europe Asia and the Americas urban environments were transformed by the massive mobilization of human and natural resources to support the conflict But at the same time the war saw remarkable resilience among the human and non human residents of cities Foregrounding the concept of urban resilience this collection uncovers the creative survival strategies that city dwellers of all

kinds turned to in the midst of environmental devastation As the first major study at the intersection of environmental urban and military history *The Resilient City in World War II* lays the groundwork for an improved understanding of rapid change in urban environments and how societies may adapt *Engineering in Context* ,2009
