Joanne Wallis, Henrietta McNeill, James Batley, Anna Powles, 2025-03-20 Wallis McNeill Batley Powles and the contributors examine the dynamics of Pacific Islands security cooperation analysing how it helps address regional security challenges amid the broader strategic competition between China and the United States that is increasingly playing out in the region Pacific Island countries do not want to become pawns in this competition but its impacts are inescapable and are creating additional security challenges Compounding these effects are climate change and COVID 19 both of which have intersected with existing traditional and non traditional security challenges facing the region In response Pacific Island leaders have vowed to pursue greater security cooperation amongst themselves and with partner states This book addresses partner states interests in the region how these interests and Pacific priorities align and if not what the possible consequences may

be It also analyses successful areas of security cooperation and tackles how challenges may be improved Incorporating a range of perspectives from key leaders practitioners and scholars this is an empirically grounded analysis of security cooperation within the Pacific Islands region and by the region's major partners A vital resource for researchers and practitioners seeking to better understand Pacific Islands security collaboration and the inherent challenges it faces The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license [Changing Security Dynamic in Eastern Asia](#) N. China in the Indian Ocean Region—India's Security Challenges (Reprint, 2024) Sidda Goud, 2023-03-21 Indian Ocean third largest Ocean in the world surpasses the Atlantic and Pacific Oceans Being world's most populated Region one third of the world's bulk cargo and two thirds of world's oil ship tankers passes through the Indian Ocean China's interests in the Indian Ocean Region can be traced and backed by early 60's Ever since Beijing has been increasingly deepening its presence in the Indian Ocean Region for a variety of reasons such as oil trade and security etc Over 30 per cent of China's seaborne trade worth about 300 billion transits across Indian Ocean Region Sharing a quarter of the world's population China facing ever increasing demand for energy China has little choice but to look beyond its borders for its energy requirements Around 77 percent of its oil imports are sourced from West Asia and Africa and these are transporting through the Indian Ocean via Malacca Strait Thus China's dependency on Indian Ocean Region continues to grow for energy imports from gulf and to import resources from Africa and trade with Europe With China steadily spreading its footprints in the IOR with increasing military presence and with rapidly growing its navy being equipped with warships destroyers and nuclear submarines through a strategy called String of Pearls which can encircle India in its convenient time in the near future So China has been emerging as biggest threat for India by analyzing its actions in the Indian Ocean Region and along with India China border from Easter Ladakh to Arunachal Pradesh as stand off continues since June 2020

Patterns in Border Security Christian Leuprecht, Todd Hataley, Emmanuel Brunet-Jailly, 2022-12-12 How do security communities transform into security regimes This book compares the construction of cross border security regimes across five regions of the world to illustrate how trust emerges from the day to day relations of coordination cooperation or collaboration Patterns in Border Security Regional Comparisons studies the way borderland communities develop implement and align border policy to enhance their sense of security Borders have been evolving rapidly in direct response to the multifaceted challenges brought on by globalization which has had a nuanced impact on the way borders are governed and border security is managed Taking a methodical comparative regional approach this book identifies and contrasts determinants of nascent ascendant and mature border security regimes which the book documents in seven regional case studies from across the globe The findings identify conditions that give rise to cross border and trans governmental coordination cooperation or collaboration Specifically pluralistic forms of communication and interactions sometimes far from the actual borderline emerge as key determinants of friendly and trustful relations among both contiguous and non contiguous regions This is a significant innovation in the study of borders in particular in the way borders mediate security

For six decades international security studies had posited culture as the bedrock of security communities. By contrast, the book identifies conditions, a method, and a model for adequate and effective cross-border relations, but whose outcome is not contingent on culture. The chapters in this book were originally published as a special issue of *Commonwealth and Comparative Politics* with a Foreword by the Secretary General of the World Customs Organization. The Open Access chapters of this book are available at <http://www.tandfebooks.com/doi/view/10.4324/9781003216926> and have been made available under a Creative Commons Attribution-NonCommercial-NoDerivatives 4.0 license.

Corruption, Sustainable Development and Security Challenges in Africa Kempe Ronald Hope, Sr., 2023-09-07. This book sheds light on Africa's development performance and dynamics arising from the interface between corruption and sustainable development on the one hand and the challenges that poses for peace, security, and stability. Corruption also contributes to the spread of terrorism and violent extremism. Pervasive corruption networks often include politicians, civil servants working at all levels of state institutions, representatives of the private sector, and members of crime syndicates. The consequences of corruption are detrimental in many aspects, such as undermining governments' ability to serve public interests and eroding public trust in democratic processes. Presenting empirical evidence, the book explains why corruption and the looting of staggering amounts of national assets undermine the achievement of the Sustainable Development Goals (SDGs) and has a negative impact on peace, stability, security, the rule of law, gender equality, the environment, and human rights. This makes the book a must-read for students, researchers, and scholars of political science, international relations, and economics, in general, as well as African studies, development studies, and security sector studies, in particular, covering issues and themes on corruption, governance, socio-economic sustainable development, public administration and management, policing in an international context, police reform, and security sector reform. It will also serve as a helpful resource for policy makers interested in a better understanding of the connection between corruption, sustainable development, and security challenges in Sub-Saharan Africa.
