

A Leisure Activities Curricular Component for Severely Handicapped Youth: Why and How

Luanna M. Voeltz and James A. Apffel

The present paper presents a rationale for including a leisure time activities curriculum component in educational programming for severely handicapped children and youth. The importance of play and the constructive use of leisure time for both nonhandicapped and handicapped persons is stressed, and a review of the literature provides documentation of the multiple positive effects of a leisure repertoire upon the adaptive behavior and community adjustment of the severely handicapped. A brief description of a model demonstration project to develop an innovative leisure curriculum component is introduced, emphasizing the scope, content and purpose of such training. Finally, selection criteria which might be useful to guide future teacher and care-giver decisions in the leisure domain are presented, and the role of parents and community care-givers in cooperative planning for leisure education is emphasized.

The ability to play—to occupy oneself constructively and pleasurably during free time—appears to develop vicariously in most persons. Children seem to naturally engage in explorations of persons and materials in their environment, with the quality of those interactions increasing in complexity as the child matures. Yet, we undoubtedly underestimate the extent to which children learn and are taught to play. The various social systems to which children are exposed present numerous opportunities for leisure activities and socialization experiences associated with play. Parents clearly recognize the necessity of engaging the infant in play, and structured programs during the early childhood period carefully incorporate the time and opportunity for play and social interaction. To some extent, our historical hesitation to structure academic experiences for the very young child reflects a philosophical bias that learning in a systematic fashion must follow the kinds of exploratory interactions with the environment which are characterized as play.

Exceptional Children Integrating Research and Teaching provides a comprehensive introduction to the constantly changing area of special education The book is research based and its title reflects our opinion regarding the important link between research and classroom practice There is one feature of *Exceptional Children Integrating Research and Teaching* that warrants attention and perhaps justification it was written specifically to address the graduate student or sophisticated undergraduate student market As such the book is written at a higher level and with a greater concept density than typical introductory special education texts We feel that this type of book is very much needed and will be received favorably by the special education community There are also several unique features of *Exceptional Children Integrating Research and Teaching* that we feel will be quite valuable First we have emphasized the area of teaching practices and not simply included basic facts about definitions characteristics and causes Although some introductory texts include information about teaching considerations that area is not discussed as in depth as it is in our text We feel that it is important that readers not only understand the educational needs of exceptional children but also can identify the best educational practices to meet those needs Leisure Education: A Cross-National View Atara Sivan, Robert A. Stebbins, 2016-04-08

Leisure education plays a central role in both the field of leisure studies and the pursuit of leisure itself Everywhere in the modern world the most effective use of free time for individuals comes with knowing about the many leisure activities available to them and the rewards and costs that accompany their interest in each It is through leisure education in one form or another that they gain such knowledge Yet as important as this educational process is its study is only beginning to take off in non Western societies where however it cannot be assumed to be the same as in the West This book contains several comparisons of Western and non Western practices in leisure education Knowing these practices contributes ultimately to a deep understanding of the nature of the huge variety of leisure activities enjoyed across the planet and of the reasons why people go in for the ones they do This book was based on a special issue published in the *World Leisure Journal* *Severe Behavior Problems* Vincent Mark Durand, 1990-11-01

Problem behaviors often compound the already difficult task of improving the lives of persons with severe disabilities This important volume representing the culmination of more than a decade of clinical research presents the first complete description of the procedures used in Functional Communication Training a positive approach for reducing severe behavior problems The procedures described in this book have been validated by numerous empirical studies for use with children adolescents and adults who display behaviors as diverse as aggression self injury tantrums and bizarre psychotic speech Functional Communication Training involves teaching students how to communicate those basic wants and needs that they have previously sought to have fulfilled via their problem behavior They are taught to replace their challenging behavior with learned communication skills This book provides the practitioner with step by step instructions for

implementing this effective approach A variety of assessment strategies are reviewed and described to assist in determining appropriate interventions The Motivation Assessment Scale one device designed to assess the function of problem behavior is outlined in detail and is accompanied with guidelines for its administration and interpretation Communication training is then detailed and illustrated using speech sign language and augmentative systems as examples Numerous case examples throughout illuminate both the assessment and intervention strategies Providing clear direction for ameliorating complex behavior problems this book will be valued by psychologists behavior analysts special educators and speech and language therapists It can be used as a text for advanced undergraduate courses on behavior management in psychology and special education and also serves as supplementary reading for courses on behavior modification or mental retardation developmental disabilities

Promoting Self-determination in Students with Developmental Disabilities Michael L. Wehmeyer,2007-04-14 Affordable and complete this book provides evidence based strategies to promote self determination and is the first volume to combine both theory and practice in this area Because self determination is a key issue for students with moderate and severe disabilities this is an ideal resource for middle and secondary special educators school psychologists and other school practitioners
