investments The tourism Industry is unlike any other industries because Instead of a physical product you are selling a place and all the things it has to offer services You are competing with the entire world every time you promote tourism in a given destination and this high level of competition demands a creative and unique approach The variability among living organisms from all sources including inter alia terrestrial marine and other aquatic ecosystems and ecological complexes support tourism development Natural environment or wilderness wild animals rocks birds forest and in general those things that have not been substantially altered by human intervention support tourism activities Therefore support services have to complement the sustenance of tourism at various levels
